PROFESSIONAL EXPERIENCE

GlobalLogic (originally via Digitive)

Task Lead (formerly Junior Python Developer)

April 2024 – Present

Client and project details under NDA (Fortune Tech 10 client, AI/ML/NLP focus)

Promoted from Junior Python Developer (Digitive) to full-time Task Lead (GlobalLogic) after 6 months based on performance and adaptability.

- Mentoring a team of cross-functional programmers, leading sprints, tracking and reporting KPI data while reducing project overhead by approximately 5%.
- Improving model metrics by up to 33% in areas such as accuracy, precision, and recall through iterative testing and process optimization.
- Facilitate standups to provide updates to technical teams and align feedback between stakeholders.
- Conducted evaluations and content curation to refine fine-tuning datasets supporting text-based models.
- Tested code execution in a sandbox environment to confirm data validity and efficiency.

EvoGov, Inc.

Full Stack Software Engineer

January 2022 - October 2023

- Designed and deployed web applications with CMS improvements, including a 30% load time reduction for the public-facing FAQ portal.
- Developed and maintained full-stack functionality using Django with Python and JavaScript, with a focus on backend performance and scalability.
- Implemented automation features and system enhancements, such as Cron Jobs for bounced email processing and updated CMS reporting.

TECHNICAL SKILLS

Languages: Python, JavaScript, C/C++, C#

Frameworks: Django

Tools: HTML, CSS, ReactJS, PostgreSQL, VS Code, Git, AWS Elastic Beanstalk

EDUCATION

University of Nevada - Reno | August 2013 - May 2017 Bachelor's in Computer Science and Engineering
