Summary

Versatile Full Stack Developer with expertise in Java, JavaScript, TypeScript, Python, and Go, experienced in building scalable web and mobile applications using Angular, React.js, Spring Boot, Node.js, and Xamarin. Proficient in RESTful APIs, WebSockets, PostgreSQL, MySQL, AWS, Docker, and Kubernetes, with strong skills in authentication, CI/CD, and real-time data processing. Passionate about developing AI-driven solutions and optimizing performance in agile environments.

Education

Master of Science, Computer Science | University of North Texas, Denton, Texas

Dec 2024

- Relevant Courses: Software Engineering, Big Data, Machine Learning, Software for AI, Computer Networks, Computer Algorithms, Natural Language Processing.

Bachelor of Technology, Computer Science | RISE Krishna Sai Group of Institutions, Ongole, India

May 2020

- Relevant Courses: C Programming, Object Oriented Programing, Cloud Computing & IOT, Big Data Analytics, Computer Networks.

Technical Skills

- **Programming Languages:** Java, JavaScript, TypeScript, Python, C#, PHP, Go
- **Frontend:** Angular, React.js, HTML5, CSS3, Bootstrap, jQuery, Xamarin, WPF
- **Backend:** Spring Boot, Node.js, Express.js, PHP
- **Database Management:** PostgreSQL, MySQL, SQLite, MongoDB
- **API & Real-time Communication:** RESTful APIs, WebSockets, GraphQL
- **Security & Authentication:** JWT, OAuth2, Spring Security, Role-Based Access Control (RBAC)
- **Cloud & DevOps:** AWS (S3, EC2), Docker, Kubernetes, Jenkins, GitHub Actions
- **Messaging & Event Streaming:** Kafka, ActiveMQ, Firebase Cloud Messaging (FCM)
- **Machine Learning & Data Processing:** NLP, Naïve Bayes, Recurrent Neural Networks (RNN)
- **Testing & Agile Development:** JUnit, Jasmine, Manual Testing, CI/CD Pipelines, Agile (Scrum)

Professional Experience

Software Engineer | NeuroLeap Corp, CA, USA

Sep 2024 – Feb 2025

- Developed and maintained the Children's Profile Module and Language Screening Test, enabling secure user profile management and AI-driven language proficiency assessments.
- Built dynamic frontend UI components using Angular (TypeScript), improving user experience and accessibility.
- Designed and implemented RESTful APIs with Spring Boot (Java) for seamless data flow between frontend and backend.
- Integrated Go-based microservices to optimize real-time data processing for language assessments.
- Utilized WebSocket's in Go to provide instant feedback on test performance, reducing assessment time by 40%.
- Implemented JWT-based authentication with Spring Security, ensuring secure role-based access control.
- Used PostgreSQL and optimized queries for structured data storage, improving database response times.
- Enabled CSV and PDF report generation using Spring Boot and Apache POI, streamlining report creation.
- Integrated into AWS S3 for storing test reports, ensuring secure and scalable data management.
- Automated testing and deployment with CI/CD pipelines using GitHub Actions, reducing deployment time.
- Conducted unit and integration testing with JUnit and Jasmine, reducing defects by 30%.
- Worked in an Agile Scrum environment, collaborating with cross-functional teams for sprint planning and development.

Environment: Angular (TypeScript), Spring Boot (Java), Go, PostgreSQL, pgAdmin, RESTful APIs, WebSockets, JWT, Spring Security, AWS (S3, EC2), Docker, Kubernetes, JUnit, Jasmine, CI/CD with GitHub Actions, Agile (Scrum).

Full Stack Developer | Snovasys Software Solutions India Pvt Ltd, Ongole, India

Jan 2019 – Dec2022

- Developed and maintained a cross-platform application using Angular (TypeScript) for web and Xamarin (C#) for mobile, ensuring seamless user experience across devices.
- Designed and implemented Windows desktop applications using WPF (C#) with MVVM architecture, enhancing UI responsiveness and maintainability.
- Designed and optimized RESTful APIs with Spring Boot, Hibernate, and MySQL, improving application performance by 40%.
- Implemented role-based access control (RBAC) and secure authentication using Spring Security, JWT, and OAuth2, enhancing security and user management.
- Developed a real-time messaging and notification system using WebSockets and Firebase Cloud Messaging (FCM), enabling instant communication across web and mobile apps.
- Built a time-tracking and activity monitoring module using Angular, RxJS, and MySQL, automating employee work logging and reporting.
- Designed and implemented a project management module with task assignments, file sharing, and real-time collaboration, leveraging Spring Boot and MySQL.
- Developed offline support and real-time data synchronization in the mobile app using Xamarin (C#) and SQLite, ensuring smooth functionality even without an internet connection.
- Integrated push notifications, email alerts, and SMS notifications using Kafka, ActiveMQ, and Firebase Cloud Messaging (FCM) for real-time event tracking.
- Automated CI/CD pipelines using Jenkins, Docker, and Kubernetes, reducing deployment time by 50% and ensuring smooth application updates.
- Optimized database performance by fine-tuning MySQL queries and implementing indexing strategies, improving response times and scalability.

Environment: Angular, TypeScript, Spring Boot, Hibernate, MySQL, SQLite, Xamarin (C#), WPF, WebSocket's, Firebase Cloud Messaging (FCM), Spring Security, JWT, OAuth2, Kafka, ActiveMQ, Jenkins, Docker, Kubernetes.

Web Developer (Internal Project) | RISE Krishna Sai Group of Institutions, Ongole, India

Feb 2018 – Dec 2018

- Developed an internal college portal using HTML, CSS, JavaScript, and PHP, improving user experience for students and faculty.
- Optimized key system modules, including Home, Academic Details, Course Details, and Facilities, leading to a 20% improvement in user satisfaction and site performance.
- Designed and developed responsive UI components, ensuring cross-device compatibility for seamless access on desktops, tablets, and mobile devices.
- Built a secure backend system with PHP and MySQL, efficiently managing user authentication, academic records, and portal operations.
- Enhanced navigation flow and interaction design, making the portal more intuitive and user-friendly for students and staff.
- Conducted testing and debugging, improving system stability and reliability, reducing downtime, and ensuring a smooth user experience.

Environment: PHP, JavaScript, HTML5, CSS3, jQuery, MySQL, REST APIs, Visual Studio Code, GitHub, Manual Testing, Agile.

Academic Projects

Locate A Doctor

- Developed Locate A Doctor an online healthcare business by incorporating symptom recognition as well as disease diagnosis techniques using JavaScript Node.js and Python; which helped to increase patients' response rate by 40%.
- Implemented React.js and MongoDB-based key appointment features: Appointment creation, rescheduling and cancellation. Combined improved operational speed by 30% and received 35% fewer complaints on UI clutter.

NextGen Commerce: Revolutionizing Online Shopping Experiences

- Spearheaded the development of an e-commerce platform using React JS, Node.js, and MongoDB, creating a scalable and user-friendly interface.
- Key functionalities included personalized product recommendations, seamless checkout processes, and real-time inventory management.

Analyzing Social Media Data Using Machine Learning Techniques

- Analyzed Twitter data using machine learning techniques like Naive Bayes and RNN for sentiment analysis; extracted subjective information to monitor public sentiment on products and services.
- Collected diverse tweets using Python and Twitter API, cleaned and preprocessed data, and applied sentiment analysis algorithms to categorize emotions and gain insights into public attitudes.
