PROFESSIONAL SUMMARY

Result-driven Automation Engineer with 7+ years of expertise in designing and maintaining scalable test automation frameworks across mobile, API, and web platforms. Specialized in **API validation**, **contract/schema testing**, and **secure authentication flows (OAuth2.0, JWT)** with hands-on exposure to **biometric-style enrollment and verification scenarios**. Built end-to-end automation solutions with **Appium (Java)**, **REST Assured**, **Postman**, **Selenium**, **Katalon**, ensuring quality, compliance, and faster release readiness in regulated environments. **Cut regression cycles by 40%** by implementing CI/CD automation with **GitLab**, **Jenkins**, **Docker**, and executing test suites on **AWS Device Farm**, **BrowserStack**, and **EPAM Mobile Cloud**. Applied **BDD/TDD methodologies (Cucumber, Gherkin, TestNG, JUnit)** with a strong focus on **traceability**, **validation testing**, and **regulatory audits**. Collaborated in **Agile/SAFe environments**, standardizing **automation best practices** to accelerate release velocity and product quality.

SKILLS

- **Automation Tools & Frameworks:** Appium, Selenium, Katalon Studio, REST Assured, TestNG, JUnit, JMeter, Serenity BDD, Cypress, Playwright, Cucumber, Pytest, Jest, Allure, Extent Reports
- **Programming & Scripting:** Java, Groovy, Python, SQL, Bash/Shell, YAML, Kotlin, Gherkin, JavaScript, TypeScript
- **API & Backend Testing:** Postman, REST APIs, API Contract & Schema Validation, OAuth2.0, JWT, SQL Validation, PostgreSQL, Oracle, Data Parsing, API Authentication & Security Testing
- **CI/CD & DevOps Tools:** GitLab CI/CD, Jenkins, Maven, Docker, CircleCI, AWS Device Farm, BrowserStack, EPAM Mobile Cloud, AWS, Azure, GCP
- **Testing Practices & Methodologies:** BDD, TDD, Page Object Model, Keyword-Driven Frameworks, Regression & Validation Testing, Root Cause Analysis, Agile, SAFe, Authentication & Biometric-style flows, Shift-Left Testing, Exploratory Testing
- **Platforms & Tools:** Ubuntu, Polarion ALM, iPaaS, TDX, Jira, Git, Espresso, SwiftUI/XCTest
- **Reporting & Monitoring:** Custom Docker-based reporting, Serenity HTML Reports, log4j logging, Test Data Management

EDUCATION

Saint Louis University
Master's, Computer Science
• **GPA:** 3.82

Aug 2023 - Mar 2025

Usha Rama College of Engineering and Technology
Bachelor's, Information Technology
• **GPA:** 8

Jul 2015 - May 2019

PROFESSIONAL EXPERIENCE

Saint Louis University
Automation Engineer

Jun 2024 - May 2025
St. Louis, MO, USA

- Spearheaded API-driven automation workflows on an **iPaaS** platform, integrating **Okta**, **TDX**, and **Banner** to automate user deactivation, ticketing, and notifications, cutting manual effort by **60%**.
- Engineered scalable **REST-based automation scripts** to improve cross-system reliability and ensure accurate, traceable integrations.
- Strengthened release quality by building validation suites with **response verification**, **error handling**, and automated test data management.
- Implemented **cron-based scheduling** to ensure on-time execution of daily and weekly compliance workflows.
- Enhanced monitoring and reduced debugging time by **40%** through **log4j-based logging** and error tracking.
- Documented automation workflows and integration results for internal audits and stakeholder reviews, ensuring traceability and compliance visibility across departments.

EPAM Systems | Client: Clario Clinical R&D Platform (Healthcare & Life Sciences Domain) **Jan 2021 - Jun 2023**
Software Development Engineer in Test *Hyderabad, TG, India*

- Delivered 80+ automated test cases across mobile, web, and API channels for the **Clario Clinical R&D Platform** using **Appium (Java)**, **REST Assured**, **Postman**, **Selenium**, **Playwright**, and **Cypress**, strengthening regression coverage and reducing manual validation effort by **60%**.

- Engineered and optimized a hybrid POM + Keyword-driven automation framework in **Katalon Studio (Groovy/Java)** with **Docker-based reporting**, improving test traceability and accelerating validation approvals.
- Cut regression feedback cycles by **40%** by implementing **GitLab CI/CD** pipelines to execute mobile, API, and web suites in parallel across real-device and browser clouds.
- Enhanced cross-platform reliability by executing tests on **EPAM Mobile Cloud, BrowserStack**, and emulators/simulators, stabilizing selectors through accessibility identifiers.
- Partnered with Android and iOS development teams to integrate **Espresso** and **SwiftUI/XCTest** identifiers into Appium scripts, expanding device coverage and increasing test stability.
- Verified backend data integrity by validating API responses against **PostgreSQL** and **Oracle** databases, ensuring end-to-end consistency in clinical data flows.
- Ensured regulatory compliance by maintaining full test traceability in **Polarion ALM** and executing validation cycles aligned with audit and **FDA documentation** standards.
- Delivered hands-on **Appium training sessions** for new QA team members, standardizing mobile automation practices and accelerating onboarding to improve overall test delivery consistency.
- Supported **Agile/SAFe** delivery by translating business requirements into automated test assets, driving sprint quality objectives and ensuring defect-free releases.

EPAM Systems

Sep 2019 - Dec 2020

Junior Software Development Engineer in Test

Hyderabad, TG, India

- Developed a mobile automation framework for EPAM's internal **Connect application** using **Appium** with **Page Object Model (POM)**, improving modularity and reducing maintenance effort by **35%**.
- Integrated **Serenity BDD** to generate detailed HTML reports with step-level traceability, enhancing test transparency and debugging speed.
- Executed mobile regression suites on real devices and emulators, identifying UI inconsistencies and performance bottlenecks before production release.
- Collaborated with developers and QA peers in a 4-member **Agile** team to expand automation coverage and align sprint deliverables with release timelines.
- Transitioned to the **Clario Clinical R&D Platform (Healthcare & Life Sciences Domain)** in Mar 2020, leading the mobile automation integration into an existing **Katalon (Groovy/Java)** framework.
- Enabled cross-device execution through **EPAM Mobile Cloud**, expanding testing coverage across a real-device matrix and improving release confidence.
- Developed **BDD-style automated test suites for mobile, API, and web layers**, ensuring compliance with clinical validation and regulatory QA standards.
- Supported **Agile ceremonies** like backlog grooming, sprint planning, and retrospectives to refine QA estimation, improve velocity, and maintain high-quality sprint deliverables.

UR2D

May 2017 - May 2019

Software Development Intern

- Assisted in developing a **Java-based inventory tracking tool**, providing automated data validation and basic reporting features that became part of the production workflow.
- Collaborated with senior engineers to optimize **SQL** queries for existing analytics dashboards, achieving a noticeable improvement in speed during routine business reporting.
- Supported the migration of internal data backups from on-premises servers to **AWS S3**, successfully verifying data integrity and learning best practices in cloud architecture.
- Built simple automation scripts with **AWS Lambda** to streamline monthly data transfer tasks, reducing manual effort and errors.
- Contributed to weekly team stand-ups, shared progress updates, and proactively learned about software deployment pipelines, including hands-on exposure to **AWS CodePipeline**.
- Documented technical processes, created user guides for junior staff, and presented an intern project demo highlighting process improvements to supervisors.

CERTIFICATIONS

- **LambdaTest Software Testing Professional Certificate:** LambdaTest: Validated cloud-based automation expertise in parallel execution, cross-browser, and mobile testing using the LambdaTest grid.
- **Certified SAFe® 5 Practitioner:** Scaled Agile, Inc.: Trained in Agile methodologies, program increment (PI) planning, and cross-team collaboration within SAFe frameworks.
- **Mobile Testing with Appium:** LinkedIn Learning: Gained hands-on experience automating functional tests for Android and iOS applications.
- **JMeter: Performance and Load Testing:** LinkedIn Learning: Learned designing, executing, and analyzing load and stress tests using JMeter.
- **Performance Testing Foundations:** LinkedIn Learning: Covered key concepts of performance engineering, bottleneck analysis, and system optimization.
