

BRANDON CAUDILLO

DATA & ANALYTICS PROFESSIONAL | TECHNICAL CUSTOMER
SUCCESS | PYTHON, SQL, ML

PROFILE SUMMARY

Data professional with a foundation in mathematics, software development, and applied data science. Skilled in guiding customers through SDK-level integrations, technical troubleshooting, and data strategy, with a focus on bridging product, engineering, and client success teams. Recent projects include predictive modeling, healthcare analytics, and image classification with CNNs, reflecting strong capabilities in Python, SQL, and translating complex technical challenges into actionable solutions.

EDUCATION

- FLATIRON SCHOOL 2025
 - Data Science Certificate
- PORTLAND STATE UNIVERSITY 2014- 2018
 - Bachelor of Science in Mathematics
 - Minor in Physics

SKILLS

Languages & Frameworks: Python, SQL, JavaScript, React, Ruby, Ruby on Rails, Bash

Analytics & Insights: Funnel Analysis, A/B Testing, Retention Cohorts, Attribution, Lifecycle Modeling

Systems & Troubleshooting: API Debugging, SDK Implementation (iOS, Android, Web), Consent Management, Networking, Technical Support, Documentation, ETL/ELT Pipelines

Cloud & Collaboration: GCP, AWS (basic), GitHub, Slack, Notion, Confluence

WORK EXPERIENCE

Twilio 2022 - 2025
Customer Success Engineer

Delivered technical support and integration guidance to hundreds of customers implementing Segment's platform across web, mobile, and server environments. Acted as an SDK subject-matter expert, solving complex issues and driving high adoption rates across analytics pipelines. Partnered cross-functionally with engineering and product teams to identify bugs, surface insights, and improve implementation quality for enterprise clients.

Key Contributions & Technologies:

- Resolved SDK issues across JavaScript, iOS, Android, and server-side libraries, maintaining a 95%+ CSAT on support tickets
- Improved integration speed and reduced onboarding time by leading clients through tailored API and GTM implementations
- Queried Segment's data pipeline using SQL and AWS Athena to deliver actionable usage insights and custom analytics reports
- Supported marketing and product analytics tool integrations (GA4, Mixpanel, Amplitude, Klaviyo, PostHog, HubSpot, Braze, FullStory, etc.)
- Collaborated directly with engineering to identify and escalate product bugs, contributing to QA efforts and feature fixes
- Advised enterprise customers on consent management, identity resolution, and data collection best practices

Finvi 2019 - 2022
Technical Support Specialist

- Diagnosed and Resolved Complex Issues: Effectively addressed a wide range of application and telephony SaaS product issues, ensuring seamless client operations and minimal downtime.
- Ensured Regulatory Compliance: Advised clients on navigating and adhering to evolving industry regulations, safeguarding compliance with legal requirements and enhancing trust in service delivery.
- Documentation Improvement: Enhanced developer support by updating public documentation and creating internal content, providing comprehensive guidance for connecting analytics platforms
