Objective

To contribute as a Full Stack .NET Developer in a high-performance team, delivering scalable enterprise software using Microsoft technologies while expanding my expertise in architecture, DevOps, and cloud-native development.

Professional Summary

Highly motivated and skilled Junior Software Developer with over 2 years of experience working on enterprise solutions using Microsoft technologies. Specialized in C#, ASP.NET Core/MVC, Entity Framework Core, SQL Server, and Azure. Acting as a technical mentor for interns while delivering critical internal systems for large-scale clients like ArcelorMittal. Deeply passionate about clean code, software architecture, and data-driven design. Strong foundation in algorithms and data structures, with proven success in improving performance and scalability of real-world systems.

Professional Experience

Junior Software Developer – RDI Software (ArcelorMittal)

Jan 2024 – Present

- Lead developer and mentor in a Microsoft-based enterprise project serving thousands of users.
- Developed robust APIs using ASP.NET Core integrated with SQL Server via EF Core and LINQ.
- Designed and deployed scalable microservices on Azure, with CI/CD using Azure DevOps.
- Implemented caching, stored procedures, and complex query optimizations for business-critical features.
- Guided architecture decisions with DDD, CQRS, and clean architecture patterns.

Software Development Intern – RDI Software

Jan 2023 – Dec 2023

- Created full-stack Blazor Server applications for internal productivity tools.
- Contributed to backend logic using C# and ASP.NET MVC, following SOLID principles.
- Built responsive UI components and reusable modules to reduce development time.
- Optimized reporting and filtering performance for large datasets through custom algorithms.

Core Skills & Technologies

Languages: C#, SQL, JavaScript | Frameworks: ASP.NET Core, ASP.NET MVC, Blazor, EF Core - Frontend: HTML, CSS, jQuery | DevOps: Azure DevOps, CI/CD | Cloud: Azure App Services, Functions - Architecture: DDD, Clean Architecture, CQRS | DB: SQL Server, Views, Stored Procedures - Practices: Agile, Git, Unit Testing | Algorithms: Optimization, Collections, Performance Tuning

Education & Languages

BSc in Mathematics – Federal University of Minas Gerais (UFMG) – Expected 2029

Portuguese: Native | English: Advanced – C1 Level
