EDUCATION

Wilfrid Laurier University

BSc in Computer Science & Psychology, Special Minor in Business Management

Waterloo, ON

Sept. 2020 – Dec. 2025

EXPERIENCE

Contract Developer

December 2025 – Present

Frod0

Toronto, ON

- Debug problems in C# code to ensure application is functioning as expected
- Use Azure Document Intelligence to read invoices and research ways to minimize costs of Azure

Software Delivery Analyst Co-op

September 2023 – August 2024

Sun Life Financial

Waterloo, ON

- Managed the end-to-end deployment of changes (in the form of SCCM packages) to the desktop/laptop/VM environment in accordance with software delivery standards, ensuring as little impact to end users as possible
- Ensured all project documentation was fully complete and projects were moved through their workflow (includes change tickets, knowledge solutions, checklists, etc.)
- Provided regular status updates and work collaboratively with a global team
- Analyzed data and created reports for the director of software delivery to improve delivery times
- Led weekly meetings to discuss updates and progress on current issues on the Kanban (Jira) board with the director of software delivery

CAP 2 Department Manager/Associate

May 2022 – May 2023

Walmart Canada

Milton, ON

- Provided direction to Fulfillment Associates by delegating tasks, training, providing coaching, and offering feedback to associates
- Self-driven to create features on the sales floor effectively; features were placed according to the department and by price point, considering seasonal changes and adapting to changes quickly
- Finalized trailers to adjust inventory counts and verify valuable items were received to reduce shrinkage

PROJECTS & PUBLICATIONS

Comparing Crypto and Digital Cash Systems: A Cryptographic Analysis

January 2025

- Published a research article on different cryptographic techniques (AES, SHA-256, Keccak-256) and compared with digital cash systems (Bitcoin, Ethereum, traditional banking systems)
- DOI : 10.36227/techrxiv.173627402.26411980/v1

Donkey Kong Game | *Java, Greenfoot, GitHub*

- Collaborated with a team to build a game where the protagonist must progress through two levels to reach Princess Peach while avoiding barrels being tossed by Donkey Kong
- Responsible to develop background visuals and interaction with the protagonist along with debugging issues regarding the whole projec
- Responsible to debug issues regarding the whole project
