SUMMARY

Motivated Python Developer with a strong foundation in developing scalable backend solutions. Proficient in Python, agile methodologies, and adept at collaborating with senior developers to enhance software performance in dynamic environments.

KEY SKILLS

Python

Agile/Scrum

Django

Flask

SQL

Git

AWS

RESTful API

OOP

Problem-solving

Communication

WORK EXPERIENCE

Senior Software Engineer

NimbusOps Technologies | New York, NY

Feb 2023 ~ Mar 2025

- Led a team to design and develop scalable Python applications, enhancing backend service efficiency.
- Integrated server-side logic with user interfaces, optimizing code performance and user experience.
- Utilized Git for version control, maintaining code quality and ensuring collaborative development.
- Ensured all development processes adhered to high coding standards through regular code reviews.
- Streamlined identification and debugging of application bottlenecks, improving system speed by 20%.
- Documented APIs and development processes, facilitating easier future reference and development.
- Collaborated in an Agile environment, delivering projects in line with client specifications on time.
- Implemented RESTful APIs for seamless integration with front-end and external systems.
- Trained junior engineers in Python best practices, enhancing team's overall technical expertise.

Senior Software Engineer

Artemis | New York, NY

Jan 2022 ~ Mar 2023

- Developed and maintained backend services utilizing Python, increasing project efficiency by 30%.
- Fostered collaboration with developers to integrate user-facing elements within server-side logic.
- Participated in Agile teams, contributing to sprint planning and execution for timely project delivery.
- Adapted modern Python frameworks like Flask to enhance service scalability and maintainability.
- Conducted code reviews to uphold high coding standards and implement coding best practices.
- Led debugging sessions to identify and resolve critical performance issues in deployed applications.
- Enhanced system documentation, promoting transparency and knowledge sharing across teams.
- Leveraged AWS services to provide scalable cloud solutions, reducing costs by 15% annually.
- Initiated training sessions for team members on the latest Python and development technologies.

Full Stack Developer

Whoosh | New York, NY

Aug 2020 ~ Jan 2021

- Designed applications using Python and front-end technologies, ensuring robust full-stack solutions.
- Contributed to agile development processes, meeting client needs through iterative software releases.
- Implemented SQL and NoSQL databases, optimizing data retrieval and storage functionalities.

- Developed RESTful APIs to streamline communication between client-side and server-side functions.
- Deployed applications on AWS, improving client scalability and reducing deployment times by 40%.
- Engaged in code review processes to maintain high standards and early defect identification.
- Enhanced web solutions with HTML, CSS, and JavaScript, improving user interface responsiveness.
- Managed version control using Git, facilitating teamwork and maintaining a coherent codebase.
- Supported team in addressing critical bugs, ensuring uninterrupted application performance.

Software Developer

Apr 2019 ~ Dec 2019

Centric Mortgage | Bensalem, PA

- Developed backend services using Python, improving system efficiencies and application performance.
- Engaged in team code reviews to ensure compliance with high-quality software development standards.
- Implemented Django and Flask frameworks, increasing application flexibility and feature set delivery.
- Collaborated in Agile teams, aligning project deliverables with customer requirements and timelines.
- Enhanced databases with optimized queries in SQL, improving data access speeds by a measurable margin.
- Created comprehensive documentation for software processes, aiding future development endeavors.
- Participated in hands-on debugging to quickly resolve minor and major application issues.
- Ensured seamless integration of new application features with existing backend services.
- Maintained version control and promoted best practices via regular team knowledge-sharing sessions.

EDUCATION

Florida State University

Tallahassee, FL

Bachelor of Science in Social Science

Sep, 2017

Military United States Air Force

Tallahassee, FL

Avionics Technician Commendation Medal

Sep 2011

MILITARY EXPERIENCE

U.S. Air Force - Avionics Technician

- Recognized for exceptional diagnostic acumen in high-stakes aerospace operations.
- Demonstrated advanced proficiency in precision systems troubleshooting across complex and dynamic flight environments.
