

KRISHNA TEJA BOYAPATI

Houston, TX-77054 / (713)-418-9448 / krishna.boyapati456@gmail.com / <http://linkedin.com/in/krishna-teja-984514208>

EDUCATION

- University of Houston – Cullen College of Engineering Houston, TX
Masters in **Electrical & Computer Systems Engineering**; January 2023 - December 2024
Relevant Coursework: Principles of Internetworking, Control Systems, VLSI Design, Advance topics in Computer Architecture, Advance Imaging Techniques, Material Science of thin films, Introduction to Cybersecurity, DBMT, Open Systems.
- RVR&JC College of Engineering Andhra Pradesh, India
Bachelor of Technology in **Electronics & Communication Engineering**; August 2018 - May 2022
Relevant Coursework: Digital Electronics, Data Engineering, Signals and Systems, C language, Machine Learning, Digital Imaging Processing, Computer Networking, Python Programming.

SKILLS

- **Technical:** AWS, Azure | ServiceNow | MySQL | Windows | Unix | Linux | User Administration.
- **Tools:** PyCharm | VS Code | Git | GitLab | Spark | MySQL Workbench | Postman.
- **Programming Languages:** MSSQL | Python | Java | Microsoft Office Suite.

EXPERIENCES

- Acroplans LLC | Data Analyst Intern, Houston, Texas** March 2025 - Present
 - Collaborated with cross-functional IT teams to integrate ServiceNow REST APIs with internal web-based systems, enabling real-time automation of incident creation, updates, and resolution tracking.
 - Designed and implemented Python-based workflows to extract, clean, and analyze large volumes of incident and service request data from ServiceNow, supporting KPI reporting and compliance tracking.
 - Developed and optimized complex SQL queries in both PostgreSQL and MySQL to ensure efficient retrieval of service data from connected databases for audits, metrics analysis, and dashboard feeds.
 - Built and maintained interactive dashboards using Matplotlib, Seaborn, and custom web interfaces to visualize ticket volume trends, SLA adherence, team performance, and root cause analytics.
 - Ensured secure handling of service data by implementing role-based access control, encryption practices, and cloud compliance protocols within AWS and Azure environments, adhering to ITIL and cybersecurity standards.
- Infosys | System Engineer, Hyderabad, India** August 2021 - December 2022
 - Assisted in developing Python scripts to automate repetitive tasks, troubleshoot minor technical issues, and streamline workflows for improved efficiency.
 - Supported user authentication and access control by creating Python scripts for Active Directory management, ensuring secure and efficient operations.
 - Supported Python scripts that managed files in formats like CSV, JSON, and Excel and Worked on debugging and fixing issues in existing Python code.
 - Collaborated on Python-driven solutions for software installations, updates, and troubleshooting, including integrating with SQL databases and ensuring compatibility with organizational tools like Microsoft Office 365.
 - Utilized Helped in maintaining Python scripts that are connected to databases like SQL for data retrieval and Gained experience in working with cloud platforms (AWS/Azure) to run and manage Python scripts.
 - Directed user administration, group policies, and security permissions in Active Directory and Azure settings. Used Git for version control to track changes in Python scripts and collaborate with team members on projects.

PROJECTS AND ACHIEVEMENTS

- Installed, configured, and support desktops, laptops, virtual machines, mobile phones, VOIP products, servers, backup systems, printers, scanners, and miscellaneous devices**
 - Installed, configured, and supported desktops, virtual machines, servers, VOIP systems, and peripherals, while managing user administration, group policies, and security permissions in Active Directory and Azure.
 - Automated system monitoring and log analysis using Python scripts, and provided technical support for Windows, macOS, Office 365, and enterprise applications via remote tools like Zendesk, resolving an average of 140 tickets monthly.
 - Performed software installations, updates, and troubleshooting for SQL, antivirus, and audio-visual systems, ensuring seamless system performance and secure, optimized IT environments.
- AI-Powered Virtual Machine (VM) Optimization in Proxmox**
 - AI-Driven Optimization: Developed an AI-powered system for VM resource management in Proxmox PVE, enhancing performance through intelligent resource allocation.
 - Predictive Analytics & Automation: Built a Python-based AI model to analyze CPU, RAM, and disk trends, enabling proactive VM scaling with Prometheus, Grafana, and Proxmox API.
 - Virtualization & System Efficiency: Configured and optimized QEMU, LXC, and KVM in Debian-based Linux, automating dynamic VM scaling to reduce bottlenecks and improve responsiveness.

CERTIFICATIONS

- NPTEL Certification: C Language
- Python
- ServiceNow Database admin
- MSSQL
- Web testing
- ServiceNow Database testing
