Summary

- Software Engineer with hands-on experience in developing RESTful APIs, building scalable and reliable applications. Proficient in Java, JavaScript (React, AngularJS), C#, and database systems. Passionate about continuous integration and delivering high-performance solutions.

Education

University of Central Florida

Jan 2024 – Expected Dec 2025

Master of Science in Computer Science, GPA: 4.0/4.0

Orlando, FL

- Coursework: Advanced Computer Architecture, Design and Analysis of Algorithms, Data Mining II, Machine Learning

Sastra Deemed University

July 2018 – June 2022

Bachelor of Technology in Electronics and Communication Engineering, GPA: 3.7/4.0

Hyderabad, TS

- Coursework: Data Structures, OOP, Digital Communication, Python Programming, Computer Organization, DBMS

Skills

Programming/Databases: Java, Python, C#, JavaScript, TypeScript, SQL (MySQL)

Frameworks/Libraries: ASP.NET MVC, .NET Core, AngularJS, ReactJS, jQuery, SpringBoot, Pytorch

Web Services/Technologies: RESTful APIs, API Development, JSON

Cloud & DevOps: Azure DevOps, Docker, Kubernetes, CI/CD

Development Methodologies: Agile (Scrum, SAFe), SDLC, **Continuous Integration (CI) / Continuous Deployment (CD)**, Git

Professional Experience

University of Central Florida

Jan 2024 – Present

Software Engineer -Graduate Assistant

Orlando, FL

- Led development of Knowledge Base Website using ASP.NET Web Forms and C#, **enhancing performance by 60%**.
- Developed an ASP.NET MVC application integrating the Qualtrics API using C#, automating CSV exports and **reducing manual effort by 80%**. Migrated legacy systems at UCF to .NET MVC.
- Directly transferred data from **SAS to SQL**, ensuring 99.9% data integrity and improving query efficiency by 60% through dynamic stored procedures.
- Integrated **Qualtrics surveys** into web applications, maintaining 100% responsive design across devices, utilizing **ReactJS** for front-end development.

Itron

Aug 2022 – Dec 2023

Software Engineer

Bengaluru , India

- Automated UI and API testing using Playwright Framework in Angular, **ensuring 95% test coverage** for IEE EdgeExplorer2 web screen, improving system stability and performance.
- Executed API test automation using Postman and Playwright Framework, validating API requests for GET, POST, UPDATE, and DELETE operations on data points, **improving data integrity by 98%**.
- Contributed as a member of an **Agile Scrum team**, delivering high-quality, scalable software solutions on time.
- Built and optimized UI components in **AngularJS** for data visualization, improving performance by 40
- Developed and optimized **.NET Core REST APIs** in **C#** with server-side pagination, improving API response time by 50% and enhancing overall system performance.
- Enhanced CI/CD workflows with **Azure DevOps**, Git, and Docker, improving deployment efficiency by 60

IBM

Jan 2022 – Jul 2022

Application Developer Intern

Bengaluru, India

- Leveraged SAP BODS (Business Object Data Services), an ETL tool, to integrate and migrate data, ensuring high-quality results.
- Gained comprehensive knowledge and practical experience in SAP BODS, optimizing data integration processes and streamlining workflows.
- Acquired proficiency in SQL and data warehousing concepts, enabling efficient data management and analysis.

Project Experience

FocusFetch: Precision Content Curation | Python, TensorFlow, NLP, Flask, React.js

Jan 2024 – Apr 2024

- Developed a Flask and React.js content curation platform, enhancing personalization and user engagement by 40%.
- Leveraged TensorFlow for NLP models, increasing content recommendation accuracy by 30%.
- Enhanced system efficiency by integrating advanced data extraction, reducing aggregation time by 50%.
