

Bhargav Koukooori
Senior .Net Full Stack Developer
Phone: 678-848-5001
Email ID: bhargav0750@gmail.com
No Sponsorship Required

Professional Summary:

- Experienced software developer with expertise in the analysis, design, development, and implementation of web-based, Windows-based, client-server, and n-tier applications.
- Proficient in modern software technologies with a strong understanding of global, regional, and local software architecture and infrastructure components.
- Skilled in leveraging Microsoft 365 tools (Word, Excel, AI Copilot) to automate documentation, analyze data trends, and improve reporting efficiency in development projects.
- Adept at delivering solutions using Agile and Scrum methodologies to ensure timely and iterative development cycles.
- Extensive experience in coding, testing, debugging, and providing ongoing support for complex business processes and system solutions.
- Proficient in the Software Development Life Cycle (SDLC), including requirement analysis, design, development, testing, and implementation.
- Strong ability to design program and system logic while preparing comprehensive program specifications.
- Proven track record in effective collaboration with cross-functional teams, motivating colleagues, and optimizing team performance.
- In-depth knowledge of architectural concepts, principles, and tools relevant to infrastructure, applications, and organizational structures, ensuring alignment with company objectives.
- Skilled in safeguarding the integrity of corporate data while adhering to company technology standards and best practices.
- Expertise in multi-tier applications using .NET Framework, ASP.NET, ADO.NET, C#, and SQL Server, with experience in database design, stored procedure development, and data manipulation using ADO.NET.
- Proficient in developing and deploying microservices using ASP.NET Core Web API and containerizing .NET Core applications.
- Experience with version control tools such as VSS and TFS, and conducting code reviews to ensure adherence to design specifications, industry standards, and best practices.
- Quick learner and versatile team player, committed to continuous self-improvement and delivering high-quality results, both independently and collaboratively.

Education

- | | |
|--|----------|
| • Bachelor of Technology in Computer Science | May 2011 |
| • Masters in computer science | May 2015 |

Experience:

Zurich Insurance (RCIS), Anoka, MN	September 2018 - Till Date
.Net Full Stack Developer	

Responsibilities:

- Extensively Worked on Agile and Scrum methodology.
- Proficiently design, code, and modify complex computer programs, subroutines, triggers, stored procedures, objects, classes, and scripts.
- Leveraged GitHub Copilot's AI capabilities to generate boilerplate code, suggest optimized solutions, and troubleshoot issues during .NET development.
- To design, develop and implement the critical application for .Net environment.

- Designed and developed using Object-oriented Analysis and Design (OOAD) Concepts, including background and implementation in using Design Patterns.
- Leverage Oracle Database to ensure efficient data storage, retrieval, and manipulation within applications.
- Employed AI tools to implement best practices and ensure clean, maintainable, and scalable code in .NET projects.
- Used Web API as an ideal platform in building Restful applications on .NET Framework.
- Also worked on converting the .Net Framework to .Net 6 versions, which helped applications to work and move faster to higher environments like System Test and Prod by leveraging Hot Reload and improvements in File Stream.
- Also gained some experience on .Net 6 new git tooling, intelligent code editing, diagnostics, and little bit of working in testing tools.
- Skilled in Angular 12, Typescript 4.2, CSS, JavaScript, Git, Experience working and integrating front end applications with RESTful Middle-Tier Applications.
- Leveraged new functionalities like onPopState from Common, using new HttpParams signatures from Angular 12 and many.
- Also integrated PDF editing tools like PDFTRON with the latest angular version application for enabling them to edit, add timestamps etc. for documents.
- Also skilled in integrating electronic signature pads like TOPAZ Signature Pads with latest angular versions like Angular 12 and above to capture user signature in angular based applications.
- Proficient understanding of code versioning tools, such as Git, TFS, VSTS.
- Aid and guidance during the QA & UAT phases to quickly confirm the validity of potential issues and to determine the root cause and best resolution of verified issues.
- Experience with collaborative requirements gathering & development processes: Specification by example, behavior-driven development using SpecFlow, Cucumber, Gherkin.
- Worked on CI/CD pipelines using Azure DevOps like creating pipelines to builds, releases, Nuget packages on class libraries and creating triggers etc.
- Integrated AI-powered tools to assist in debugging complex .NET applications, reducing development time and enhancing solution quality.
- Implemented Azure DevOps solutions for various development teams, including source control, work item tracking, build and release management.
- Configured and maintained Azure DevOps pipelines, including automated builds and deployments.
- Developed custom scripts and tools to automate various aspects of the software development process.
- To collect the software requirement by the customer and develop the application as per their requirement.

Environment: .Net Framework 4.5/4.0, .Net 6, ASP.NET MVC, Entity Framework, Azure, Web API, Angular 8, Typescript .7.8.5, CSS, JavaScript, GIT, TFS, Microservices, VSTS, QA, UAT, Cucumber, Gherkin, CI/CD, SQL, SQL Server 2008, N-unit, Jasmine, VB.Net, Spec Flow, OOAD, Scrum, Agile.

Quadax Inc, Cleveland, OH (TEKSystems)
.Net Full Stack Developer

March 2018 - Sep 2018

Responsibilities:

- Analyzing, designing, developing, implementing, and maintaining application code in a variety of contexts including existing applications.
- Extensively Worked on Agile and Scrum methodology.
- Designed and developed abstract classes, interfaces, classes to construct the business logic using Object Oriented Concepts.
- Apply development best practices as test-driven development (TDD) techniques and integration tests for all developed software.

- Developed Applications using VB.Net, .NET Framework 3.5, Object Oriented Principles, and n-tier architecture.
- Used Web API as an ideal platform in building Restful applications on .NET Framework.
- Implemented Template Columns for Custom Nested Grid Views.
- Leveraged Angular 6.0 for scripting, AJAX calls and JSON and XML for passing objects from Controller to View and vice versa.
- Worked with Team Foundation Server 2013 to process the Automated Build deployment also used features like reporting, project management and release management capabilities to achieve CI/CD.
- Updated dashboard front end to support multiple dashboards and their CRUD operations using typescript 3.0.1 (latest).
- Developed Front End using Bootstrap.js, Angular 6, where back End is REST Web Services.
- Developed dynamic responsive Web Application by Integrating Angular 6 with Bootstrap which is further integrated with Web Services.
- Developing unit tests and coordinating with our QA staff to achieve the best blend of error prevention and error detection possible and used the JIRA tool for bug tracking/issue tracker.
- Strong knowledge of HTML, CSS, JavaScript, and other applicable JavaScript frameworks.
- Worked on promoting continuous process improvement especially in code quality, testability & reliability.
- Used ASP.NET MVC framework to support the use of Dependency Injection to inject objects into a class, instead of relying on the class to create the object itself.
- Worked with GIT (Bit Bucket) for version control of the source code along with the maintenance of the builds and the relevant documents of the same.

Environment: Visual Studio 2016, C# 4.0, .Net Framework 4.5/4.0, ASP.NET MVC, Entity Framework 4.5/3.5, ADO.NET, VB.Net, LINQ, HTML, GIT, MS Unit test project, Jasmine, Angular 6.0, Angular 4.0, Angular 2.0, TypeScript 3.0.1 and below, AngularJS, SQL Developer, JIRA as One for bugs tracking, SQL Server 2012, Windows Server 2005/2008 R2/2008.

Publix Super Markets, Lakeland, FL
.Net Developer

Jun 2016 - Feb 2018

Responsibilities:

- Involved in development of Presentation Layer, Business Logic Layer, Data Access Layer, and various other tiers of N-Tiered application.
- Designed and developed abstract classes, interfaces, classes to construct the business logic using Object Oriented Concepts.
 - Used Model View Controller (MVC) design pattern to develop a complex web application, ASP.NET with C# as code behind AngularJS, AngularJS 4.0 is used for client-side validation.
 - Modified web services to interact with the other applications and exposed them using SOAP and HTTP.
 - Developed user interface screens under Visual Studio.NET 2012/2015 using ASP.NET, VB .Net and C#.
 - Used ASP.NET MVC framework to support the use of Dependency Injection to inject objects into a class, instead of relying on the class to create the object itself.
 - Leveraged AngularJS for scripting, AJAX calls and JSON and XML for passing objects from Controller to View and vice versa.
 - Created Business Logic Layer & Data Access Layers to implement the MVC 5 architecture.
 - Created Application Pools in the IIS7 to Bridge the application, where the WCF Services are called from different Projects.
 - .Net Framework 4.5/4.0/3.5/3.0, ASP.NET and new C# 4.0 features like LINQ, Entity Framework.
 - Worked with Team Foundation Server 2013 for version control of the source code along with the maintenance of the builds, automated builds, and the relevant documents of the same.
 - Designed Graphical User Interface (GUI) using Layout Pages, HTML, HTML 5, JavaScript, and CSS.

- Create SQL based reports using SQL Server Reporting Services (SSRS) with parameters and stored procedures.
- Coded and created Stored Procedures for performing repetitive tasks in updating related tables using SQL Server 2012.
- Implemented Eager Loading and Explicit Loading, Compiled queries, Immediate Execution to improve performance to LINQ to Entities.

Environment: Visual Studio 2013, C# 4.0, .Net Framework 4.5/4.0, ASP.NET MVC, Entity Framework 4.5/3.5, ADO.NET, LINQ, HTML, WCF, TFS, Angular 4.0.0, AngularJS, SQL Developer, SQL Server 2012, Windows Server 2005/2008 R2/2008.

Northern Trust Corp, Chicago, IL
.Net Developer

July 2015 -Apr 2016

Responsibilities:

- Worked on C# with .NET Framework 3.5 or above.
- Designed and developed using Object-oriented Analysis and Design (OOAD) Concepts, including background and implementation in using Design Patterns
- Extensively Worked on Agile and Scrum methodology.
- Implemented software pattern using Dependency injection.
- Implemented SOLID design principles for best practices and good software architecture, which provided a principled way to manage a dependency.
- Developed user interface screens under Visual Studio.NET 2008 using C#.
- Used NHibernate as the ORM tool for data access.
- Support the use of Dependency Injection (Unity or similar) to inject objects into a class, instead of relying on the class to create the object itself.
- Plan and design Microsoft SharePoint environments
- Configure Microsoft Office SharePoint.
- Good knowledge in developing and designing reports with Dashboard teams through SSRS and Excel.
- Also, expertise in using Delegates and Asynchronous call patterns.
- .Net Framework 4.5/4.0/3.5/3.0, Windows Communication Foundation (WCF) and ASP.NET and new C# 4.0 features like LINQ.
- Significant experience NET WCF framework with Web Services (REST and SOAP).
- Worked with Team Foundation Server 2013 for version control of the source code along with the maintenance of the builds and generation of the relevant documents of the same.
- Also Used to Perform thorough Code Reviews and suggest changes per the design specs, standards, and industry best practice.
- Also Coded to send emails by reading template from text files. Database logging for system emails, using NHibernate.
- Coded to import xml file, validating it with xml schema, using NHibernate to check if the data was available in the database, and valid for import.
- Worked on application which is a large WCF.NET SOA built in .NET 3.5, which provides performance & risk data to multiple reporting applications. The database is Oracle 11g Exadata, which is +25 TB.

Environment: Visual Studio 2008, C# 4.0, .Net Framework 4.5/4.0, Entity Framework 4.5/4.0/3.5/3.0, WCF, TFS, XML, AngularJS, Oracle 11g/10g/9i, SOAP, SQL Developer, SSRS, SQL Server 2012, Windows Server 2008, XML Spy, SoapUI, ReSharper.

EA Sports(Cyient), Hyderabad,India
.Net Developer

Jun 2011 - Dec 2013

Responsibilities:

- Successfully organized initial set of requirements into a master list of Use Cases.
- Worked in an Agile Environment to deliver higher-quality software far more rapidly.
- Involved in development of Web Forms, Classes using C#.NET that incorporates both N-tier architecture and database connectivity.
- Worked on different aspects of .NET framework, like ASP.NET, ADO.NET and C#.
- Developed presentation layer using server-controls, HTML controls and user and custom controls.
- Application was developed under ASP.Net MVC architecture. Used AJAX Library, CSS, JavaScript and various web controls to present data to users in a much comfortable environment.
- Used various ASP.NET web server controls that included Site Map Path, Menu, Tree View, GridView and DetailsView to develop web forms.
- Involved in Unit Testing and Integration Testing of the entire application.
- Implemented version controlling using Visual Source Safe.

Environment: ASP.NET, C#, ADO.NET, ASP.NET MVC, XML, Web services, HTML, JavaScript, IIS 6.0, HTML, DHTML, UML, CSS, UML, Ajax Toolkit, VSS, Visual Studio 2005, COM+, Win Forms, XML, XSL, HTML, Oracle 9i.
