bgundapaneni@careerattainment.com | +1 (816) 937-6323 | USA | [LinkedIn](#)

## Summary

Full Stack Developer with 3+ years of experience designing and developing scalable web applications. Proficient in Java, Spring Boot, Hibernate, and J2EE for backend, and React, Angular, and JavaScript for frontend. Expertise in microservices, Docker, and RESTful APIs. Strong background in CI/CD, JUnit testing, and agile methodologies. Proven track record of delivering high-quality, performance-driven solutions aligned with business goals.

## Skills

- **Front-end Technologies:** HTML5, CSS3, JavaScript, React.js, Angular, Bootstrap, XML, jQuery, AJAX
- **Database Technologies:** MySQL, MongoDB, PostgreSQL, SQL Server, Oracle, Firebase, Cassandra
- **Back-end Technologies:** Java, Spring Boot, Hibernate, Microservices, J2EE, JDBC, Java Servlet, Python, Flask, Django, Node.js, C/C++, RESTful APIs, Maven, JSON, XML
- **Tools and Technologies:** Git, Visual Studio Code, Docker, Kubernetes, Jenkins, Apache Tomcat, Nginx, Swagger, Postman, JUnit, Mockito, JIRA, Scrum, SDLC, AWS (Amazon Web Services), Microsoft Azure, Google Cloud Platform (GCP)

## Professional Experience

### Full Stack Developer, Kofax

Aug 2024 – Present | Remote, USA

- Involved in the agile software development lifecycle, including requirements gathering, design, coding, testing, debugging, and support for a Java-based microservices application.
- Engineered RESTful APIs using Java, Spring Boot, and Hibernate, enabling seamless interactions between microservices, frontend applications built with React and Redux, and third-party integrations, improving system interoperability.
- Implemented containerization with Docker for the deployment of microservices, enhancing scalability and simplifying the deployment process across various environments.
- Optimized and normalized a PostgreSQL database, implementing indexing and query optimization techniques, resulting in a 25% improvement in query performance and faster data retrieval.
- Collaborated on configuring and integrating AWS CDK pipelines for CI/CD, enabling efficient deployments while conducting unit testing with JUnit to ensure code quality and minimize production defects.

### Java Developer, PTC

Oct 2023 – May 2024 | Remote, USA

- Designed and developed scalable microservices using Java, Spring Boot, Hibernate, and RESTful APIs, improving the telecommunication platform's performance, reliability, and service integration capabilities for Verizon.
- Created dynamic and responsive user interfaces using Angular, Bootstrap, and JavaScript, ensuring seamless integration with backend services and an optimized user experience across multiple devices.
- Streamlined application deployment processes by containerizing Java-based applications with Docker and implementing CI/CD pipelines using Jenkins, reducing deployment complexities and improving efficiency across environments.
- Optimized cloud infrastructure leveraging Azure Cloud services, including Azure Blob Storage, Virtual Machines, and Azure Functions, to enhance data storage, scalability, and platform reliability.
- Ensured robust data management with MySQL, improving database performance through effective schema design, query optimization, and indexing strategies for seamless data storage and retrieval.
- Enhanced system quality and reliability by conducting API testing with Postman and Swagger, implementing unit and integration testing using JUnit and Mockito, and monitoring application performance using Spring Actuator and Log4j.

### Java Developer, Investmitra

Aug 2020 – Dec 2022 | Hyderabad, India

- Enhanced the Croma website's backend performance by reducing page load times, using Java, Spring Boot, and Hibernate to develop and maintain efficient, scalable backend systems, and ensuring seamless integration with third-party APIs.
- Designed and developed a scalable e-commerce platform using microservices architecture, Java, Spring Boot, and Docker, optimizing system performance to handle high-concurrency workloads while ensuring robust scalability.
- Improved project maintainability by 90% through modular and clean Java-based backend development, while integrating frontend functionalities with React JS and Redux, enabling streamlined collaboration and future-proofing application development.
- Delivered high-quality, error-free code through rigorous testing using JUnit and Mockito, ensuring application reliability, and optimized build and dependency management processes using Maven, resulting in seamless project deployments.

## Education

**Master of Science, University of Central Missouri**  
Computer Science

Jan 2023 - May 2024 | Missouri, USA

**Bachelor of Technology, Sri Vasai Engineering College**  
Computer Science

July 2018 – June 2022 | AP, India
