

BHAVYA THADIBOINA | Data Engineer

Location: TX, USA | Phone: +1 4692386604 | Email: Bhavya.thadiboina1999@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Over 4 years of experience in finance, banking, and IT, specializing in developing and maintaining robust data pipelines using AWS cloud services.
- Proficient in creating PySpark scripts for data transformation and loading into Redshift, optimizing data processing and handling SCD2 data.
- Automated data pipelines using Apache Airflow and Lambda functions, significantly improving reliability and reducing manual intervention.
- Experience troubleshooting and fine-tuning Spark performance for optimal data workflow efficiency.
- Developed machine learning models for predictive analytics, including temperature forecasting and sentiment analysis.
- Created full-stack solutions using Python, Flask, and FastAPI, enhancing application scalability and maintainability.
- Skilled in Python, Golang, Java, C++, MongoDB, SQL, and PostgreSQL.
- Proficient in data visualization with Tableau and Power BI, effectively conveying insights to stakeholders.

SKILLS

Programming Languages:	Python, Golang, C, Java, C++
Web Development Frameworks:	Fast API, Flask
Data Processing and Orchestration:	PySpark, Apache Airflow, AWS Glue, AWS Lambda
Cloud Services:	AWS (S3, Redshift, EC2, IAM, RDS, API Gateway, CloudWatch)
Databases:	MongoDB, SQL, PostgreSQL
Data Warehousing:	Snowflake, Redshift
Big Data Technologies:	Spark SQL, Spark Streaming, Kafka
DevOps and CI/CD:	Docker, Kubernetes, Azure DevOps, Terraform
Data Visualization:	Tableau, Power BI
Web Technologies:	HTML, CSS, JavaScript
Machine Learning and AI:	NLTK, Naïve Bayes, SVM, TensorFlow, Keras
Tools:	PyCharm, Jupyter Notebooks, Postman, Linux, Bash, Jira, Selenium, VsCode

EDUCATION

Master of Science in Computer Engineering The University of Texas at Dallas- TX, US	Aug 2022 – May 2024
Bachelor of Electronics and Communication Engineering Narasaraopet Engineering College – India	Jul 2016 – Sept 2020

EXPERIENCE

CVS Pharmacy, USA Data Engineer	Dec 2023 – Present
• Developed RESTful APIs using Golang and the Fiber framework, integrating audit logging for user activities and centralized storage in S3. • Created PySpark scripts in AWS Glue for processing daily batch jobs from S3 to the Data Lake, transforming data, and migrating it to Redshift for analysis. • Automated data pipelines with Apache Airflow and AWS Lambda, enhancing efficiency and reliability. • Migrated 5TB of data to Snowflake, improving accessibility and reducing retrieval time by 40%. • Developed real-time data streaming solutions with Python, Spark, and Kafka to enhance processing capabilities. • Implemented Apache Airflow for complex data workflows, achieving a 30% reduction in processing time and a 25% improvement in reliability. • Designed and implemented ETL pipelines to optimize data workflows for efficiency and scalability.	
Wipro Limited, India (Client – S&P Global, New York) Python Developer	May 2020 – Jul 2022
• Developed scalable microservices using Python frameworks like Flask and Fast API for efficient web applications. • Enhanced data storage and retrieval capabilities with MongoDB, SQL, and PostgreSQL databases. • Implemented real-time alarm generation and notifications through microservices. • Created secure APIs for user authentication and authorization to protect sensitive data. • Built and optimized a search engine for detailed industry-level searches. • Worked with DevOps teams to implement CI/CD pipelines, accelerating delivery and improving quality. • Designed and managed cloud solutions using AWS services, including EC2, IAM, S3, and Lambda. • Migrated an application from Flask to Fast API, improving performance and scalability. • Developed machine learning models for temperature prediction and sentiment analysis. • Created computer vision systems for tracking social distancing and counting items on conveyor belts. • Automated data collection and model evaluation with tools like Selenium and Python scripts. • Conducted advanced data analysis and visualization with Python libraries such as Pandas and Matplotlib.	

Data Analyst

- Developed custom Python scripts to automate data extraction from various sources, reducing manual data collection efforts by 30%.
- Conducted comprehensive data analysis using Python libraries such as Pandas and NumPy, identifying trends and patterns in sales and customer data.
- Designed and developed interactive dashboards in Tableau, providing stakeholders with real-time insights and improving decision-making efficiency by 20%.
- Built and deployed machine learning models using Scikit-learn and TensorFlow to predict customer churn, achieving an accuracy rate of 85%.
- Implemented natural language processing (NLP) techniques for sentiment analysis on customer feedback, providing actionable insights for product improvements.
- Developed and implemented automated ETL workflows using Apache Airflow, reducing data processing time by 40%.
- Optimized SQL queries and database structures, resulting in a 25% reduction in query execution time.

TECHNICAL PROJECTS**Build Web Application | UTD Texas**

- Created a registration system that cut data retrieval time by 30% and admin tools that improved inventory accuracy by 50% and reduced transaction errors by 15%.

Employee satisfaction survey data | UTD Texas

- Applied machine learning to reduce employee turnover by 10% and used data-driven strategies to enhance communication effectiveness by 60%.

Database management system for UberEATS - MYSQL | UTD, Texas

- Designed EER schema for improved database efficiency and implemented triggers for data validation, ensuring integrity.
- Developed and implemented automated ETL workflows using Apache Airflow, reducing data processing time by 40% and increasing the efficiency of daily data operations.
- Optimized SQL queries and database structures, resulting in a 25% reduction in query execution time and improved performance of data reporting system
