EDUCATION

Western Governors University

Master of Science in Software Engineering - Domain Driven Design

Millcreek, UT

Jun. 2025 - Present

California State University, Northridge

Bachelor of Science in Computer Science, Cumulative GPA: 3.31

Northridge, CA

Aug. 2021 - Dec. 2024

- **Relevant Coursework:** Algorithms, Database Design, Software Engineering, Operating Systems, Web Engineering, Object-Oriented Design

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Java, SQL, Rust, Scala, C#, C++, Swift

Frameworks: React, Angular, Next.js, Node.js, Flask, Spring Boot, .NET, PyQt5

Databases & Cloud: PostgreSQL, MySQL, Firebase, Supabase, AWS, Docker

Tools: Git, Figma, Visual Studio Code, IntelliJ IDEA, Postman, Power BI

PROJECTS

Spotly | *React Native (Expo), TypeScript, Spring Boot, Firebase*

Aug. 2025 – Present

- **Developed a cross-platform social discovery app** enabling users to share and explore local hangout spots, integrating Firebase authentication and Spring Boot APIs.
- **Architected scalable backend endpoints** in Spring Boot with optimized query handling and user-based content filtering.
- **Designed and implemented responsive UI components** using React Native and TypeScript to enhance user interaction and navigation.

DriverHub Analytics | *Angular, FastAPI, Supabase/Postgres*

Sept. 2025 – Present

- **Built an analytics web app** to visualize real-time Formula 1 driver data with dynamic filtering and charting through Angular.
- **Developed RESTful APIs** using FastAPI for high-speed data aggregation and optimized PostgreSQL queries.
- **Implemented Supabase authentication and caching** layers to streamline performance and secure data access.

FPP + Proteus Compiler | *Scala, FPP, Proteus*

Sept. 2023 – May. 2024

- **Built a workflow compiler** that auto-generates F Prime Prime and Proteus code from a unified source, reducing redundancy in mission-critical aerospace software.
- **Implemented core compiler stages**—Tokenizer, Parser, and Code Generator—in Scala 3 to ensure accurate and efficient code generation.
- **Collaborated with the ARCS CSUN research team** via Git-based development and code reviews to produce maintainable and high-quality deliverables.

EXPERIENCE

CSUN University Student Union

Student Administrative Support Assistant II

Northridge, CA

Oct. 2023 – Jan. 2025

- **Optimized technical workflows** by automating weekly reporting and data collection, reducing administrative time by 30%.
- **Developed internal scripts and tools** for task tracking and system documentation, improving team coordination and visibility.
- **Mentored and trained 13 student technicians** to deliver consistent, high-quality tech support for 200+ lab users weekly.

Student Computer Lab Technician

Oct. 2022 – Oct. 2023

- **Provided front-line technical support** to 35+ users weekly, diagnosing and resolving software and hardware issues.
- **Maintained and monitored systems**, ensuring 100% uptime across 50+ workstations and printing equipment.
- **Documented recurring issues and resolutions** to streamline future troubleshooting and reduce downtime.

CSUN Student Housing

Residential Advisor

Northridge, CA

Jul. 2023 – May. 2024

- **Supported and advised 30+ residents**, fostering a community centered on collaboration, safety, and academic success.
- **Planned and coordinated 5+ events** focused on engagement and teamwork, improving resident satisfaction.
