SUMMARY

Versatile Business Analyst skilled at bridging the gap between business vision and technology execution. Known for translating ambiguity into clarity through structured analysis, visual storytelling, and stakeholder alignment. Adept in tools like JIRA, Confluence, SQL, Power BI, SAP, and Salesforce, with a sharp eye for process improvement and data integrity. Brings critical thinking, proactive communication, and a calm, solutions-first approach to fast-paced, cross-functional environments. Trusted to lead with empathy, adapt quickly, and drive outcomes that balance user needs with strategic goals. Certified in PMP and Scrum, with a mindset rooted in ownership, curiosity, and continuous impact.

TECHNICAL SKILLS

Methodology: SDLC, Agile Scrum, Kanban, Waterfall, BPMN, Lean Six Sigma, DevOps Collaboration
Documentation: BRD, FRD, SRS, User Stories, Use Cases, Acceptance Criteria, BPMN Diagrams, Lucidchart Workflows
Tools & Platforms: JIRA, Confluence, HP ALM, MS Project, Power BI, SAP, Salesforce, Snowflake, Microsoft Office Suite
Data Analysis: SQL, Excel (Pivot Tables, VLOOKUP, Power Query), Data Validation, Data Transformation, KPI Tracking
Collaboration: Team Leadership, Stakeholder Management, Change Management, UAT Facilitation, Training & Workshops
Visualization: Dashboards, Reports, Wireframing, Workflow Mapping, Process Flow Diagrams, Storyboarding
Other Skills: Root Cause Analysis, Gap Analysis, Risk Management, Business Process Reengineering, API Understanding, ETL Concepts, Time Series Analysis

EXPERIENCE

NBC Universal, USA <i>Business Analyst</i>	Feb 2024 – Present
- Initiated and scoped over 3 cross-functional finance automation initiatives by collaborating with ad-sales, legal, and billing teams to gather project goals, clarify scope, and align on business priorities. - Created detailed process documentation and mapped workflows for media billing operations including time entry, cross-platform licensing, and talent payments using industry-standard tools to support clear cross-team understanding. - Converted business needs into structured user stories and epics using JIRA, enabling effective sprint planning and traceable backlog items for product and engineering teams in an Agile delivery environment. - Queried and analyzed large datasets from SAP, Salesforce, and Snowflake using SQL and Excel to validate billing accuracy and reduce invoice discrepancies by 12 percent over two quarters. - Built reporting dashboards and collections trackers in Power BI and Excel to highlight trends in late payments and billing delays, improving decision-making for revenue operations leaders. - Supported user acceptance testing and led four user training sessions across finance and operations teams by developing step-by-step user guides in Confluence and facilitating feedback loops during deployment. - Tracked project timelines, milestones, and risk items in MS Project to ensure schedule alignment, stakeholder transparency, and timely delivery of media finance system enhancements.	

Tata Consultancy Services, Dallas, TX <i>Business Analyst</i>	June 2021 – Jan 2024
- Gathered, refined, and documented complex business, functional, and non-functional requirements into structured BRDs and FRDs, aligning deliverables with Agile ceremonies and enterprise SDLC practices. - Led over 15 agile workshops and backlog grooming sessions, driving clarity and shared understanding across development, QA, and business teams using JIRA, Confluence, and iterative sprint planning. - Triaged application issues, defects, and enhancement requests by conducting root cause analysis and validating fixes through UAT cycles using HP ALM, ensuring traceability across the project lifecycle. - Collaborated with development and architecture teams to translate business needs into scalable system requirements, identifying edge cases and clarifying dependencies to reduce rework and speed up delivery timelines. - Created detailed use cases, business rules, and user interface specifications for web-based insurance platforms, applying strong attention to detail and user empathy to improve usability and minimize downstream testing issues. - Queried large datasets using SQL and Excel to support logic validation, detect inconsistencies, and confirm data transformations aligned with business rule expectations. - Managed changing priorities and project scope shifts by maintaining alignment between business goals and technical delivery, supporting timely releases across concurrent Agile initiatives.	

EDUCATION

Amberton University, Plano, TX <i>Masters in Project Management</i>	Aug 2021 – May 2023
University of Texas at Arlington Texas <i>Bachelor's in Science in Information Systems</i>	Aug 2016 – May 2021

CERTIFICATIONS

- Project Management Professional (PMP)**
- Scrum Master**
