

CHAHITA KANUNGO

chahitakanungo22@gmail.com / 4843007713 / Phoenixville, PA 19460

Summary

Healthcare Data Analyst skilled in SAS, and R, with experience in Clinical Research, RBQM and Drug Safety. Proven ability to analyze trial data, support pharmacovigilance, and deliver insights through statistical analysis and data visualization.

Experience

Harrisburg University - Executive (Data Analytics) *03/2024 –Present*
Harrisburg, PA, USA

- Leveraged R for data preprocessing, build and evaluate predictive models to support data driven insights.
- Conducted hypothesis testing (ANOVA, t-test, Chi-square) and statistical analysis to identify trends and support decision making in healthcare analytics.
- Design dynamic dashboards using Tableau and created visualizations in R to evaluate trends in large scale datasets.

CluePoints - Associate Clinical Data Analyst (RBQM) *06/2022 - 03/2024*
King of Prussia, PA, USA

- Configured technical settings for clinical studies based on client requirements and analyzed clinical study data for anomalies via the Central Monitoring Platform, ensuring data integrity and accuracy.
- Developed and implemented interactive DQA and KRI dashboards using SAS to support Centralized Statistical Monitoring within RBQM framework for clinical trials.
- Collaborated with cross functional teams to ensure alignment on data review strategies.
- Leveraged SAS and SQL queries to preprocess and standardized clinical data from healthcare databases.
- Detected and flagged risk signals related to data discrepancies and site level performance issues, informing targeted risk management actions.
- Interpreted and analyzed data from multiple sources such as patient records, vendor systems and third-party data.

ICON plc - Clinical Trial Associate *09/2021 - 06/2022*
North Wales, PA, USA

- Collaborated closely with the data management group in the monitoring of clinical trial data and query resolution in the Rave electronic data capture (EDC) system.
- Performed eCRF review and query resolution against established data review guidelines in the data management system.
- Provided input on eCRF design and supported the clinical operations team with the ongoing conduct of clinical research studies.

Drexel University – Research Associate *10/2019 - 09/2021*
Philadelphia, PA, USA

- Worked on a project aimed at characterizing the urban landscape for the analysis of heat and mortality.
- Utilized R and ArcGIS Pro tools to create heat maps to perform qualitative, quantitative, and predictive data analysis.
- Developed a tool for characterizing landscape and structural housing characteristics that may impact urban heat vulnerability, using Google Street View.

METWorks Inc - Public Health Instructor (Internship) *06/2020-08/2020*
Philadelphia, PA, USA

- Worked with METWorks, a career development program that aimed to provide work experience and training for youth as part of the Philadelphia Youth Network's Work Ready program.
- Analyzed quantitative and qualitative data using epidemiologic research, methods, informatics, computer-based programming, and software.
- Developed detailed lesson plans and assignments for each week of teaching using audio-visual tools.

Lambda Therapeutic Research Ltd – Sr PV Executive *03/2017 - 01/2019*
Ahmedabad, India

- Assessed case safety reports (ICSRs) from various sources to ensure regulatory compliance and data quality.
- Managed safety management and signal detection processes in pharmacovigilance to identify and evaluate potential safety signals.
- Contributed to safety reports (signal detection, PSUR/PBRER), and SOP updates.
- Conducted literature reviews for pharmacovigilance compliance.

Tata Memorial Hospital - Clinical Research Fellow *12/2015 - 10/2016*
Mumbai, India

- Conducted and monitored oncology clinical trial-related activities according to the protocol and in compliance with GCP guidelines.
- Performed data management-related activities.

Skills

- Programming: SAS (certified), SQL and R.
- GIS tools: Spatial data analysis and mapping using ArcGIS Pro.
- Data Visualization: Designing dynamic dashboards and visualizations using Tableau.
- Public Health Analytics: Analyzing public health data for epidemiological studies, healthcare outcomes, and population health trends.

Education and Training

Masters in Data Analytics (Executive Format)
Harrisburg University of Science and Technology
Harrisburg, PA, USA

Masters in Public Health (MPH) (Environment and Occupational Health)
Drexel University
Philadelphia, PA, USA

Bachelor of Dental Surgery (BDS)
Rajasthan University of Health and Science
India

Certifications

SAS Certified Specialist: Base Programmer for SAS 9.4 - SAS Institute - 08/2025

SQL Essential Training - LinkedIn - 08/2024
