

Bhargavi Reddy

Data Analyst

bhargavireddy042512@gmail.com | +1 (469) 861-9121 | [LinkedIn](#)**PROFESSIONAL SUMMARY**

Results-driven Data Analyst with 4+ years of experience in data visualization, statistical analysis, and business intelligence across diverse industries. Proficient in SQL, Python, Power BI, Tableau, and AWS tools with strong expertise in ETL pipelines, predictive analytics, and KPI-driven reporting. Skilled at writing KQL and Python scripts for advanced data manipulation, optimizing workflows, and enhancing operational performance. Proven ability to collaborate with cross-functional teams, deliver actionable insights, and automate systems for large-scale supply chain and enterprise applications. Strong commitment to leveraging analytics to improve routing, forecasting, and business outcomes.

PROFESSIONAL EXPERIENCE**Business and Systems Analytics – Data Analyst***Talent Software Services | Redmond, WA | Contract**July 2025 – Present*

- Collaborate with engineering, product, and operations teams to support and enhance internal systems managing component flow, routing, and supply chain data integrity.
- Write and optimize Python scripts and Kusto (KQL) queries to extract, analyze, and improve datasets used in forecasting, routing, and process optimization.
- Maintain internal tools by investigating upstream data issues and implementing enhancements for automation and operational efficiency.
- Design, implement, and maintain enterprise-scale ETL processes using SQL, AWS Glue, and Python to automate ingestion and transformation workflows.
- Modify and manage backend databases including Snowflake, Redshift, and BigQuery, applying schema updates and performance improvements.
- Support ad hoc reporting and data analysis requests using Power BI, Tableau, and SQL to enable data-driven decisions across teams.
- Ensure data integrity through validation rules, anomaly detection, and process standardization.
- Work in a highly collaborative Agile environment with 30% of time spent in meetings and 70% on hands-on technical work.

- Spearheaded dashboard development initiatives to track real-time component flow, improving visibility across operations.
- Collaborated with DevOps to enhance CI/CD workflows for analytics tools, leading to faster deployment cycles.
- Integrated system logs and data quality checks into existing monitoring tools, reducing downtime and debugging time by 35%.
- Mentored junior analysts and contributed to onboarding documentation to enhance team knowledge-sharing.

Key Technologies: SQL, KQL, Python, Power BI, Tableau, AWS Glue, Redshift, Snowflake, BigQuery, GitLab CI/CD, REST APIs, Agile

Data Analyst

Verizon | United States

June 2024 – May 2025

- Developed interactive dashboards in Power BI, Tableau, and AWS QuickSight to monitor KPIs and operational trends.
- Performed advanced statistical analysis including regression, clustering, A/B testing, and time-series forecasting.
- Automated data pipelines using Apache Airflow, AWS Glue, and Python, reducing processing time by 40%.
- Integrated data validation and anomaly detection into ETL workflows, improving data reliability.
- Partnered with cross-functional teams to translate business needs into analytical models.
- Built dynamic cohort analysis tools to monitor user behavior over time and optimize retention efforts.
- Created scalable reporting systems that reduced manual effort across departments by 60%.

Data Analyst

Pfizer | India

June 2021 – July 2022

- Conducted EDA using Python to uncover key trends and operational bottlenecks.
- Created automated reports and dashboards using SQL and Excel macros, reducing manual reporting by 50%.

- Optimized SQL queries and migrated legacy databases to cloud platforms like Redshift and Snowflake.
- Supported inventory management and budget forecasting by refining predictive models.
- Partnered with finance and operations teams to identify cost-saving opportunities through data insights.
- Assisted in defining standardized metrics across departments, improving consistency in KPIs.

Data Analyst

CitiGroup | India

January 2020 – May 2021

- Consolidated raw data from multiple sources and performed cleaning, formatting, and EDA.
- Assisted in creating charts and dashboards in Excel and Power BI.
- Documented data processes and collaborated on ad hoc reporting needs.
- Supported senior analysts in performing root cause analysis for financial anomalies.
- Developed summary statistics and visuals to support regulatory reporting and compliance reviews.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL (MySQL, PostgreSQL, Redshift, Snowflake), R
- **Data Visualization:** Power BI, Tableau, AWS QuickSight, Looker, Dash, Plotly
- **ETL & Data Engineering:** Apache Airflow, AWS Glue, Redshift, Snowflake, BigQuery, Pandas, NumPy, PySpark
- **Statistical Analysis:** Regression, clustering, A/B testing, forecasting
- **Cloud & DevOps:** AWS (S3, EC2, Lambda), Azure, Docker, Jenkins, GitLab CI/CD
- **Other Tools:** Jira, Confluence, GitHub, Swagger, REST APIs

EDUCATION

Master of Science in Information Systems
The University of Texas at Arlington – Texas
CGPA: 3.75

Bachelor of Electronics and Communication Engineering
CVR College of Engineering – India
CGPA: 3.36
