

SUMMARY

Data Analyst with 4+ years of experience designing and optimizing end-to-end ETL pipelines, data models, and dashboards that drive data-informed decision-making in healthcare and SaaS environments. Proficient in SQL, Python, Power BI, and Tableau to extract, transform, and visualize complex data from diverse systems, ensuring high accuracy and actionable insights. Skilled in statistical analysis, machine learning, and NLP to solve business problems like demand forecasting, customer segmentation, and text classification. Strong collaborator with product, engineering, and business teams to gather requirements, translate them into technical solutions, and deliver analytics features in Agile environments. Experienced in cloud platforms (AWS, GCP), data warehousing, and compliance with HIPAA and data privacy standards. Adept at simplifying complex data narratives for stakeholders to support strategy, operations, and growth initiatives.

TECHNICAL SKILLS

Methodologies: Agile (Scrum), Waterfall, SDLC
Data Analysis & Statistical Techniques: Exploratory Data Analysis (EDA), Descriptive & Inferential Statistics, Hypothesis Testing, ANOVA, Regression Analysis, Statistical Modeling, Data Mining, A/B Testing, Cohort Analysis, Funnel Analysis
Programming & Scripting: Python, SQL, R
Data Wrangling & ETL: ETL Processes, Data Cleaning, Data Transformation, Data Validation, SSIS, Apache Airflow, dbt, Alteryx
Visualization & Reporting Tools: Tableau, Power BI, Looker, Excel Dashboards, Advanced Excel (VLOOKUP, Pivot Tables, Power Query, Macros), SSRS
Machine Learning & NLP: Scikit-learn, TensorFlow, NLTK, K-Means Clustering, Forecasting Models, Text Classification
Cloud & Big Data Platforms: AWS (S3, Redshift), Google Cloud Platform (GCP), Microsoft Azure, Snowflake, Data Warehousing, Data Lakes
Databases: SQL Server, MySQL, PostgreSQL, Oracle, MongoDB
Version Control & Collaboration: Git, GitHub, Jira, Confluence, Trello
Domain & Compliance: Healthcare Analytics, Financial Reporting, Insurance Analytics, Sales & Marketing Analytics, HIPAA, SOX, GDPR (basic understanding), Data Governance, Data Privacy
Project & Process Management: Business Requirements Gathering, Technical Documentation, Executive Presentations, KPI Development, Metric Definition, Cross-functional Collaboration, UAT Testing, Agile Ceremonies
Soft Skills: Analytical Thinking, Problem-Solving, Communication, Time Management, Leadership, Strategy Planning, Decision-Making, Attention to Detail, Documentation and Presentation

PROFESSIONAL EXPERIENCE

Oracle Health (Cerner) – California, USA

- Data Analyst** | Feb 2024 – Present
- Automated data profiling and validation for 100M+ patient and provider records using SQL Server, ensuring 99.8% pre-migration accuracy to the Cerner EHR system.
 - Designed and optimized ETL pipelines with SSIS and AWS Redshift, improving ingestion speed of structured healthcare data (demographics, labs, medications) by 35%.
 - Configured HIPAA-compliant AWS S3 staging areas for HL7 and FHIR files, streamlining cross-platform data integration workflows.
 - Developed Python scripts for anomaly detection and schema validation, reducing QA effort by 40% and increasing data reliability.
 - Created and deployed 20+ interactive Power BI dashboards to track clinical operations, system adoption, and order accuracy, enhancing executive reporting efficiency by 22%.
 - Built normalized ER diagrams and data models for Cerner-aligned modules, ensuring scalable and accurate reporting structures.
 - Analyzed referral processing workflows, uncovering bottlenecks and cutting delays by 17% through SQL-driven insights and workflow redesign.
 - Led post-implementation cohort analyses using Python to measure clinician engagement, driving a 25% increase in EHR usage and a 30% reduction in entry errors.
 - Implemented data encryption and de-identification pipelines, achieving full HIPAA compliance during security audits.
 - Partnered with product, engineering, and clinical teams in Agile sprints, documenting requirements in Confluence and achieving 98% UAT approval for analytics deliverables.

Freshworks – Bangalore, India

- Data Analyst** | Jul 2020 – Dec 2022
- Built complex SQL and Python (Pandas, NumPy) workflows to extract, clean, and integrate 500K+ daily support records, delivering accurate insights to operational teams.
 - Automated ETL processes using SSIS and Apache Airflow, cutting data latency from 6 hours to under 1 hour and improving reporting timeliness.
 - Designed dynamic Power BI dashboards to monitor SLA trends, agent performance, and ticket volumes across regions, reducing manual reporting time by 30%.
 - Developed machine learning models (Scikit-learn) to forecast daily ticket inflow with 92% accuracy, helping align staffing plans and mitigate SLA breaches.

- Applied NLP techniques (NLTK) to classify support tickets, boosting issue categorization accuracy by 35% and cutting manual triage time by 75%.
- Conducted A/B testing on escalation workflows, analyzing 30K+ interactions and reducing critical resolution time by 28%.
- Performed segmentation using K-Means clustering to identify high-impact customer accounts, decreasing repeat ticket creation by 17%.
- Integrated Freshconnect and Zendesk data to unify customer histories, identifying a 15% resolution delay and driving process improvements.
- Built custom Python-based data validation routines, improving SLA and CSAT reporting accuracy by 40%.
- Delivered weekly executive reports and visual insights, contributing to a rise in CSAT from 82% to 90% over six months.
- Collaborated cross-functionally to refine chatbot logic and optimize support processes, improving self-service resolution rates by 22%.

PROJECTS

- Accidents to Insights: Driving LA County**

- Identified key infrastructure-related accident clusters across LA County by performing spatial EDA on the US Accidents dataset using GeoPandas and Folium, and clarified risk factors using Llama with prompt-engineered XAI outputs.**Tech Stack Used: Python, Folium, LLMs, Explainable AI**

Jan 2025
- Visualizing Opioid Overdose Risk Across U.S. Counties**

- Improved public health visibility into overdose patterns by building a multi-layered Tableau dashboard that integrated county-level geospatial data with model-predicted opioid overdose risk scores.**Tech Stack Used: Python, Tableau, Public Health**

Aug 2024

EDUCATION

- **Master of Science in Data Analytics** - San Jose State University, CA, USA **Jan 2023 – May 2025**
- **Bachelor of Technology in Electronics and Communication Engineering** - REVA University. BA, India **Aug 2017 – Jun 2021**
