PROFESSIONAL SUMMARY

Highly analytical and results-driven **Healthcare data analyst** with over three years of experience in the U.S., I excel at transforming complex data into strategic insights that drive improved patient outcomes and operational efficiency. My expertise includes leveraging cutting-edge healthcare data systems, ensuring rigorous regulatory compliance, and utilizing advanced data visualization techniques to empower data-driven decision-making. I have a proven track record of uncovering key trends and delivering actionable insights that enhance both clinical and administrative performance. Known for my collaborative approach, I work seamlessly across multidisciplinary teams to deliver solutions that exceed organizational goals and optimize healthcare operations. Actively seeking opportunities in **Data Analytics, Healthcare Data Analysis, or Business Intelligence roles**, where I can apply my expertise to make a measurable impact on healthcare systems and patient care.

SKILLS

- **Data Visualization Tools:** Tableau, Power BI, and Google Data Studio
 - **Healthcare Systems:** Epic, Cerner, and Allscripts
 - **Techniques:** Data Cleaning, Predictive Modeling, Statistical Analysis, and Machine Learning
- **Regulatory knowledge:** HIPAA compliance, ICD-10 coding
 - **Other tools:** Excel (advanced), Microsoft Office Suite, Git
 - **Programming languages:** Python, R, SQL

WORK EXPERIENCE

- Healthcare Data Analyst**

01/2024 to Current

Get Hire Technologies Inc. / Kaiser Permanente

Atlanta, GA
- Analyze patient data from Epic EHR systems to drive improvements in healthcare outcomes. By leveraging data insights, I contribute to reducing readmission rates. This effort results in a 15% decrease in readmissions, enhancing overall patient care.
- Ensure HIPAA compliance in handling sensitive data, safeguarding patient privacy, and promoting secure data governance. This commitment enhances data security and fosters trust within healthcare operations and my efforts support the efficient and responsible management of healthcare information.
 - Develop SQL queries to efficiently extract and clean data, ensuring high-quality insights for healthcare reporting. These processes guarantee accurate, actionable data for informed decision-making.
 - Design interactive dashboards in Tableau and Power BI to track key performance indicators (KPIs). These dashboards empower executives with real-time insights, improving strategic decision-making, and the visualizations help drive data-driven actions for better business outcomes.
 - Automate reporting workflows using Python, streamlining processes, and reducing manual effort by 40%. This automation boosts efficiency and allows for faster, more accurate reporting. As a result, teams can focus on strategic tasks rather than time-consuming, manual work.
 - Collaborate with multidisciplinary teams to evaluate and optimize treatment plans, resulting in a 20% improvement in patient satisfaction. This teamwork ensures more personalized and effective care, and the optimized plans contribute to better patient outcomes and an enhanced overall experience.

- Conduct statistical analysis of patient demographics to support targeted care initiatives, and inform funding proposals. This analysis helps identify key trends and optimize resource allocation.

Junior Healthcare Data Analyst 01/2023 to 12/2023 Get Hire Technologies Inc. / Med Insight Seattle, WA

Leveraged hospital operational data to achieve a 15% cost reduction by identifying inefficiencies and optimizing workflows. My analysis led to improved resource allocation and streamlined processes. This strategic approach resulted in enhanced operational efficiency and significant cost savings.

- Led data migration projects, ensuring seamless transitions while maintaining data integrity. My efforts facilitated smooth system integrations, and minimized disruptions. This approach guaranteed accurate and reliable data transfer throughout the process.
- Collaborated with IT teams to optimize data storage and retrieval processes, enhancing system performance. This improvement resulted in faster data access and more efficient operations.
- Performed quality assurance checks on datasets, improving metric accuracy by 25%. My thorough evaluations ensured data reliability and consistency. This contributed to more precise insights and better decision-making processes.
- Produced comprehensive reports for executives, offering actionable insights into care quality and operational performance. These reports guided key decision-making and contributed to improved hospital management.
- Streamlined data reporting workflows by refining key performance indicators (KPIs) in collaboration with stakeholders. This refinement led to more efficient, and accurate reporting processes.
- Created Excel-based models to forecast patient admission trends, supporting efficient resource planning. These models provided actionable insights for optimizing hospital operations. The forecasts played a crucial role in streamlining staffing and resource allocation.

Healthcare Data Analyst Intern 08/2022 to 12/2022 Well Care Solutions San Francisco, CA

Developed compelling Google Data Studio visualizations that effectively showcased patient feedback and service utilization trends, driving data-informed decision-making, and strategic improvements.

- Performed exploratory data analysis (EDA) on patient satisfaction surveys, uncovering key insights, and identified critical areas for service enhancement based on data-driven trends.
- Delivered actionable insights in cross-departmental meetings, fostering collaboration, and driving enhancements in patient care delivery.
- Thoroughly captured end-to-end data workflows to enhance team understanding, ensuring seamless knowledge transfer, and operational continuity.
- Played a key role in developing predictive models using machine learning techniques, successfully identifying high-risk patients, and enabling proactive care strategies.
- Efficiently managed and updated databases containing patient histories, medications, laboratory results, and insurance claims, ensuring data accuracy and accessibility for clinical and administrative use.

Data Analyst / Power BI Developer 01/2020 to 02/2022 Sonata Software India

Drove customer-centric strategies by extracting meaningful insights from complex data. Conducted an in-depth analysis of customer behavior and trends, and enabled measurable improvements in satisfaction and retention through data-driven decisions.

- Designed and developed interactive Power BI dashboards, turning complex data into actionable insights to boost operational efficiency, and support strategic decision-making.
- Identified and resolved critical SAP system errors, resulting in a 30% improvement in system performance and reliability.
- Crafted dynamic Power BI dashboards that transformed data into actionable insights, enhancing operational performance, and enabling data-driven decision-making.
- Spearheaded the automation of data workflows, driving substantial improvements in operational efficiency, and streamlining critical business processes.

- Engineered custom Power BI dashboards that delivered real-time, actionable insights, transforming decisionmaking, and fueling business growth.

Data Analyst 07/2017 to 12/2019 Plaxonic Technology India

Performed extensive data profiling to identify and resolve inconsistencies across multiple source systems, and led data cleansing and transformation processes, ensuring the accuracy and completeness of critical business data.

- Generated comprehensive reports and collected data to develop in-depth analytics on key performance indicators, and operational metrics.
- Developed interactive Power BI reports featuring diverse visualizations to convey complex insights clearly, tailored visual elements to enhance data storytelling, and support strategic decision-making.
- Empowered leadership, with data-driven decision-making, results in improved performance and strategic growth.
- Succeeded in automating data parsing processes using Python scripts to efficiently extract and load data, streamline data workflows, reduce manual effort, and ensure faster data processing.
- Assisted in tracking, evaluating, and reporting on the impact of various programs by utilizing multiple data sources. Collaborated with cross-functional teams to gather and analyze data, ensuring accurate insights into program effectiveness.

Activities and Honors

Key Projects

- Patient Outcome Prediction Model
- Built a predictive model in Python to forecast patient recovery times, achieving 85% accuracy
- Collaborated with clinicians to adjust care plans, improving recovery rates

Hospital Readmission Dashboard

- Designed a Tableau dashboard to monitor and reduce hospital readmission rates
- Integrated departmental data to create real-time alerts, reducing 30-day readmission rates by 12%

User Management system

- Led the full-cycle development of a service scheduling system, applying system analysis principles and modern DevOps practices including CI/CD with GitHub Actions, Docker deployment, automated testing, and collaborative development using Python (FastAPI) and Git.

EDUCATION

Bachelor of Science: Computer Science Engineering	05/2017
MBICT, GTU University, School of Engineering	Anand, India

Master of Science in Information System	
NJIT, University, New jersey, USA	01/2025

CERTIFICATIONS

-
- Certified Health Data Analyst
 - Google Data Analytics Professional Certificate – Coursera (08/2021)
 - Tableau Desktop Specialist Certification – Tableau (03/2022)
 - Google Certificates: Data Foundations, Data Exploration (Ongoing – 2023–2024)
 - Complete Data Science Bootcamp – 365 Careers (03/2022)
 - Java Programming Masterclass – Udemy (02/2022)
-

ACCOMPLISHMENTS

Key Achievements

- Reduced hospital inefficiencies, saving over \$500,000 annually
- Improved patient satisfaction scores through data-driven care strategies
- Automated reporting systems reduce time by 40%
- Led telehealth integration projects, achieving a 20% improvement in patient satisfaction
