Professional Experience

Accenture

Senior Analyst

Oct 2021 – May 2023

- **Predictive Analytics & Fraud Identification:** Designed and implemented a provider-level fraud detection framework across 150k+ Medicare claims, enabling early risk identification and improving detection efficiency by **38%**.
- **Data Architecture for Targeted Investigation:** Consolidated multi-source claim and patient data to engineer high-signal fraud indicators, increasing investigative prioritization effectiveness by **42%** and reducing case backlog.
- **Enterprise Readiness & Team Leadership:** Partnered with ML Ops, Risk, and Clinical SMEs to refine fraud logic, integrating medical exemptions and stakeholder inputs—cutting false positives by **22%**.
- **Operational Risk Oversight:** Delivered KPI-driven dashboards and health checks, boosting fraud oversight responsiveness by **35%**.

eClinicalWorks

Project Manager

Dec 2019 – Oct 2021

- **User Engagement Optimization:** Achieved a **28%** improvement in behavioral compliance by analyzing multi-channel user data and aligning outreach strategies across 130k+ records.
- **Data-Driven Personalization Strategy:** Enabled a **17%** boost in user responsiveness by conducting A/B testing and converting statistical outcomes into configurable scheduling defaults and outreach logic.
- **Cross-Functional Impact Framing:** Strengthened implementation success by mapping analytical insights into task-level Jira requirements, enhancing engineering delivery confidence by **33%**.
- **Product Growth Insight Enablement:** Delivered a **26%** uplift in pilot performance by synthesizing analytical findings into executive-ready summaries, enabling swift product configuration updates.

247.ai

Executive

Nov 2017 – Dec 2019

- **Data Analysis & Strategic Insights:** Analyzed customer behavior data with Excel to identify churn risks, providing actionable insights that led to an **8%** improvement in retention rates within the year.
- **Customer Engagement Optimization:** Collaborated with marketing and product teams to design personalized engagement strategies, resulting in a **15%** increase in customer participation through targeted offers.
- **Leadership & Strategic Direction:** Led cross-functional teams in the development of new retention initiatives, driving a **10%** increase in client satisfaction and fostering long-term customer loyalty through effective strategy execution.

Internship

Scribe EMR

Data Analyst Intern

May 2024 – Aug 2024

- **Data Analysis & Workflow Improvement:** Analyzed provider scribe usage to identify gaps, driving a **10%** improvement in performance through adjustments in task distribution and resource utilization.
- **Process Optimization & Experimentation:** Executed 5+ A/B tests on scribing workflows, identifying inefficiencies and optimizing processes, resulting in a **12%** reduction in documentation errors and improved productivity.
- **Dashboard Development & Automation:** Developed automated Tableau dashboards, integrating real-time data from multiple sources, which reduced manual reporting time by **30%** and enhanced data-driven decision-making.

Projects Bhavana Mysore Basavaraju - Portfolio

- Predicting EV emissions in New York - Predictive model in Python using K-means Clustering and Regression analysis for providing insights to policymakers and planners to drive EV adoption and sustainability efforts.
- Visualization of House Sales Data – Created visualizations in Tableau and Excel to provide actionable insights for stakeholders across the global marketplace.

Education

Master of Science in Business Analytics

California State University East Bay

California, United States

Courses: Statistics for Data Science, Data Analytics, Database Management and Applications, Data Mining, Predictive Analytics.

Bachelor of Engineering

Visvesvaraya Technological University

Karnataka, India

Skills

Data Analytics: Python, SQL Query Optimization, Tableau, Microsoft Excel, Jupyter, Data Visualization, KPI Dashboard Development, A/B Testing, Hypothesis Testing, Statistical Analysis, Data Integration, Snowflake, Git, Google Sheets, Root Cause Analysis, Cross-Functional Collaboration **Product Feature Analytics:** UAT Planning and Execution, Jira, Product Management, Agile, Performance Monitoring, Impact Analysis, Product Analytics, Experimentation Rollout, Program Management
