

Ram Bhupal

Charlotte, NC|+1(704)-420-9480| bhuapln23@gmail.com |[Linkedin](#)

EDUCATION

University Of North Carolina, Charlotte (CGPA-3.8/4.0)

- Master of Science, Information Technology
- Dec 2024

VIT University- Chennai, India

- Bachelor of Technology, Electronics and Communications

WORK EXPERIENCE

University of North Carolina, Charlotte

Aug 2023 - Dec 2024

Data Analyst

- Designed Power BI visualizations that turned raw data into clear insights, speeding up campus decisionmaking by 20%.
- Analyzed large datasets with Python and R to identify trends, improving data retrieval efficiency by 25% for reporting needs.
- Optimized SQL queries as part of database management, ensuring smooth performance for complex analytical workloads.
- Engineered ETL pipelines using Databricks and Azure Data Factory, which increased processing speed by 30% for large datasets.
- Enforced data governance within Azure, securing sensitive information to meet privacy and compliance standards.
- Delivered tailored Power BI reports after collaborating with stakeholders, making complex findings accessible to non-technical teams.
- Automated repetitive workflows with Apache Airflow, reducing manual effort by 40% and freeing time for analysis.

Wipro Limited, Chennai, IN

Apr 2022 – Jun 2023

Data Engineer

- Designed and developed ETL pipelines using AWS Glue and PySpark, improving data processing efficiency by 30%.
- Optimized complex SQL queries for faster data retrieval, reducing execution time by 25% and cutting processing costs.
- Built and managed real-time data processing workflows with Amazon Kinesis and Azure Logic Apps, enhancing operational efficiency by 20%.
- Implemented data governance frameworks with Azure Intune, ensuring compliance and data consistency.
- Developed data quality monitoring using validation checks and anomaly detection, reducing inconsistencies by 15%.
- Actively contributed to Agile Scrum sprints, participating in daily stand-ups, sprint planning, and retrospectives to enhance delivery timelines.

- Collaborated with data scientists and analysts to define business data requirements, creating a roadmap for scalable data solutions.

EDGEROCK SOFTWARE SOLUTIONS, HYDERABAD, IN

Apr 2021 – Mar 2022

Data Analyst

- Developed Power BI visuals to break down complex data, providing actionable insights that supported business partner decisions.
- Performed trend analysis using SQL and R, identifying inefficiencies that cut preprocessing time by 15% for the team.
- Processed raw data with Azure Data Factory, ensuring clean, accurate inputs for reporting and analytics tasks.
- Produced Power BI reports under tight schedules, collaborating with clients to meet their specific project needs.
- Enhanced data collection processes by suggesting improvements, lifting overall workflow efficiency by 10%.
- Applied cybersecurity principles during data handling, securing information to pass audits with full compliance.
- Updated SQL databases regularly, keeping operational reporting tools consistent and reliable for the team

EDGEROCK SOFTWARE SOLUTIONS, HYDERABAD, IN

Software Engineer Intern

Sep 2020 - Mar 2021

- Assisted in building **Power BI** visualizations, helping the team meet report deadlines with early contributions.
- Cleaned data using **Python** and **SQL** scripts, improving project quality by 10% during initial stages.
- Supported **Azure**-based ETL workflows, learning to transform data effectively under senior guidance.
- Explored **machine learning** concepts in **Python**, testing basic clustering to understand data patterns.

SKILLS

- **Data Visualization & Reporting:** Power BI, Tableau, Amazon Quick Sight
- **Programming & Analysis:** Python (Pandas, NumPy), R, SQL (Query Tuning)
- **Data Engineering Tools:** Databricks, Azure Data Factory, PySpark, Apache Airflow, AWS Glue
- **Cloud & Databases:** Azure (Data Lake, Intune), AWS (S3, Redshift), MySQL, Snowflake
- **Governance & Optimization:** Data Privacy, Cybersecurity Basics, Pipeline Efficiency
- **Methodologies:** Agile (Scrum), Multitasking, Process Improvement

PROJECTS

Sales Forecasting & Data Insights

- Engineered an ETL pipeline with Databricks and Azure, cutting processing time by 20%.
- Visualized sales trends in Power BI, enabling quick insights for planning efforts.
- Optimized SQL queries, enhancing database performance for faster reporting.

Customer Segmentation & Analytics

- Processed real-time data with Azure and PySpark, delivering instant customer insights.
- Segmented data using Power BI visuals, refining strategies with R analysis.

- Managed SQL datasets, ensuring smooth operations for segmentation tasks.
