PROFESSIONAL SUMMARY

Full Stack Developer experienced in building scalable, high-performance applications **using** Java Spring Boot, Node.js, **and** React.js. **Passionate about delivering** cloud-native solutions **on** AWS, **optimizing** performance, **and implementing** real-time data pipelines **with** Kafka. **Skilled in designing** microservices **and solving** complex problems **with clean**, production-ready code.

EDUCATION

Cleveland State University

Master of Science in Computer Science (GPA: 3.79 / 4.00)

January 2023 – December 2024

Cleveland, OH, USA

Osmania University

MBA in Marketing (GPA: 7.0 / 10.0)

June 2019 – May 2021

Telangana, TG, INDIA

JNTUH

Bachelor's in Computer Science (GPA: 7.0 / 10.0)

June 2015 – May 2019

Telangana, TG, INDIA

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Typescript, python, SQL, NoSQL, HTML, CSS

Web Development: ReactJs, AngularJS, NextJs, NodeJs, Vue, Flask, Django, Spring Boot, Tailwind

Technologies / Tools: Amazon Web Service (AWS), Git, Postman, Docker, Kubernetes, Jenkins, Jest, JUnit, Jira, VS Code, Figma, Linux, SAP

EXPERIENCE

Full Stack Developer

Equiply Tech

Feb 2025 – Current

Seattle, WA, USA

- Developed **dynamic filter functionalities** in the **client management system**, improving **data retrieval speed by 40%** and enabling efficient **searching, sorting, and categorizing** of client records.
- Built a **soft delete feature** using **mongoose-delete** and **custom APIs**, improving **data safety** and reducing **recovery time** from **accidental deletions**.
- Implemented **real-time client updates** using **WebSockets**, reducing **UI load times** and enhancing **user interaction by 35%**.
- Designed and developed an interactive **dashboard** to visualize **medical equipment lifecycle**, showcasing **total equipment count, usage status, and upcoming expirations**, resulting in a **30% reduction in critical equipment downtime**.

Full stack Developer

Tata Consultancy Services

September 2019 – January 2023

Hyderabad, MH, INDIA

- Developed **scalable frontend** using **React, Redux, TypeScript, and Tailwind CSS**, with **Jest** for test coverage, improving **development speed and scalability by 20%**.
- Integrated **Google Tag Manager** and **Google OAuth API** to track **user behavior** and support **data-driven decision-making** with detailed analytics.
- Built **data-rich dashboards** with **RESTful API integration** and **infinite scroll**, optimizing data fetching for better user experience, performance.
- Integrated **Stripe** and **Paytm APIs** for **seamless payments**, leveraging **Redis** to enhance **transaction security** and ensure **reliable payments**.
- Optimized **TypeScript** and **Angular components** with **memorization** and **lazy-loading**, boosting **page performance** and **SEO rankings by 150%**.
- Built a **config-based, API-driven frontend architecture** to streamline **module deployment**, boosting efficiency and driving **41% revenue growth**.
- Enhanced speed and reduced **page load time by 3 seconds** by optimizing **API calls, SQL queries, and implementing table partitioning**.
- Integrated **Apache Kafka** for **real-time event streaming** and **message processing**, enabling seamless **data flow between microservices** and improving **system scalability**.
- Managed servers for 4 projects and executed a robust CI/CD pipeline using AWS CodePipeline, enabling** continuous integration **and** deployment.

Graduate Assistant

Cleveland State University

August 2023 – May 2024

Cleveland, OH, USA

- Contributed to **academic research** by **co-authoring** and **refining chapters** for a **book**, ensuring **clarity, accuracy, and structured content**.
- Conducted **data analysis** for research projects, deriving valuable **insights** and supporting **data-driven conclusions** for academic studies. Designed and implemented **surveys and experiments**, facilitating effective **data collection** and enhancing **research methodologies**.

PROJECTS

Netflix-GPT (*React, Redux, OpenAI, Tailwind, Google Firebase CLI*)

May 2024

- Developed a movie recommendation system by integrating the OpenAI Web API and managing state with Redux for best performance and rendering.
- Gained proficiency in integrating AI-based APIs and optimizing application state management using Redux for scalable, real-time data processing.

Flex Sensor-Based Glove for Deaf and Mute (*Arduino, C++, HTML, CSS*)

May 2023

- Designed and built a gesture-recognition glove using flex sensors to convert hand movements into digital signals with 90% accuracy, enabling seamless communication for users with speech impairments.
- Integrated real-time wireless data transmission, enhancing system responsiveness by 25% and ensuring faster, more reliable interactions.

Namaste YouTube - YouTube Replica (*React, Parcel, Scss*)

April 2023

- Recreated YouTube's live chat, N-level nested comments, and search optimization, enhancing skills in real-time communication and data structuring.
- Gained expertise in building real-time chat systems, implementing complex nested data structures, and optimizing search algorithms for web apps.

ACHIEVEMENTS

- Won first place** in a highly competitive **Hackathon**, showcasing advanced coding skills, creativity, and teamwork to develop an impactful Solution.
- Won third prize** in a **Hackathon** at Cleveland State University, showcasing creativity and teamwork in solving complex challenges.
