

Professional Summary

Business Data Analyst with 3+ years of experience in the IT Services and Healthcare sectors, specializing in data-driven decision-making, performance analytics, and regulatory compliance. Proven expertise in conducting EDA, root cause analysis, KPI tracking, and claims optimization using Python, SQL, and Power BI. Adept at building automated dashboards, validating ETL pipelines, and translating complex business requirements into actionable insights. Skilled in cross-functional collaboration, BRD/FRD documentation, and UAT planning aligned with Medicaid and HIPAA standards. Strong technical proficiency in SQL Server, SSIS, Excel, and CMS/EHR data systems with a consistent record of improving operational efficiency and clinical outcomes.

Technical Skills

Data Analysis & Statistics: EDA, Root Cause Analysis, KPI Tracking, Claims Optimization, Medicaid Regulatory Analysis, Trend Analysis, High-Cost Patient Segmentation, SLA Adherence Tracking
Programming & Scripting: Python, SQL, Advanced Excel, Python Scripting
Business Intelligence & Reporting: Power BI, SSRS, Dashboard Development, Interactive Visualizations, Automated Reporting, Client Onboarding Dashboards, Service Delivery Dashboards
Data Engineering & ETL: SQL Server, SSIS, ETL Pipeline Design, Data Pipeline Automation, Data Validation, CMS & EHR Data Integration, EDW
Business Analysis & Documentation: BRD/FRD Creation, Functional Specification Design, Requirements Gathering, Use Case Development, UAT Planning & Execution, Test Case Design, Regulatory Compliance Alignment
Tools & Platforms: JIRA, Microsoft Visio, CRM Systems, CMS Databases, HIPAA Compliance Tools, Azure DevOps, Microsoft Excel
Collaboration & Project Delivery: Cross-functional Team Collaboration, Stakeholder Management, Clinical Outreach Optimization, Care Coordination, Solution Architecture Liaison, Client Performance Tracking

Professional Experience

Business Data Analyst Centene, USA	Mar 2024 – Present
- Gathered and documented detailed business and data requirements from cross-functional stakeholders to design analytics solutions supporting Medicaid claims optimization. - Conducted exploratory data analysis (EDA) using SQL and Python (Pandas, NumPy) on member eligibility, service utilization, and claims data to identify high-cost patient segments. - Built interactive dashboards using Power BI to visualize trends in ER visits, inpatient admissions, and preventive care compliance across state programs, improving clinical outreach targeting by 30%. - Collaborated with data engineers to design and validate ETL pipelines pulling data from EHR systems, EDW, and external CMS databases, ensuring data quality and HIPAA compliance. - Defined and tracked KPIs including claim denial rates, average cost per member, and service utilization rates; automated weekly reports using Power BI and SSRS. - Partnered with care coordination teams to develop rule-based alerts for frequent utilizers and flagged patients for care management, leading to a 12% reduction in ER re-admissions. - Supported UAT and validation of dashboard features and business logic by creating test cases and aligning functionality with Medicaid regulatory reporting standards.	
Business Data Analyst Bytes Soft Solution, India	Nov 2019 – Nov 2021
- Collaborated with cross-functional teams to design and implement a client onboarding analytics dashboard that streamlined performance tracking for over 20 enterprise clients using Power BI and SQL. - Conducted in-depth data analysis and data quality checks on CRM and operational datasets using Excel, Python (Pandas), and SQL, ensuring 98% accuracy in client onboarding reports. - Designed and maintained KPI dashboards for service delivery metrics, tracking SLA adherence, incident resolution time, and resource utilization for IT-managed services clients. - Partnered with Business Analysts and Solution Architects to translate client requirements into functional specifications, generating detailed BRDs/FRDs for internal development teams. - Created automated data pipelines and reporting frameworks using SQL Server and SSIS, reducing manual reporting efforts by 40%. - Performed root cause analysis of client onboarding delays and recurring service issues, identifying process gaps and recommending workflow enhancements using Visio and JIRA. - Assisted in UAT planning and execution, validating data outputs, documenting test cases, and working with stakeholders to finalize system enhancements.	

Education

Masters of Science Manipal, India	Oct 2017 – Aug 2019
Bachelors of Science Osmania University, Hyderabad, India	Jun 2014 – Apr 2017
