

Bhawani Shankar Dhawal

Jaipur, Rajasthan | bsdhawal797645@gmail.com | 79764 51687 | LinkedIn | GitHub | LeetCode

Professional Summary

Machine Learning Engineer & Software Developer with quantifiable experience building ML models achieving **93% accuracy**, real-time mobile applications & NLP automation systems delivering **85% efficiency** improvements. Proficient in Python, Flutter, Firebase, and TensorFlow. Successfully mentored **200+ undergraduates** while developing scalable AI-driven solutions for enterprise applications.

Education

B.Tech in Computer Science & Engineering

May 2025

Indian Institute of Information Technology Raichur

- **Relevant Coursework:** Algorithms, Data Structures, DBMS, Machine Learning, Deep Learning with Graphs, Cybersecurity, Data Analytics, IoT, Embedded System, Operating Systems, Computer Networks.

Work Experience

AI Engineer Intern | Spiderweb Technologies

Jul 2025 - Present

- Architected Python-based Chatbot Agent with MongoDB database integration, RESTful APIs, analyzing 50+ AI models and market trends to automate user interactions, reducing response time by 20% & enhancing system performance through real-time data retrieval solutions serving 500+ daily users.

Teaching Assistant | IIIT Raichur

Aug 2023 - Dec 2023

- Instructed 200+ students in Design & Analysis of Algorithms through hands-on sessions and spearheaded workshops, boosting lab completion rate by 25% via optimized C/C++ labs focused on syntax, logic building, debugging proficiency.

Skills

- **Programming Languages:** Python, SQL, Java, Dart, C++, C
- **Libraries & Frameworks:** Flask, TensorFlow, PyTorch, scikit-learn, Keras, Pandas, NLTK, BioPython, Transformers, Firebase, System Design, FastAPI, RESTful API
- **Core Areas:** Machine Learning, Data Analysis, Deep Learning, Natural Language Processing, Database Design
- **Tools & Technologies:** Git/GitHub, Firebase, Firestore, Linux, MySQL, MongoDB, MATLAB

Projects

Protein-Protein Interaction (PPI) Prediction

- Engineered Random Forest, SVM (RBF) & KNN models to predict protein interactions on Park-Marcotte dataset containing 100k+ samples.
- Achieved **90% accuracy** using 5-fold cross-validation and extracted biological sequence features for insights

Coupon Buying and Selling Platform

- Architected Flutter app for secure buying-selling of coupons with **Firebase** Auth & **Firestore** for real-time data.
- Optimized **<1s** backend response time via **FastAPI**.

Chatbot for Restaurant

- Built intelligent NLP chatbot leveraging TensorFlow to automate the restaurant ordering process, eliminating **85%** of manual effort.
- Delivered **90%+ accuracy** in intent recognition and natural language processing across 50+ menu categories.

Leadership & Extracurricular Activities

- **School President:** Spearheaded student council initiatives, managed events, and represented 900+ students & facilitated communication between faculty and the student body.
- **College Cultural Team Head:** Directed a 15-member team for annual fests and intercollegiate events and executed 10+ large-scale events with great participation from 500+ students.
