

BHARGAV PARVATHANENI

FINANCIAL DATA ANALYST

TX | Phone: +1 601-208-0966 | Email: bhargavp.1800@gmail.com | LinkedIn: [linkedin.com/in/bhargavparvathaneni/](https://www.linkedin.com/in/bhargavparvathaneni/)

SUMMARY

Financial Data Analyst with 3+ years of experience in financial modeling, data analysis, and risk management, passionate about integrating AI and machine learning technologies into analytical workflows. Proficient in MS Excel, Python, R, and SQL for developing financial models, forecasting, and portfolio optimization. Skilled in statistical analysis, hypothesis testing, regression, and time-series analysis with exceptional problem-solving abilities for complex financial challenges. Experienced in using advanced data visualization tools like Power BI, SAS and Tableau for insightful data storytelling and reporting. Demonstrated leadership experience mentoring cross-functional teams and driving strategic initiatives. Proven ability to enhance decision-making through dynamic visualizations and risk assessment models.

EXPERIENCE

PNC Financial Services

Florida, FL

Financial Data Analyst

Dec 2024- Present

- Developed and maintained sophisticated financial models using Python, machine learning algorithms, and advanced Excel functions with pivot tables to support budgeting and forecasting processes, improving the accuracy of revenue projections by 15%.
- Conducted hypothesis testing and regression analysis to identify key drivers of portfolio performance, enabling data-driven investment decisions for a \$50M portfolio.
- Developed interactive Power BI dashboards with DAX functions for real-time cash flow visualization and financial KPI tracking, reducing reporting time by 15% and improving data-driven decision making capabilities.
- Performed credit risk assessment and sensitivity analysis on investment portfolio, developing scenario-based stress testing models using Python and Excel to evaluate interest rate and credit spread impact on portfolio performance.
- Automated repetitive data analysis tasks using VBA scripts in Excel, streamlining monthly financial reporting processes and saving 15 hours per month.
- Collaborated with cross-functional database teams to integrate MySQL queries and SQL scripts into financial reporting workflows, ensuring data accuracy, data integrity, and real-time data processing for budgeting and forecasting systems.

Virtual Infotech Solution

India, IND

Financial Data Analyst

Jan 2021 - June 2023

- Designed time-series forecasting models using Python for quarterly revenue predictions, achieving 20% improvement in forecast accuracy and 75% directional accuracy compared to traditional manual estimation methods.
- Built data visualizations using Tableau to present portfolio performance metrics, improving decision-making efficiency by 20%.
- Performed scenario analysis and risk modeling using Python to support hedging strategy evaluation, providing quantitative analysis that identified potential risk reduction opportunities of 15-20%.
- Executed complex SQL queries on databases to extract and analyze transactional data, supporting cash flow forecasting for clients.
- Applied R for statistical analysis to evaluate investment risks, identifying critical risk factors for strategic budgeting decisions.
- Created data warehousing solutions to consolidate financial datasets, improving data retrieval efficiency by 25%.
- Utilized SAS for statistical analysis and data modeling to support credit risk assessment projects, contributing to risk scoring model development and validation with improved prediction accuracy compared to baseline methods.
- Presented analytical findings and risk insights to cross-functional teams and client stakeholders, supporting strategic planning discussions and improving meeting efficiency by 10% through enhanced data presentation and visualization techniques.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming languages / Libraries : Python, SQL, R, NumPy, Pandas, Matplotlib, Plotly, SciPy, Seaborn

Databases: MySQL, SQL Server

Visualization and Reporting tools: MS Excel, Power BI, SAS, Tableau, MS Powerpoint, MS Word, QuickBooks

Operating systems: Windows, Linux

Other Skills: Financial Modeling, Forecasting, And Budgeting, Portfolio Optimization, Risk Management, Credit Risk Modeling, Hedging Strategies, Sensitivity Analysis, Budgeting, Cash Flow Forecasting, GIT

EDUCATION

University of North Texas

Denton, TX

Masters of Science in Advanced Data Analytics

Aug 2023 – May 2025

- Relevant coursework: Large Data Visualization, Harvesting Storing and Retrieving data, Discovery and Learning with Big Data, Applications and Deployment of Advanced Analytics, Managing Analytics Projects, Information and Cyber-security

CMR Institute of Technology

Hyderabad, IND

Bachelor of Technology in Computer Science

June 2017 – May 2021

- Relevant coursework: Computer Programming, Object Oriented Programming, Big Data, Engineering Mathematics, Database Management Systems, Distributed Computing and Cloud computing

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate - Microsoft

IT Fundamentals for Cybersecurity - IBM

Google IT Support Professional - Google
