

Biruk Yimer

240-516-4220 | Birukesh24@gmail.com | Silver Spring, MD | [Github](#)

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, C++, C, PHP, SQL
Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, Angular 17+, Bootstrap
Backend: Node.js (Express.js, NestJS), Python (Flask, Django, FastAPI), Java (Spring Boot), REST APIs
Cloud & DevOps: AWS (EC2, S3), Firebase, Vercel, Docker
Version Control & Tools: Git, GitHub, Github Action, Bitbucket, JIRA, Linux, Windows, macOS

EDUCATION

University of Maryland, Baltimore County Baltimore, MD
Bachelor of Science in Computer Science (GPA 3.5)

EXPERIENCE

Churchme Remote
Software Developer *Jun 2024 – Jun 2025*

- Developed frontend features using **Angular** and integrated with **Node.js** backend cloud functions to support people management, events, and media capabilities.
- Integrated third-party APIs such as **Twilio** and **Planning Center** to enable communication and church community engagement.
- Contributed to Agile sprints, reducing deployment bugs by **25%** and improving delivery speed by **15%**.
- Collaborated on CI/CD pipelines using **GitHub Actions** and helped scale the platform to **5K+ active users** with a **4.7 rating**.

Freelance / Pharmacy Stock Management SaaS Remote
Full-Stack Developer *Jan 2025 – Present*

- Built a production-grade pharmacy inventory system using **Django**, and **SQLite**, actively used by a live pharmacy handling **100+ daily transactions**.
- Integrated an **OpenAI-powered assistant** to handle stock queries, medicine lookups, and refill reminders, reducing manual workload by 40%.
- Built secure **RESTful APIs** with **RBAC** and fast queries to enable scalable operations on SQLite.

Comcast Washington, DC
Software Engineering Intern *May 2023 – Aug 2023*

- Developed and automated 30+ RESTful API test cases using **Karate** and **Python**, reducing manual testing efforts by 40% and increasing test coverage.
- Integrated test suites into CI/CD pipelines using **Jenkins** and deployed via **Kubernetes**, accelerating deployment cycles by 30%.
- Collaborated with senior engineers to build backend features in **Python**, contributing to 3+ production microservices adopted across teams.

Children and Charity International Washington, DC
Web Development and Python Instructor *Jun 2021 – Aug 2022*

- Developed and delivered Python and Web Development curriculum with hands-on exercises and real-world examples.
- Assessed 90+ students through assignments and projects, improving overall performance and understanding.

PROJECTS

TrendAdSocial | Django, Python, Bootstrap 5, WebSockets, Postman, AWS [AWS link](#)

- Built a full-stack social media app using **Django** with real-time chat, infinite scroll, and a dynamic ad system.
- Developed post management, WebSocket chat, and notifications; optimized performance with Django ORM
- Deployed it on **AWS EC2** and used **Postman** throughout development to test and validate API endpoints.

Machine Learning Model | Python, TensorFlow, Scikit-learn <https://github.com/Byimer1/MLproj>

- Built a Convolutional Neural Network using TensorFlow/Keras to classify CIFAR-10 images with 80% accuracy.
- Used TensorFlow for preprocessing, augmentation & scikit-learn for data splitting to improve generalization.

Full Stack Event Scheduler | React, FastAPI, PostgreSQL, Docker <https://github.com/Byimer1/EventHub>

- Built a full-stack event scheduler with event creation, dashboards, and auth using **Vite, React, Tailwind** and **FastAPI, PostgreSQL**; integrated **Google Calendar API** for syncing and managing events.
- Implemented **JWT-based authentication**, route protection, and secure password hashing; developed RESTful APIs, connected frontend with **Axios**, and containerized backend using **Docker**.
