

Krishna Bhargav Biradha

+13612493235 bkbhargav2000@gmail.com

Summary

Recent MS in Computer Science candidate with strong foundations in data and statistical analysis, variance analysis, and A/B testing. Proficient in Python, MySQL, and cloud computing, with a clear focus on data integrity and visualization. Demonstrates effective communication and teamwork skills, combined with rigorous academic training in computer science and engineering.

Skills

- **Programming Languages:** C, C++, Python, Java, Javascript, Programming With R
- **Database & ETL:** MySQL, ETL Processes
- **Cloud & Web:** Cloud Computing, AWS Cloud, HTML, CSS
- **Data Analysis & Visualization:** Data Visualization, Pandas, NumPy, Matplotlib, Seaborn, Statistical Methods, Storytelling With Data, Experimental Design
- **Soft Skills:** Organizational Skills, Project Management, Communication Skills, Analytical Skills, Critical Thinking, Teamwork And Collaboration, Decision Making, Interpersonal Skills, Attention To Detail, Problem Solving , Outlook, Excel

Work Experience

Evolv Tech

Sep 2022 – Jul 2023

- **Data Analysis & Insights:** Led data analysis initiatives to support product development and customer insights. Utilized Python and SQL to process, analyze, and interpret complex datasets, resulting in actionable recommendations and strategic decision-making.
- **Collaborative Problem-Solving:** Partnered with engineering, marketing, and sales teams to understand data requirements and deliver customized analytical solutions. Improved cross-functional communication by providing clear data visualizations and reports.
- **Predictive Analytics:** Implemented predictive models using machine learning techniques to forecast market trends and customer behavior, contributing to a 15% increase in customer retention.
- **Data Governance:** Maintained data accuracy and integrity through rigorous data governance practices. Managed data pipelines and ETL processes to ensure seamless data flow and storage.

Bluesoft

Sep 2020 – Aug 2022

- Designed, wrote, and optimized SQL queries, stored procedures, and views to support data extraction, reporting, and analytics.
- Managed relational databases, ensuring data integrity, accuracy, and optimal indexing for performance improvements.
- Developed ETL processes to extract, transform, and load data from multiple sources into centralized databases.
- Created dashboards and reports by integrating SQL data with BI tools for actionable business insights.
- Collaborated with cross-functional teams to troubleshoot database issues, refine queries, and implement data-driven solutions.

Education

Texas A & M University, Corpus Christi

Aug 2023 - May 2025

MS, Computer Science

- **Achievements:** GPA-3.25/4

Gitam University

Jul 2016 – May 2020

BS, Computer Science

- **Achievements:** GPA-3.7/4

Projects

Resume summarizer and job description matcher using NLP and Spacy

Apr 2020

- This project, developed using Python, serves as a Service platform for HR management. The tool efficiently parses and filters resumes

submitted by applicants, streamlining the hiring process.

- Natural Language Processing techniques like Regular Expressions, Tokenization, N-Grams, etc. were used.

Planetary motion flows prediction using CNN

Jul 2019

- Used deep learning to predict the motion flows in upcoming frames by training the video and extracting the frames from video.

Library Management

Sep 2017

- It employs object-oriented programming (OOP) and file management concepts to open and close the required books, assisting patrons in finding their required materials by organizing e-resources appropriately.

Certifications

• **HACKERRANK:** COMPETITIVE CODING

• **ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING:** using NumPy, Pandas & Scikit learn

• **Structured Query Language:** SQL
