

POOJA LINGA

Business Analyst

Kansas, USA | lpooja1104@gmail.com | +19137623250 | <https://www.linkedin.com/in/pooja-shetty04>

SKILLS

- **Programming & Data Analysis:** Python, SQL, MySQL, Oracle, SQL Server, Snowflake, Data Modeling, Excel (Advanced), Business Statistics (BSTAT), Data Warehousing, Data Lineage & Governance
- **Visualization & Reporting Tools:** Power BI, Tableau, RPA, MS Access, Excel resource models, PowerPoint, MS SharePoint, Data Storytelling, Power Query
- **Project Management & Collaboration Tools:** JIRA, Confluence, Azure DevOps, MS Project, ServiceNow, Rational ClearQuest, PostgreSQL
- **Documentation & Requirements:** BRD, FRD, SRS, RTM, Use Case Documents, User Stories, UML, JAD Sessions, UAT, SOPs, Acceptance Criteria
- **Analysis & Strategy:** GAP Analysis, Cost/Benefit Analysis, Impact Analysis, Risk Analysis, SWOT Analysis, KPI Tracking, Process Improvement, Data Validation, Resource Planning & Utilization, Process Standardization
- **Operating Systems:** Windows, Linux
- **Methodologies:** SDLC, Agile (Scrum, Kanban), Waterfall, SAFe
- **Design & Modeling:** Microsoft Visio, Lucidchart, BPMN
- **Technical Knowledge:** APIs, QA Testing, XML, ERP, CRM, Basic DevOps, Ad Hoc Analytics, Cloud (AWS Azure), ETL Pipelines

CERTIFICATIONS

- Certified Business Analysis Professional (CBAP) - IIBA
- Machine Learning Associate – AWS

EXPERIENCE

Business Operational Analyst

May 2024 - Present

Blue Cross Blue Shield, USA

- **Lead** strategy and operations initiatives across multiple workstreams, supporting project intake, prioritization, and execution while aligning with regulatory and operational goals.
- **Produced executive-level** operational reports and dashboards to support leadership decision making on project pipeline, capacity planning, and delivery priorities.
- **Standardized** intake and documentation processes across initiatives, improving stakeholder alignment and reducing rework by 30%.
- **Built Power BI dashboards and Excel** based operational dashboards tracking KPI's resource utilization, and delivery performance across teams.
- **Manage** end-to-end UAT processes, including test case creation, execution, and defect tracking, resulting in a 25% reduction in post-deployment issues.
- **Develop** an automated KPI monitoring framework that improves reporting speed by 35% and reduces manual effort by 40%, now adopted as a standard across multiple teams.
- **Ensure 100% compliance with HIPAA and data governance standards** while handling sensitive claims and member data across multiple systems

Business Analyst

August 2020 – December 2022

Head Digital Works, INDIA

- **Supported strategy** and operations execution by coordinating priorities, timelines and stakeholder expectations across multiple initiatives.
- Used quantitative skills, advanced Excel, SQL, and hands-on data science techniques to fix data issues, validate A/B experiments, and improve reporting efficiency by roughly 30% through stronger experimental design.
- **Facilitated Agile ceremonies** such as sprint retrospectives and backlog grooming sessions to drive continuous improvement in reporting quality and delivery timelines by 27%.
- **Led stakeholder interviews and interactive workshops** to identify player behavior patterns and data gaps, extracting actionable business insights that increased **user engagement** by 15%.
- **Defined, monitored, and reported key performance indicators (KPIs)** to assess marketing ROI, campaign effectiveness, and overall business health.
- **Partnered** with product, engineering, and business teams to apply technical expertise, light machine learning logic, and structured problem-solving that reduced analysis turnaround time by 20%, staying adaptable and easy to work with.
- **Participated in peer reviews** of test plans and requirement documents to uphold standards for quality, clarity, and completeness.

ACADEMIC PROJECTS

- **Healthcare Claims Analytics Dashboard:** Built a Power BI dashboard using healthcare claim delays and improve reporting accuracy.
- **Banking Risk Analysis:** Analyzed customer and loan data from US banks using SQL to find patterns in defaults and improve risk insights.
- **Marketing Campaign Insights:** Studied user engagement data from gaming campaigns to suggest ways to improve customer retention and ROI.

EDUCATION

University of Central Missouri - Master's in information systems

January 2023 – January 2024
