SUMMARY

Dynamic and results-driven Data Analyst with close to 4 years of experience in transforming complex datasets into actionable insights through data visualization, database management, and business intelligence solutions. Proficient in Power BI (Power BI Pro, Power Query, Power Pivot, Power BI Service, Power BI Desktop) and skilled in designing interactive dashboards, advanced DAX calculations, and data models to support strategic decision-making. Experienced with SQL, SSIS, SSRS, and SSAS, utilizing these tools for data manipulation, ETL processes, and optimized reporting and analysis. Adept at leveraging cloud technologies such as Azure (ADF, Synapse Analytics, SQL Database, and Databricks) for scalable data integration, storage, and analytics. Strong collaboration with stakeholders to document data models, metrics, and KPIs, aligning solutions with business objectives and Python proficiency for data extraction and integration.

TECHNICAL SKILLS

Methodologies: SDLC, Agile/Scrum, Waterfall

Programming Language and IDEs: Scala, Python, SQL, Visual Studio Code, PyCharm, Jupiter Notebook, DAX

Data Ecosystem: Hadoop, MapReduce, Hive, Pig, DynamoDB, Big Query, HDFS, Spark, HBase, Kafka

Machine Learning: Linear Regression, Logistic Regression, Decision Tree, SVM, K mean, Random Forest

Cloud Technologies: AWS, GCP, Azure (Databricks, Microsoft Fabric, HDInsight, SQL DB), Google Cloud Platform (Google Colab, Google Vertex AI), Azure Data Factory, Azure Synapse

Analytics Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow, Kafka, PySpark

ETL and Reporting Tools: Apache Spark, Apache Airflow, Tableau, Power BI, Spotify, SSRS, SSIS, SSAS, SAS, Informatica, Alteryx, Denodo, Cognos, Qlik, SAP BusinessObjects

Database: MS SQL Server, PostgreSQL, MongoDB, MySQL, Cassandra, Snowflake Other

Technical Skills: Data Modeling, Data Warehouse, Data Quality, Data Analysis, Data Governance, Team Collaboration, UM Data Delivery Environment

EDUCATION

Master of Science in Data Science and Analytics | Grand Valley State University | Grand Rapids, MI

Aug 2022 - Apr 2024

Bachelor of Technology in Electronics and Communications | Manipal University Jaipur | India

Aug 2017 – Apr 2021

WORK EXPERIENCE

Humana, USA | Data Analyst

Aug 2023 – Present

- Built and maintained automated ETL pipelines using SSIS, Azure Data Factory, and Databricks to transform clinical and operational data for healthcare quality improvement.
- Implemented row-level (RLS) and column-level security (CLS) in Power BI to ensure compliance and secure patient data.
- Configured data gateways for real-time access and integrated Power BI dashboards into PowerPoint for dynamic reporting.
- Optimized Power BI datasets and automated report scheduling to provide timely insights for healthcare decision-makers.
- Collaborated with stakeholders to gather reporting requirements, documenting data models, metrics, and KPIs.
- Integrated SQL Server, Oracle, and Azure Data Lake into Power BI, using HDInsight and Kafka for real-time processing.
- Designed SSIS packages for automated claims data updates and implemented transformations for data validation.
- Developed 30+ interactive Power BI dashboards, improving reporting efficiency by 40%.
- Led migration of SSIS packages to Databricks, increasing data processing speed by 50% and reducing costs.
- Designed Power BI dashboards with advanced DAX, Power Query, and drill-down visualizations for effective data storytelling.
- Created performance dashboards and job failure statistics using SSIS, SQL, and Excel, presenting daily client reports.
- Managed SSIS ETL packages for data validation, transformation, and migration, ensuring reliability with error handling.
- Configured SSIS with optimized database objects and focused on normalization (3NF) and denormalization for performance.

Sage Softech, India | Data Analyst

Jan 2021 – Jul 2022

- Developed and maintained ETL processes using SSIS to extract, transform, and load large volumes of insurance claim data into the data warehouse.
- Implemented SSIS data transformations for cleaning and validating medical claim data before database loading.
- Designed SSIS packages for automating claims data updates from external insurance carriers into SQL databases.
- Created and maintained SSRS reports to track healthcare claims, providing stakeholders with detailed insights.
- Optimized SSIS packages to load large datasets from various healthcare sources, improving data processing efficiency.

- Built scalable ETL pipelines in Azure Databricks using PySpark and Spark SQL, transforming over 5 million records for Azure Data Lake and Synapse Analytics.
- Integrated data from SQL, Excel, and external healthcare databases to develop Power BI and SSRS dashboards.
- Designed Power BI reports using advanced DAX, Power Query, and data models to analyze patient outcomes and regulatory compliance.
- Built interactive Power BI dashboards with Microsoft Fabric, improving marketing ROI by 20% through data-driven insights.
- Designed dimensional data models using SQL and Star Schema methodology for accurate reporting.
- Developed workflows in Power Automate to automate data transfers between insurance systems and external partners.
- Integrated Power Automate with SharePoint, Power BI, Dynamics 365, and Teams for streamlined business processes.
- Developed mobile-first Power Apps with real-time data sync, enabling field workers to access and update records instantly.
- Built dynamic, responsive user interfaces in Power Apps with real-time data validation and error handling for improved functionality.

PROJECTS

Community Sentiment Analysis, Antrim County Police Headquarters Development Survey:

- Leveraged SQL, Excel, and R Studio to transform raw survey data into actionable insights for county infrastructure planning.
- Executed advanced data processing techniques, converting complex survey responses into structured datasets.
- Conducted comprehensive statistical analyses including univariate and bivariate examinations to assess public sentiment.
- Generated critical findings on community perspectives regarding new police headquarters construction and potential tax implications.
- Presented key insights to county management and Grand Valley State University officials.

CERTIFICATIONS

- Microsoft Certified: Azure Data Engineer Associate (DP-203)
- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Tableau Certified Data Analyst Associate
