

KEERTHANA V

keerthana11355@gmail.com

+14705026311

New Jersey, 08873

SKILLS

- ♦ **EDC platforms:** Medidata Rave, Oracle Inform, Veeva Vault EDC, Medrio
- ♦ **Data review & risk-based monitoring:** JReview, Spotfire, Elluminate, Tableau
- ♦ **Data handling & automation:** SAS (Base, Listings, QC Reports), SQL, Python (data cleaning/automation), R (basic statistics), Excel (advanced functions, VLOOKUP)
- ♦ **Compliance & standards:** ICH-GCP, 21 CFR Part 11, CDISC (SDTM, CDASH, ADaM), Risk-Based Data Management
- ♦ **Project oversight & documentation:** MS Office Suite (Excel, Word, PowerPoint), Smartsheet

PROFILE

Clinical Data Manager with 6+ years of experience in global Phase I–III trials, known for delivering high-quality, inspection-ready databases by managing study start-up, conduct, and lock activities while driving KPI-based improvements in data quality and timelines.

Key Highlights

- ♦ Managed end-to-end clinical data management deliverables across global studies, including protocol review, eCRF design and annotation, database build and validation, ongoing data review, and final database lock.
- ♦ Authored study-level documentation such as Data Management Plans (DMPs), eCRF Completion Guidelines, and Edit Check Specifications (ECS) to ensure alignment with protocol endpoints and CDISC/SDTM standards.
- ♦ Led User Acceptance Testing (UAT) by creating and executing test scripts, documenting results, resolving issues, and approving databases for Go-Live.
- ♦ Supported interim analyses, Data Safety Monitoring Board (DSMB) reviews, and regulatory submissions by delivering clean, analysis-ready datasets on schedule.
- ♦ Oversaw external vendor data reconciliation, including laboratory and ePRO deliverables, ensuring accuracy, completeness, and traceability within the clinical database.
- ♦ Directed serious adverse event (SAE) reconciliation activities to maintain consistency between clinical and safety databases, supporting pharmacovigilance and compliance.
- ♦ Partnered with Clinical Operations, Biostatistics, Programming, and Contract Research Organizations (CROs) to proactively resolve data issues, align study timelines, and maintain inspection readiness.
- ♦ Monitored key performance indicators (KPIs) such as query turnaround time and discrepancy resolution rates to shorten reconciliation cycles and achieve on-time database locks.
- ♦ Maintained audit readiness by ensuring traceability, documentation accuracy, and consistent data quality.

WORK EXPERIENCE

Annexon Biosciences

Sr. Clinical Data Manager

April 2024 - Present

Responsibilities:

- ◆ Review study protocols and contribute to electronic Case Report Form (eCRF) design and edit check specifications to ensure endpoint alignment, regulatory compliance, and CDISC/CDASH standards.
- ◆ Author and maintain core data management documents including Data Management Plans (DMPs), eCRF Completion Guidelines (CCGs), Edit Check Specifications (ECS), and Data Review Plans.
- ◆ Oversee eCRF development in collaboration with EDC programmers; lead User Acceptance Testing (UAT), resolve system issues, and approve database for Go-Live.
- ◆ Manage protocol amendments and mid-study updates, including impact assessment, revalidation, and change control tracking.
- ◆ Perform ongoing data review using risk-based strategies to detect discrepancies, protocol deviations, and data quality issues, coordinate resolutions with sites and Clinical Operations.
- ◆ Oversee vendor data reconciliation (laboratory, pharmacokinetics, biomarkers, electronic Patient-Reported Outcomes [ePRO]) and validate transfers against Data Transfer Agreements (DTAs).
- ◆ Lead Serious Adverse Event (SAE) reconciliation and medical coding (MedDRA, WHO Drug) to ensure accuracy and compliance.
- ◆ Manage query workflows across CROs and sites, reducing turnaround times and ensuring clean interim and final datasets.
- ◆ Support interim analyses and Data Safety Monitoring Board (DSMB) reviews by coordinating timely and accurate dataset delivery.
- ◆ Drive database lock readiness by reviewing audit trails, verifying lock criteria, and aligning cross-functional approvals.
- ◆ Maintain an inspection-ready Trial Master File (TMF), including finalized DMPs, UAT logs, validation records, and vendor communications.
- ◆ Track and report key performance indicators (KPIs) such as query aging, data entry lag, and vendor submission timelines; provide updates and dashboards to study leadership.
- ◆ Act as a primary liaison with CROs, Biostatistics, Medical Monitors, and Clinical Operations to resolve data issues and align on study milestones.

United Therapeutics

Clinical Data Manager

September 2022 – March 2024

Responsibilities:

- ◆ Served as lead data management contact for assigned studies, coordinating with CROs, Biostatistics, Clinical Operations, and Safety to align on data standards and ensure endpoint traceability from eCRFs to submission outputs.
- ◆ Contributed to protocol review and guided electronic Case Report Form (eCRF) design and annotation to ensure compliance with regulatory and CDISC/CDASH requirements.
- ◆ Led User Acceptance Testing (UAT) for mid-study amendments and database migrations, developing test scripts, validating reprogrammed edit checks, and ensuring inspection-ready documentation.

- ◆ Oversaw Serious Adverse Event (SAE) reconciliation and ensured alignment between the clinical and safety databases to support Data Safety Monitoring Board (DSMB) reviews and regulatory submissions.
- ◆ Applied risk-based data review strategies to identify protocol deviations, data gaps, and outliers; drove cross-functional resolution with CROs and internal teams.
- ◆ Collaborated with Biostatistics and Programming to validate derived endpoints and deliver clean interim datasets for submission and review meetings.
- ◆ Developed custom reconciliation trackers and review tools to streamline data review and reduce manual reconciliation cycles across functions.
- ◆ Contributed to startup efficiency by standardizing Data Transfer Agreement (DTA) templates, edit check libraries, and reconciliation logs across programs.
- ◆ Maintained audit-ready documentation including data transfer logs, validation evidence, and SAE reconciliation records in the Trial Master File (TMF).

Synchron Research Services
Clinical Data Associate

April 2020 - June 2022

Responsibilities:

- ◆ Participated in protocol review discussions and supported Case Report Form (CRF) annotation to ensure each field accurately reflected study requirements and captured endpoint data as intended.
- ◆ Assisted in edit check implementation and validation within the EDC system, contributing to logic review, issue tracking, and resolution under the guidance of senior data managers.
- ◆ Executed User Acceptance Testing (UAT) by running test scripts, documenting system issues, and confirming resolution prior to database Go-Live.
- ◆ Performed routine data cleaning tasks, including generating and tracking data queries, reviewing discrepancies, and updating issue logs to support data accuracy and timeliness.
- ◆ Monitored vendor data transfers via secure FTP (sFTP), verified successful delivery, and flagged inconsistencies for review and correction.
- ◆ Maintained essential Trial Master File (TMF) documents such as validation logs, edit check specifications, and UAT evidence to support audit readiness.
- ◆ Recorded data review findings and collaborated with internal teams to escalate unresolved issues and ensure timely resolution during ongoing study conduct.
- ◆ Supported serious adverse event (SAE) reconciliation activities by reviewing case narratives and verifying alignment between clinical and safety data.
- ◆ Assisted in tracking data management timelines and deliverables using Excel trackers and contributed to status updates for cross-functional meetings.
- ◆ Provided general study support during data lock preparations, including checklist completion, final query resolution, and documentation cleanup.

Synchron Research Services
Clinical Data Associate – INTERN

April 2019 - March 2020

Responsibilities:

- ◆ Assisted in reviewing source documents against eCRF entries to ensure accuracy and completeness.
- ◆ Supported data entry and validation within EDC systems under senior team supervision.
- ◆ Helped prepare CRF Completion Guidelines and maintained basic study documentation.

- ◆ Performed initial discrepancy identification and flagged data issues to the data management team for resolution.
- ◆ Participated in User Acceptance Testing (UAT) by executing predefined test scripts and logging outcomes.
- ◆ Assisted in organizing and maintaining the Trial Master File (TMF) for inspection readiness.

EDUCATION

- ◆ Master of Science in Healthcare Informatics | Sacred Heart University
- ◆ Bachelor of Science | Rajiv Gandhi University, Karnataka, India

CERTIFICATIONS

- ◆ Evaluations of AI Applications in Healthcare
