

Bhavana Reddy Banuri

Data Analyst

bhavana@mymailsbox.net | (443)248-6500 | USA | [LinkedIn](#)

Summary

Experienced Data Analyst with 2+ years of experience in data extraction, transformation, and analysis to drive strategic business decisions. Skilled in SQL, Python, R, and cloud-based ETL tools (AWS and Azure). Adept at creating interactive dashboards using Power BI and Tableau to visualize KPIs and trends. Strong setting in statistical modeling, customer segmentation, and time-series analysis. Collaborative team player with a solid insight of Agile methods, assigned to delivering accurate, actionable insights for improved organizational performance.

Technical Skills

- **Programming & Data Analysis:** Python (NumPy, Pandas, Scipy, Statsmodels), R (ARIMA)
- **Databases & Querying:** SQL (AWS Athena, Azure SQL Database), SQL Techniques (Window Functions, CTEs)
- **Cloud & ETL Tools:** AWS (S3, Glue), Azure Data Factory
- **Data Formats:** CSV, Parquet
- **Data Visualization:** Power BI (DAX, custom visualizations), Tableau (dynamic filters, calculated fields, LOD expressions)
- **Analytics & Modeling:** Customer Segmentation (K-Means, DBSCAN), Cohort Analysis, RFM Metrics, Time-Series & Seasonal Trend Analysis
- **Methodologies:** Agile Scrum, Data Validation & Cleansing, Automated Anomaly Detection

Professional Experience

Data Analyst, Charles Schwab Corporation

10/2024 – Present | Remote, USA

- Worked on Customer Segmentation and Lifetime Value Analysis collaborating with marketing sales and product teams in Agile sprints and gathered requirements to segment clients by trading behavior investment patterns and demographics to find high-value groups.
- Extracted and optimized data from AWS S3 using SQL and SQL techniques (window functions and CTEs) via AWS Athena and managed ETL pipelines processing structured and semi-structured data in CSV and Parquet formats from internal trading and CRM databases.
- Applied unsupervised clustering methods including K-Means and DBSCAN along with cohort analysis to segment customer base by investment frequency portfolio size and trade volume uncovering key customer personas driving 70% of revenue.
- Conducted detailed data analysis using Python libraries like NumPy Pandas Scipy and Statsmodels calculating RFM metrics and accurately estimating Customer Lifetime Value to prioritize retention strategies for the top 15% of customers.
- Performed rigorous data validation and cleansing during ETL using AWS Glue ensuring 99.8% data accuracy and automated anomaly detection scripts to flag inconsistencies in transactional data maintaining integrity for downstream analytics.
- Developed interactive Power BI dashboards with drill-down filters custom visualizations and real-time KPI tracking and implemented DAX formulas for dynamic CLV calculations enabling stakeholders to monitor segmented customer performance continuously.

Data Analyst, S&P Global

07/2022 – 08/2023 | Hyderabad, India

- Gathered and integrated financial market data from Bloomberg and internal sources, collaborating with Product and IT teams via Agile sprint sessions, improving requirement clarity by 30% for the Financial Market Trend Analysis & Reporting Dashboard development.
- Developed and optimized complex SQL queries on Azure SQL Database for ETL pipelines, reducing data retrieval time by 40% while processing over 10 million records from multiple market data sources, ensuring accuracy and performance.
- Conducted time-series and seasonal trend analyses using statistical techniques, identifying key market patterns that improved forecasting accuracy by 25%, supporting investment strategy decisions with actionable insights on stock and commodity movements.
- Cleaned and transformed datasets using Python libraries such as pandas and NumPy, automating data preparation workflows that cut manual processing time by 35% and enhanced data quality for subsequent analysis.
- Employed R's ARIMA model for financial market forecasting, achieving a 20% increase in prediction precision, which enabled better short-term trend anticipation, enhancing stakeholders' decision-making capabilities in volatile markets.
- Performed via data validation and monitoring during ETL using Azure Data Factory to ensure data completeness with accuracy and built an interactive Tableau dashboard with dynamic filters, calculated fields, and LOD expressions, boosting user engagement by 50%.

Associate Data Analyst, Signant Health Private Limited

01/2022 – 06/2022 | Hyderabad, India

- Partnered with Product and Sales teams to collect detailed requirements, collaborating with senior analysts to shape client usage analysis goals for S&P Capital IQ and S&P Global Market Intelligence, driving strategic improvements in user engagement.
- Extracted, transformed, and prepared extensive client interaction datasets using SQL and Python (pandas), applying cohort and trend analysis techniques to uncover behavioral patterns and segment customers of S&P Capital IQ and Market Intelligence.
- Performed in-depth exploratory analysis in Excel, leveraging segmentation and RFM (Recency, Frequency, Monetary) frameworks to assess engagement levels for S&P Capital IQ and S&P Global Market Intelligence clients, finding high-value segments for retention.
- Designed and deployed dynamic Tableau dashboards uniting drill-down filters and calculated fields, visualizing client behavior insights for S&P Capital IQ and Market Intelligence, enabling stakeholders to optimize product adoption and enhance customer satisfaction.

Education

Master of Science in Data Science

University of Maryland, Baltimore County (UMBC)

Bachelor of Technology in Computer Science

Geethanjali College of Engineering and Technology

09/2023 – 05/2025

Baltimore, MD, USA

08/2019 – 05/2023

Hyderabad, India
