

Bhavya Sri Pallapu

Data Analyst

SUMMARY

Grand Rapids, MI | ☎ +1 (616)-819-0030 | ✉ bhavyapallapu19@gmail.com | 🔗 LinkedIn

Data Analyst with 3 years of experience in healthcare analytics, real-world evidence (RWE), and population health management. Expert in processing large-scale claims, EHR, and clinical data using advanced statistical methods. Proven track record of delivering actionable insights that drive cost savings, improve patient outcomes, and ensure regulatory compliance. Proficient in building predictive models, automated reporting systems, and executive dashboards that support strategic decision-making in healthcare organizations.

SKILLS

- **Healthcare Analytics & Real-World Evidence:** Claims Data Analysis, EHR Analytics, Population Health Management, Risk Stratification, Outcomes Research (HEOR), Epidemiological Studies, Healthcare Cost Analysis, Quality Measures (HEDIS/Stars)
- **Statistical Analysis & Modeling:** Survival Analysis, Propensity Score Matching, Time-Series Forecasting, Predictive Modeling, Regression Analysis, Cohort Studies, Treatment Effectiveness Analysis, Risk Scoring Models
- **Programming & Data Engineering:** Python (pandas, scikit-learn), R (tidyverse, survival), SQL (complex queries, stored procedures), SAS (healthcare modules)
- **Healthcare Data Standards & Compliance:** ICD-10/11, SNOMED-CT, HL7 FHIR, NCQA Standards
- **Visualization & Business Intelligence:** Tableau (healthcare dashboards), Power BI, Advanced Excel, R Shiny, Interactive KPI Dashboards, Executive Reporting, Clinical Decision Support Tools
- **Clinical Research & Evidence Generation:** Protocol Development, Statistical Analysis Plans (SAP), Systematic Literature Reviews, Meta-Analysis, Comparative Effectiveness Research, Market Access Analytics

EXPERIENCE

VPO Assistant, University Development – Grand Valley State University, Grand Rapids, MI

Jan 2025 – Present

- Supported donor engagement strategy by preparing CRM-based analytics on 10,000+ donor profiles, helping the team design targeted outreach campaigns
- Assisted in survey design and statistical analysis of alumni feedback to inform fundraising approaches and retention strategies
- Built automated Power BI dashboards to visualize donation trends, event attendance, and engagement metrics, providing leadership with actionable insights
- Contributed to process improvement initiatives by mapping donor onboarding workflows and identifying steps to reduce administrative workload while ensuring data accuracy
- Applied predictive modeling techniques in R to help identify high-potential donor segments, supporting fundraising campaigns and prospect research efforts

Market Analyst – The Build Fellowship, Remote

Aug 2024 – Sep 2024

- Researched HER2+ breast cancer treatment landscape by analyzing 200+ clinical trials and real-world studies, providing insights on potential market opportunities
- Developed Excel-based financial models incorporating treatment patterns, payer coverage, and patient journey data to support 5-year revenue projections
- Synthesized oncology data from sources including SEER registry, FDA approvals, and payer databases, translating findings into actionable recommendations for strategy teams
- Created Tableau visualizations highlighting treatment sequencing patterns and unmet medical needs, contributing to materials presented to senior stakeholders

Data Analyst - Optum, Hyderabad, India

Jul 2021 – Jul 2023

- Built comprehensive healthcare analytics platform processing 1.2M+ member claims monthly, identifying \$2.3M in cost-saving opportunities through advanced SQL pattern analysis and predictive modeling
- Created executive-level Power BI dashboards tracking critical healthcare KPIs including medical loss ratios, prior authorization approval rates, and member satisfaction scores, enabling real-time operational decisions
- Led cross-functional initiative to standardize EHR data integration from 15+ healthcare systems, reducing data processing time by 60% and improving care coordination for 50,000+ high-risk patients
- Conducted population health analytics identifying diabetic members at risk for complications, resulting in targeted interventions that reduced hospital readmissions by 18% and saved \$800K annually
- Implemented HEDIS quality measure tracking system ensuring CMS Star Rating compliance, supporting \$5M in Medicare Advantage bonus payments through accurate performance reporting
- Collaborated with clinical teams to develop risk stratification models for chronic disease management, improving care management efficiency by 35% and member health outcomes
- Streamlined regulatory reporting processes through automated Python scripts, reducing manual effort by 65% while ensuring 100% compliance with CMS and state insurance requirements

EDUCATION

Grand Valley State University, Grand Rapids, MI

M.S. in Health Informatics

GPA: 3.4 | Aug 2023 – Dec 2025

Coursework: Electronic Health Records, Applied Biostatistics, Healthcare Data Mining, Health Informatics, Health Data Visualization, Molecular Biotechnology

Vignan Foundation for Science, Technology and Research, Guntur, India

B.Tech in Biotechnology

GPA: 3.6 | Jul 2018 – Sep 2022

Coursework: Molecular Genetics, Immunology, Bioinformatics, Cell Biology, Scientific Research Methods, Biopharmaceutical Production

PROJECTS

Healthcare Utilization Predictive Model

- Developed machine learning model using Python and scikit-learn to predict high-cost healthcare utilizers, achieving 85% accuracy and enabling proactive care management interventions that reduced costs by 12%

Medicare Advantage Quality Metrics Dashboard

- Built real-time Tableau dashboard tracking HEDIS measures and Star Ratings performance, supporting quality improvement initiatives that improved overall rating from 3.5 to 4.2 stars

Alzheimer's Risk Analysis (CDC Data)

- Analyzed 6 years of CDC Alzheimer's data using R and advanced statistical methods, applying logistic regression to predict high-risk populations and created actionable public health recommendations

COVID-19 Healthcare Impact Analysis

- Conducted comprehensive trend analysis on RT-PCR test results and hospitalization patterns using SQL and Tableau, building real-time dashboards that optimized resource allocation during pandemic response

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
- Google Cloud Certifications: Data-Driven Decision Making
- GCP for Clinical Trials with Investigational Drugs and Biologics (ICH Focus)
- GCP for Clinical Trials with Investigational Drugs and Medical Devices (U.S. FDA Focus)
- HSR – Biomedical Researchers (Human Subjects Research)
- CITI Program: Good Clinical Practice (GCP)
