

Bhuvana Chandra

Full Stack Developer

CONTACT

Email: Bhuvan3246@gmail.com

Phone: +1 (978) 699-4898

Location: Fitchburg, Massachusetts, 01420

LinkedIn: www.linkedin.com/in/bhuvan

SKILLS

- **Languages & Frameworks:**
Java, Core Java, Spring Boot, Spring MVC, Spring Batch, J2EE, Node.js, React.js, Angular, Express.js, JPA, JSP, Servlets
- **Testing & QA:**
JUnit, TestNG, Cucumber, Selenium, Cypress, Mocha, Jasmine, Karma, Mockito, Postman
- **Cloud & DevOps:**
AWS (ECS, EC2, S3, API Gateway, Lambda, Aurora, CloudWatch, Route 53, ALB), Docker, Kubernetes, Jenkins, GitHub Actions, Terraform (basic), ELB
- **Build & CI/CD Tools:**
Maven, Gradle, Jenkins, Bitbucket Pipelines, GitLab CI/CD, Nexus Repository Manager
- **Databases & ORM:**
MongoDB, Amazon Aurora, MySQL, PostgreSQL, Oracle DB, Hibernate, Mongoose
- **Version Control:**
Git, GitHub, Bitbucket, SVN
- **Monitoring & Logging:**
Splunk, AWS CloudWatch, ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana
- **Agile & Collaboration Tools:**
JIRA, Confluence, Trello, Slack, MS Teams, Zoom
- **Other Tools & Technologies:**
RESTful APIs, SOAP, JWT, OAuth2, Swagger/OpenAPI, JSON, XML, Nginx, Apache Tomcat, IntelliJ IDEA, Visual Studio Code, Eclipse

CERTIFICATIONS

- [AWS Certified Developer – Associate](#)

EDUCATION

MASTER OF SCIENCE IN COMPUTER SCIENCE
FITCHBURG STATE UNIVERSITY, MA, USA
SEP 2022 – DEC 2023

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE & ENGINEERING
LOVELY PROFESSIONAL UNIVERSITY, PUNJAB, INDIA
AUG 2017 – APR 2021

PROFILE

Java Full Stack Developer with over 4 years of experience in designing and delivering robust, scalable web applications and microservices. Adept at leveraging cloud platforms and automation tools to enhance reliability and streamline deployment processes. Strong collaborator with a proven ability to improve system performance, security, and user experience in fast-paced Agile environments.

EXPERIENCE

JAVA FULL STACK DEVELOPER, DOUBLENE, USA JUN 2023 – PRESENT

- Developed RESTful microservices using Spring Boot, enhancing modularity and reducing response time by 30%, which improved user experience during peak traffic hours.
- Wrote unit and integration tests using JUnit, increasing test coverage from 60% to 90% and cutting manual QA efforts by 40% across the release cycle.
- Deployed applications using Amazon ECS, ensuring high availability and achieving 99.99% uptime, supporting seamless user access and performance across scalable microservices in production.
- Built CI/CD pipelines with Jenkins, reducing deployment time by 50% and ensuring faster, error-free rollouts across multiple environments with automated build and release processes.
- Configured AWS S3 for optimized file storage, reducing large file retrieval times by 25% and improving data availability and access speed for users and applications.
- Managed production deployments using Kubernetes, enabling zero-downtime updates and improving deployment reliability by 60% through container orchestration and streamlined service management.
- Monitored application logs with Splunk, identifying and resolving critical issues in real-time, which improved overall system stability and reduced incident resolution time by 35%.

MEAN STACK DEVELOPER, TECHECY, INDIA JAN 2020 – JUN 2022

- Developed full-stack applications using the MERN/MEAN stack (MongoDB, Express.js, React/Angular, Node.js) and Java Spring Boot, supporting over 15,000 concurrent users and improving system responsiveness by 40%.
- Designed responsive frontends with React.js, cutting initial load times by 35% and increasing user engagement by 25%.
- Created and deployed automated tests using Selenium, Cypress, TestNG, and JUnit, increasing code coverage from 50% to 85% and reducing QA testing time by 40%.
- Integrated RESTful APIs using Express.js and Java Spring Boot to improve data flow, enhance performance, and reduce server response times by up to 30%.
- Utilized MongoDB with Mongoose for schema design and refined queries, achieving a 30% faster data retrieval and handling a 20% increase in data volume without performance loss.
- Implemented secure authentication and authorization with JWT in Node.js and Java, managing over 7,000 daily logins and reducing unauthorized access by 90%.
- Collaborated in Agile/Scrum teams using Git for version control, delivering MEAN/MERN and Java-based features on a bi-weekly sprint schedule, contributing to 100% on-time release rate for 6 consecutive quarters.

PROJECTS

EMPLOYEE MANAGEMENT SYSTEM

- Created an employee management system that cut manual HR tasks by 40%, Accelerated data retrieval speed by 25%, and increased user adoption rates by 35%.

E-COMMERCE WEB APPLICATION

- Built a scalable e-commerce platform that enhanced transaction efficiency by 25% and increased transaction success rates by 15% through optimized APIs and secure payment integration.
