Profile

Highly skilled Data Analyst skilled in transforming complex datasets into actionable insights. Using tools like Excel, SQL, Tableau, and Power BI, I've crafted dashboards and reports that significantly impacted business outcomes. For instance, my work with KPIs led to a 25% increase in software adoption in schools and a 30% reduction in data processing time. I also helped increase donation revenue by 20% and 30% operational efficiency by maintaining and creating automated dashboards. My focus is on using data to drive informed decisions and achieve measurable results.

Skills

MSSQL	MySQL
R	Tableau
Power Bi	Power Query
Excel	Spreadsheet

Experience

2023/03 – 2024/06	Data Analyst I <i>Pancreatic Cancer Action Network</i> - Delivered data-driven insights to support decision-making across multiple departments, leading to a 25% increase in overall business performance. - Developed KPI dashboards as well as maintained automated dashboards, reducing manual reporting time by almost 50% and increasing operational efficiency by 30%. - Leveraged pivot tables, v-lookups, and formulas for in-depth analysis of data pulled from various platforms including Raiser's Edge, Financial Edge, and Luminate Online. - Conducted thorough analyses of fundraising campaigns, generating actionable insights that contributed to a 20% increase in donation revenue. - Delivered accurate and timely recurring and ad hoc reports by adeptly utilizing a variety of reporting tools.
2023/01 – 2023/03	Data Analyst <i>ESGI</i> - Utilized Tableau to develop interactive dashboards that tracked KPIs, resulting in a 20% increase in software adoption across schools and contributing to overall company growth. - Generated monthly reports, leveraging Excel and SQL techniques, delivering comprehensive data insights to stakeholders. - Created multiple dashboard files in Excel and Tableau to present KPI metrics data, improving stakeholders' understanding of optimal resource allocation. - Designed visualizations that simplified complex analysis results, enabling users to quickly and effectively interpret and act on the data.
