Professional Experience

SAS INFO INC. | Charlotte, NC | Feb 2022 - Dec 2024

Worked as a Data Engineer supporting multiple enterprise clients across finance and healthcare sectors.

Client: Capital One (Aug 2024 - Dec 2024)

- Implemented and maintained scalable AWS-based data pipelines using Glue, Lambda, S3, and Redshift to enable more reliable access to business-critical data used by 5 analytics teams across 12 business units.
- Developed and optimized data models and ETL/ELT workflows, reducing average query time from 45 minutes to 15 minutes and delivering data to 10 reporting dashboards.
- Orchestrated Glue and Lambda jobs using AWS Step Functions and implemented CloudWatch monitoring to track pipeline performance and debug errors.

Client: Thrivent Financial (April 2023 - June 2024)

- Collaborated with 4 external vendors to validate integrations and ensure secure, successful connectivity between Thrivent's cloud environment and vendor platforms, supporting 6 critical business applications.
- Automated 15+ manual request workflows using Python-based RPA solutions, reducing repetitive tasks from 120 per week to 30 and significantly improving process efficiency.
- Designed 8 Power BI dashboards and 12 analytics reports to extract insights from system log data, enabling monitoring of 20+ key system metrics and faster issue resolution.

Client: UHG, MN (Oct 2022 - Feb 2023)

- Engineered and maintained AWS Glue and PySpark ETL pipelines processing 10M+ healthcare records daily across 5 environments, improving data availability and reliability.
- Integrated PostgreSQL, Snowflake, and CRM/ERP data sources, optimizing query performance and streamlining cross-system analytics.
- Built Power BI dashboards with DAX to visualize 20+ key metrics, enhancing operational insights for 6+ business teams and reducing report turnaround time from several hours to under one hour.

Client: Capital One (Mar 2022 - Aug 2022)

- Successfully led a team of 9 data engineers in a disaster recovery initiative, developing Python scripts and overseeing QA testing through Jenkins pipelines across QA and production environments using SQL.
- Automated configuration updates by converting 30+ YAML files to JSON, streamlining data processing workflows and significantly reducing turnaround time from 4 hours to 30 min per batch.
- Collaborated with 3 finance teams to understand and automate 10+ ledger and reconciliation processes, improving accuracy and operational efficiency in financial reporting and cutting manual effort from 50 tasks per month to 15.

Peanut Butter Inc. | Chicago, IL

Financial Analyst | March 2021 - Jan 2022

- Analyzed financial operations data across 3 sub processes to identify process inefficiencies and introduced 2 automation-focused solutions, driving adoption of data-driven process improvements.
- Streamlined 20 invoicing, collections, and reporting workflows through Excel macros and basic Python scripts reducing reporting time from 10 hours per week to 3 hours and improving data accuracy.
- Partnered with 4 cross-functional and technical teams to optimize treasury management and payment systems, gaining exposure to IT-led financial automation initiatives.

Valparaiso University, IN

Independent Research & Research Assistant | May 2020 - Jan 2021

- Led an independent research project analyzing the impact of financial barriers on trade and productivity using SAS for data cleaning, regression modeling, and report generation, earning recognition at the university's Research Symposium.

Technical Skills

Skills: Programming & Data Analysis, Data Visualization, Cloud Platforms, Big Data & Data Engineering, CI/CD & Orchestration

Tools/Technologies: Python, SQL, Power BI, Tableau, AWS, Snowflake, Databricks, Apache Airflow, PySpark, Jenkins, Kubernetes

Education

- **Thomas More University, KY** – Professional MBA | June 2024 – Nov 2025
- **Valparaiso University, IN** – MS in International Economics & Finance | Jan 2020 – May 2021
- **Valparaiso University, IN** – Applied Econometrics & Data Science Foundations using SAS | Jan 2020 – May 2021
- **Guru Gobind Singh Indraprastha University, India** – BBA | Aug 2016 – May 2019
