SUMMARY

Data Analyst with 3 years of experience in healthcare and IT, blending business intelligence expertise with strong analytical skills to drive data-informed decisions. Proficient in SQL, Python, and R for data extraction, transformation, and statistical analysis, with hands-on expertise in building actionable dashboards using Power BI, Tableau, and Excel. Skilled in partnering with cross-functional teams to analyze user behavior, execute A/B tests, and deliver insights that enhance product and operational strategies. Experienced with Azure-based ETL pipelines and cloud data tools to support scalable, automated reporting workflows across business and clinical domains.

TECHNICAL SKILLS

- **Methodologies:** SDLC, Agile (Scrum), Waterfall
- **Languages:** Python, SQL, R, Java
- **Packages:** NumPy, Pandas, Matplotlib, ggplot2, Scikit-learn, SciPy, Seaborn, Plotly, PySpark
- **Visualization Tools:** MS Excel/ advanced Excel, Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
- **Cloud Technology:** Azure (Data Factory, Databricks, Synapse, Key Vault)
- **Databases:** MySQL, PostgreSQL, Oracle, T-SQL
- **Certifications:** Data Engineering with Snowflake, Google Analytics, Microsoft PowerBI Data Analyst, SQL for Data Engineering
- **Other:** JIRA, SSIS, SSRS, Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, Data Mining, Data Visualization, Data warehousing, Data transformation, Data Storytelling, Clustering, Classification, Regression, A/B Testing, Data Cleaning, Data Wrangling

EDUCATION

- **The University of Texas at Dallas, Jindal School of Management** **Dallas, TX, USA**
Master of Science in Business Analytics
- **Vellore Institute of Technology, Vellore** **Vellore, India**
Bachelor in Business Administration

EXPERIENCE

Accenture

Dallas, USA

Data Analyst

Nov 2024 – Present

- Led business process automation efforts by designing and implementing SQL-based workflows in dbt and Azure Data Factory, reducing manual data preparation by 30% and ensuring timely, accurate reporting
- Developed SQL queries and stored procedures to support data extraction and transformation, optimizing internal reporting processes for business and finance teams
- Reduced data latency by 30% through the design and deployment of automated ETL pipelines in Azure Data Factory.
- Executed A/B testing via Google Analytics to assess the effects of website interface changes, resulting in a 30% increase in online appointment bookings
- Optimized statistical techniques to analyze customer satisfaction and identify key drivers, insights were translated into actionable recommendations that resulted in significant improvements, and a 15% reduction in customer complaints.
- Employed complex SSIS packages utilizing data flow tasks, control flow tasks, and script components to effectively transform and integrate data from various sources, resulting in a 20% improvement in data processing efficiency.
- Improved data availability for analysis by 20% by developing and implementing efficient data extraction and loading processes using PostgreSQL, leading to increased data accessibility for stakeholders and improved agility.

Iqvia

Bangalore, India

Analyst

May 2022 – July 2023

- Collaborated effectively with stakeholders to understand their data needs and translate them into insightful and user friendly Power BI dashboards, resulting in a 15% increase in data-driven decisions in user satisfaction.
- Partnered with cross-functional teams including clinical operations, finance, and provider network management to extract, manipulate, and analyze healthcare claims and provider data using SQL and Snowflake, supporting VBC initiatives
- Utilized click-stream data with SQL and Python to study user behavior on the application, which assisted the technical front in updating the application for consumer convenience. Enhanced cart conversion rate by 8% and checkout rate by 3%
- Automated the end-to-end transformation of patient healthcare data using Python, eliminating manual Excel processes and reducing reporting effort by 20+ hours weekly.
- Integrated automated pipelines with Power BI, reducing manual errors and cutting report turnaround time by 60% through built-in validation checks and consistent data ingestion
- Created user stories and use cases to define reporting and data analytics solutions, facilitating the development of scalable dashboards and automated reports
- Analyzed managed care data from Medicare Advantage claims, using SQL, Snowflake, and Excel VBA to identify cost-saving opportunities, optimize provider reimbursements, and reduce care gaps through targeted interventions
- Created user stories and use cases to define reporting and data analytics solutions, facilitating the development of scalable dashboards and automated reports
