

BHUPAL

Python Developer | AI/ML Solutions | Web Applications

3025999231 • shotobhupal@gmail.com • <https://www.linkedin.com/in/bhupal-reddy-tirumalareddy-a083a937b> • Delaware

Summary

Python Developer with over 5 years of comprehensive experience in AI and machine learning, specializing in Generative AI, LLMs, and scalable cloud-based solutions. Proven expertise in designing and deploying robust AI applications utilizing Python frameworks, Azure OpenAI, AWS, and advanced NLP techniques to drive intelligent automation and optimize business processes. Recognized for innovative problem-solving, patent contributions, and leadership in AI initiatives, seeking to leverage deep technical skills in a dynamic environment focused on cutting-edge AI solutions.

Experience

CVS Health

Remote

Python/ AI Developer

05/2024 - Present

Company Description

- Improved REST APIs and migrated Flask microservices to Django for fintech and healthcare platforms, enhancing performance and maintainability.
- Engineered NLP models and pipelines using Spacy, NLTK, and Hugging Face models for tasks such as sentiment analysis, text summarization, and clinical note processing.
- Built Generative and Agentic AI virtual assistants with OpenAI GPT-4 and LangChain for real-time healthcare guidance, and designed AI-powered NLP solutions.
- Executed computerized unit tests with pytest and frameworks to ensure machine learning model reliability, and constructed Deep Learning models with BERT and Transformers.
- Created ETL pipelines with Apache Airflow, automating data processes and transforming over 10 million records monthly in Pandas and PostgreSQL.
- Leveraged AWS Cloud services to host and scale applications, ensuring security and high availability, and integrated enterprise data with RAG pipelines for context-aware responses.
- Utilized machine learning frameworks and services, including CICD, AWS EC2, and other technologies, to support extensive NLP and machine learning tasks.

US Bank

TX

Python Developer

06/2023 - 03/2024

Company Description

- Planned, developed, and deployed full-stack applications using React.js and Flask APIs, enhancing customer-facing financial platforms.
- Optimized backend performance by restructuring database schemas, reducing load times and improving query speeds.
- Configured and automated AWS services using Boto, EC2, and S3, supporting cloud infrastructure and application deployment.
- Executed CI/CD pipelines and systematized build processes with Docker and GitHub Actions, reducing release cycle time.
- Built reusable React components to create intuitive user interfaces and improved frontend performance.
- Enhanced application security by implementing JWT-based authentication across multiple services.
- United with product teams to design API contracts ensuring seamless third-party service integration.

OriginIT.Sol

India

Software Application Developer

07/2021 - 06/2022

Company Description

- Worked together in the development of a large-scale healthcare data acquisition platform, collecting data from over 70,000 doctors through automated scraping and integration with third-party APIs
- Enforced and implemented ETL pipelines to clean, transform, and organize unstructured healthcare datasets, making them analysis-ready for reporting and research
- Built and deployed automation scripts in Python that streamlined repetitive manual tasks, improving operational efficiency across multiple teams
- Improved and expanded interactive analytics dashboards with Power BI, Highcharts.js, and Looker Studio, empowering stakeholders to monitor healthcare trends and key metrics
- Built and trained chatbots using Dialogflow to automate customer support queries, reducing response times and enhancing client engagement
- Collaborated with business analysts and healthcare clients to gather requirements and translate them into technical specifications
- Created Python-based data cleaning modules that standardized inconsistent healthcare data, reducing errors and improving the quality of insights delivered

Experience

ShanSoftechSol	India
Software Developer	09/2019 - 06/2021

- Company Description
- Developed and maintained scalable, reliable backend applications using Django and SQL for high availability in production environments.
 - Designed and implemented RESTful APIs to enable seamless integration between backend systems and client-facing applications.
 - Enhanced frontend functionality with dynamic interfaces using HTML, CSS, JavaScript, and AJAX, improving user responsiveness and interactivity.
 - Ensured smooth backend-frontend communication by working with AJAX frameworks to transform datasets and serialize data into JSON.
 - Performed Django schema migrations and manual SQL modifications with zero downtime, preserving data integrity and ensuring continuous service availability.
 - Collaborated with UI/UX teams to deliver optimized user interfaces that align technical designs with business requirements.
 - Assisted in debugging, performance tuning, and troubleshooting production issues, minimizing downtime and enhancing user satisfaction.

Education

Wilmington University	New Castle, DE
Masters in Information Systems	08/2022 - 05/2024
Nalanda institute of engineering and technology	Guntur, IND
Bachelors of Technology in Information Technology	09/2016 - 05/2020
