

BHARGAVI SRI BOLLARAPU

+1 (901) 428-3077 | bhargavisrib@gmail.com | Memphis, TN

PROFESSIONAL SUMMARY

Results-driven Information Systems graduate with strong foundations in accounting, auditing, data integration, and system development. Having experience building ETL pipelines, automating workflows, and developing full-stack applications. Passionate about leveraging data-driven solutions to enhance business intelligence and optimize system performance. Looking for an internship to apply my skills in data management, analytics, and cloud computing systems.

EDUCATION

Master's in Information Systems , University of Memphis	2023 - present
Relevant Coursework: Machine Learning, Database systems, Business languages, Algorithms and Problem Solving, Database Systems	2018 - 2022
Bachelor of Electronics and Communication Engineering , Malla Reddy Engineering College	

SKILLS

Languages: JavaScript, Python, Java, C, Data structures

Databases: MySQL, LINUX, NoSQL

Networking & Protocols: TCP/IP, HTTP, SSL, TCP

Web Technologies: HTML, CSS, BOOTSTRAP, APIs, Web Services

Cloud technologies: AWS

EXPERIENCE

Cognizant| Full stack developer Aug 2022 - July 2023

- Developed end-to-end ETL solutions to integrate data from multiple sources and built interactive BI dashboards.
- Cleaned and preprocessed large datasets to support data analytics and visualization projects.
- Implemented web form validations using .NET, Bootstrap, and JavaScript to enhance user experience.
- Developed web applications with HTML, CSS, JavaScript, and jQuery, integrating API keys for seamless data access.
- Built workflow automation pipelines using Informatica IICS, optimizing data transfer efficiency

Cognizant| Data integration Intern Feb 2022 - Aug 2022

- Trained on Java, Informatica power centered, Data Warehouse, Basic operating system Linux.
- Done Hands-on creating web pages, java, performed data analytics using Informatica (IICS), Tableau
- Collaborated with cross-functional teams to troubleshoot and resolve software bugs, resulting in a 40% reduction in customer-reported issues and increasing customer satisfaction ratings by 20%.

PROJECTS

Solar Powered Irrigation System| IOT, Microcontroller programming, wireless communication, AWS

- Developed an irrigation system where it can be operated in both automatic and manual way.
- We have integrated with IOT platform and Arduino to operate efficiently. •
- Dealed with fast2SmS platform for sending an alert message and to provide remote monitoring.
- Dealed with IOT,automation,cloud computing,data analytics to enable efficient, remotely managed irrigation system.

Web Traffic Analysis and User Behavior Prediction| Web Analytics, Data Visualization

- Built a data-driven web analytics system to analyze user behavior and predict future engagement trends for an e-commerce platform.
- Extracted and processed clickstream data using Python (Pandas, NumPy) and SQL from server logs and Google Analytics APIs.
- Engineered session-based features to capture user navigation patterns, time spent, bounce rate, and conversion funnels.
- Developed machine learning models to predict user churn and likelihood of purchase based on behavioral data.
- Visualized user flows and traffic trends using Tableau and dynamic Excel dashboards for marketing and UX teams.

CERTIFICATIONS

- Certified in Cisco C
- Internship on IOT from Bolt Academy
- Certified AZ900 in AWS
