

SUMMARY

Business Analyst with 3 years of experience delivering data-driven solutions using methodologies like SDLC, Agile/Scrum, and Waterfall. Skilled in Python, SQL, and database management (SQL Server, Oracle, MySQL), with expertise in creating impactful dashboards using Tableau and Power BI. Proficient in documentation (FRD, BRD, SRS, Use Cases) and analysis techniques, including GAP, SWOT, and Risk Analysis. Experienced with ERP systems (Oracle ERP, SAP ERP), project management tools (MS Project, SharePoint), and process modeling (Visio, Lucid chart). Strong communicator with a focus on stakeholder collaboration and driving process improvements.

SKILLS

Methodologies: SDLC, Agile/Scrum, Waterfall
Languages: Python, SQL
Documentation: FRD, BRD, SRS, Use Cases, User Stories
Project Management Tools: MS Project, MS Excel, MS SharePoint
Visualization Tools: Tableau, Power BI
Analysis Skills: Cost/Benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis, Quantitative Analysis,
Tracking/Other Skills: Jira, Microsoft Visio, HP Quality Center, Rational ClearQuest, JAD, RTM, UAT
Database Management: SQL Server, Oracle, MySQL
ERP Systems: Oracle ERP, SAP ERP
Business Intelligence: Data Analysis and Visualization with Tableau, Power BI, and Qlik
Process Modeling: BPM tools like Microsoft Visio, ARIS, or Lucid chart
Soft Skills: Communication, Stakeholder Management, Teamwork, Adaptability
Operating System: Windows, Linux

EDUCATION

Master in Business Analytics DePaul University, Chicago, IL	June 2024
Bachelor in Mechanical Engineering St. Martin’s Engineering College, India	Dec 2020

EXPERIENCE

PNC Financial Services, IL | Dec 2023 - Current | Business Analyst

- Collaborated with cross-functional teams using Agile methodologies, Scrum, and SDLC, facilitating effective sprint planning and stakeholder alignment, which reduced project cycle time by 20%.
- Developed detailed Functional Requirement Documents (FRD), Business Requirement Documents (BRD), and Use Cases by conducting stakeholder interviews and workshops, streamlining requirements gathering, and reducing rework by 15%.
- Created and maintained real-time dashboards in Tableau and Power BI by extracting data from SQL Server, providing actionable insights that enhanced decision-making accuracy by 25%.
- Managed and optimized data pipelines using SQL Server and Oracle, implementing ETL processes to ensure 99% data accuracy and reliability for business intelligence initiatives.
- Performed Cost/Benefit Analysis and GAP Analysis by analyzing project data and stakeholder feedback, identifying \$1.5M in potential cost savings across various projects.
- Leveraged MS Project and MS SharePoint to track project milestones, improve collaboration, and achieve a 30% improvement in task completion rates.
- Utilized BPM tools like Microsoft Visio and Lucid chart to map workflows, identify bottlenecks, and improve process efficiency by 10%.

Infinite Infolab, India | Jan 2021 – Dec 2022 | Business Analyst

- Delivered 12+ projects on time and within budget by applying Waterfall methodologies, developing comprehensive project schedules, and ensuring strict adherence to timelines, achieving a 95% client satisfaction rate.
- Designed detailed Software Requirement Specifications (SRS) and User Stories by collaborating with stakeholders and conducting gap analysis, which reduced requirement gaps by 20%.
- Developed interactive dashboards using Qlik by integrating data from ERP systems, increasing operational visibility for leadership teams by 30%.
- Conducted SWOT Analysis and Risk Analysis by evaluating project dependencies and market risks and implementing mitigation plans that saved \$500K in project costs.
- Enhanced operational workflows by optimizing ERP systems (SAP ERP, Oracle ERP) through process automation, increasing team productivity by 18%.
- Automated MySQL data management processes by implementing Python scripts, reducing manual effort by 25% and improving data processing speeds by 40%.
- Facilitated User Acceptance Testing (UAT) and created a comprehensive Requirement Traceability Matrix (RTM) by working closely with QA teams to ensure 100% project traceability.
- Tracked and resolved project issues using Jira and Rational ClearQuest, setting up automated tracking systems that reduced issue resolution times by 35%.
- Provided training and support to stakeholders by creating user guides and conducting workshops, which improved user adoption rates for new systems by 20%.

PROJECT

Capstone Project: Data-Driven Business Optimization for Skyline Design

Led as Lead Business Analyst, utilizing Excel, RStudio, and Tableau to optimize staffing models, refine marketing strategies, and analyze profitability, providing actionable insights and ensuring high data accuracy to drive business improvements.
