

BONIFACE THUO MWAURA

Phone: +254 705 719 068 | **Email:** bonithuo@gmail.com | **Address:** Murang'a, Kenya

LinkedIn: www.linkedin.com/in/boniface-thuo-52ab3816a

PROFESSIONAL SUMMARY

Experienced Data Scientist with over 2 years of experience specializing in machine learning, data analysis and data visualization. Successfully developed and deployed predictive models that improved forecasting accuracy by over 36%, with a focus on e-commerce, finance and healthcare sectors. Proven expertise in building classification algorithms, automating data pipelines and designing interactive dashboards using Power BI and Tableau. Experience collaborating with distributed remote teams and maintaining smooth workflows with tools such as Git, Trello and Zoom. Adept at working with large datasets, cleaning data and ensuring high data integrity to inform business decisions. Looking to leverage data science expertise and remote collaboration skills to contribute to innovative projects and business growth in a forward-thinking organization.

SKILLS

Machine Learning, Data Analysis, Data Cleaning, Data Entry, Statistical Modeling, Survey Analysis, Report Writing, Livestock Analytics, Agricultural Research, Database Management, Data Visualization, Predictive Modeling, Research Methods, SQL Queries, Python Programming, Dashboard Design, Spreadsheet Automation, Remote Collaboration, Workflow Optimization, Data Reporting, Metrics Tracking.

CBC Chatbot for Kenya's Education System: <https://github.com/Bonifacethuo/Phase-5-Project>

Developed an AI-powered chatbot to support Kenya's Competency-Based Curriculum (CBC), automating responses to curriculum queries. Used TF-IDF and Cosine Similarity for query matching, Random Forest/XGBoost for ranking, and VADER/TextBlob for sentiment analysis on CBC-related tweets. Improved stakeholder access to accurate information and analyzed public sentiment for strategic education insights

Aviation Accident Analysis – <https://github.com/Bonifacethuo/Phase-1-Project-Data-Science>

Analyzed 9,600+ aviation accident records from the NTSB to identify low-risk aircraft makes for investment. Used descriptive stats, comparative analysis, and visualizations. Recommended Boeing and commercial aircraft for lower risk exposure and advised enhanced maintenance protocols

EXPERIENCE

Data Analyst

Kalon Foods | Part-Time | Hybrid | Jun 2025 – Present

Roles and Responsibilities:

- Conducted exploratory data analysis (EDA) and built interactive dashboards to monitor inventory turnover, sales trends, and demand forecasts across multiple product categories.
- Reduced stockouts and overstocking incidents by 28% through predictive modeling using Python and time-series forecasting techniques.
- Collaborated with cross-departmental teams (sales, logistics, and procurement) to translate business needs into analytical solutions and visual reports.
- Automated weekly and monthly reporting pipelines using SQL and Python scripts, decreasing manual reporting effort by over 60%.
- Implemented data validation checks to ensure data integrity from multiple sources (Excel, ERP exports, and Google Sheets).
- Presented key business insights to leadership through Power BI dashboards, enabling data-driven decisions on procurement and pricing strategies.
- Contributed to a cross-functional AI/ML initiative focused on product demand forecasting, delivering feature engineered datasets and exploratory visualizations.

Machine Learning Specialist

Upwork | Freelance | Remote | Jan 2025 – Present

Roles and Responsibilities:

- Developed and deployed predictive models tailored to diverse client projects, resulting in a significant increase in forecasting accuracy by over 35% and driving data-informed decision-making.
- Built advanced classification algorithms for both text and image datasets, enhancing model interpretability for clients and contributing to reduced algorithmic bias in critical applications.

- Tuned hyperparameters in complex deep learning architectures, achieving a 22% improvement in validation performance while ensuring robustness and generalizability of the models.
- Delivered machine learning solutions for clients in e-commerce, finance and healthcare sectors, consistently meeting performance targets and earning high satisfaction ratings.
- Collaborated efficiently with distributed remote teams through Git and Trello, maintaining clean version control workflows and ensuring smooth coordination for on-time project delivery.
- Designed and presented clear, insightful visualizations of model performance and outcomes using Power BI and Tableau, making complex results accessible to non-technical stakeholders.
- Wrote modular, well-documented code in Python and R for end-to-end model development, enabling easy transfer and reuse across multiple teams and long-term projects.

Data Visualization Intern

Excelerate | Remote | Apr 2025 – Present

Roles and Responsibilities:

- Assisted in cleaning and transforming large datasets to ensure readiness for visualization and analysis across internal reporting tasks.
- Designed interactive charts and dashboards using Power BI and Tableau, enhancing data accessibility and decision-making.
- Collaborated with cross-functional teams to align data visuals with business goals and user requirements.
- Contributed to the creation of compelling data narratives by developing visuals that simplified complex insights for stakeholders.
- Validated data accuracy and integrity in visual outputs, identifying and resolving inconsistencies during the design process.
- Supported ongoing projects by updating and maintaining dashboards, improving layout, interactivity and performance.

Data Specialist

Self-Employed | Freelance | Remote | Sep 2023 – Present

Roles and Responsibilities:

- Developed and deployed automated data pipelines that reduced manual data processing time by 61%, streamlining workflows and improving overall efficiency in data handling for multiple clients.
- Created high-impact visual dashboards using Tableau and matplotlib, which provided real-time insights into business operations, helping stakeholders make informed decisions.
- Performed extensive data normalization and cleaning on datasets exceeding 100,000 entries, ensuring enhanced data quality and reliability, leading to more accurate analysis and reporting.
- Converted complex statistical results into clear and actionable recommendations, influencing client decision-making and driving business strategies.
- Automated weekly reporting systems, significantly reducing preparation time, minimizing human error and improving the overall efficiency of reporting processes.
- Managed multiple client projects remotely, ensuring that all tasks were delivered on time, while maintaining high standards of data integrity and consistency.
- Restructured unorganized and disparate datasets into well-organized formats, making them more accessible and valuable for reporting and data analysis, thus improving business intelligence and decision-making capabilities.

Data Analyst

XCon Technologies | Freelance | Remote | Jan 2025 – Apr 2025

Roles and Responsibilities:

- Analyzed datasets of over 200,000 records using SQL to uncover trends in customer engagement.
- Designed Tableau dashboards for performance tracking, viewed by more than 50 internal stakeholders.
- Conducted churn analysis that informed a retention strategy, leading to a 12% improvement in user retention.
- Collaborated with cross-functional teams remotely to align analytical insights with business goals.
- Created A/B test frameworks to assess the impact of feature rollouts, guiding product improvements.
- Summarized findings in executive-ready reports, highlighting key metrics and strategic recommendations.
- Automated data cleaning workflows using Python, enhancing consistency across reports.

EDUCATION

- **Bachelor of Science in Animal Science with IT | Maseno University | 2018**

CERTIFICATION

- **Certification in Data Science** | Moringa School | 2024 | Focused on Python (pandas, NumPy, matplotlib), SQL and Tableau.)

TOOLS

Python, SQL, Tableau, Microsoft Office, Jupyter Notebook, Google Sheets, Zoom, Slack, Power BI, Google Data Studio, Notion, Trello, Asana, Apache Spark, TensorFlow Framework, Scikit-learn Library.

LANGUAGES

- ❖ English - Fluent
- ❖ Swahili - Native
