SUMMARY

Business Analyst experienced in streamlining processes and enhancing operational efficiency. Proficient in SQL, process documentation, and gap analysis with a proven track record of improving data accuracy and reducing system escalations. Adept at gathering requirements and developing clear user stories, aiming to leverage strong analytical skills to support effective business solutions.

EDUCATION

University of Central Missouri

Master's Degree, Computer Science

Present

- **GPA:** CGPA-3.60
- **Coursework:** Data Structures, Algorithms, Database Management System, Data Visualization

WORK EXPERIENCE

Citi

Business Analyst

Feb 2024 - Present

New York

- Analyzed complex financial data and market trends using Python and Bloomberg Terminal to support high-value investment decisions and improve portfolio strategies.
- Facilitated stakeholder meetings to elicit and document business requirements for trading and risk systems, resulting in a 25% reduction in system-related escalations.
- Automated regulatory and performance reporting using SQL Server and Tableau, reducing manual effort by 40% and increasing data accuracy.
- Conducted market research and competitor analysis to identify new investment opportunities, contributing to a 12% growth in deal flow.
- Developed compliance documentation and workflows aligned with SEC, FINRA, and Basel III standards, ensuring audit readiness and regulatory adherence.
- Created BRDs, FRDs, and UAT test cases in JIRA and Confluence to support system enhancement delivery through structured SDLC processes.
- Facilitated cross-functional workshops to align business goals with technology solutions, accelerating project delivery and ensuring clear translation of objectives into actionable specifications.
- Monitored KPIs and risk metrics within Salesforce and internal systems to recommend process optimizations that improved operational efficiency by 18%.

Wipro

Business System Analyst

May 2021 - Jul 2023

Hyderabad, India

- Analyzed business workflows across finance, healthcare, and retail projects to improve overall process efficiency by 35%.
- Developed test plans and led UAT sessions with business users using Selenium and Microsoft Project, contributing to stable releases with 98% defect-free outcomes.
- Documented and created clear process flow diagrams and wireframes using Visio and Lucidchart to translate business requirements into actionable specifications.
- Managed data migration activities using ETL tools and performed data quality assessments on MySQL and PostgreSQL databases, ensuring 99.9% data accuracy during system cutovers.
- Coordinated data migration for 5 large-scale clients, ensuring consistent data accuracy during transitions by leveraging MySQL, PostgreSQL, and ETL tools.
- Reduced reporting time for executives by 60% by building interactive dashboards using Power BI and Oracle BI, providing real-time business insights.
- Trained over 200 users and provided comprehensive user manuals via SharePoint, achieving a 90% adoption rate within the first month of system rollout.
- Identified cost-saving opportunities by analyzing process gaps, resulting in approximately \$500K in annual savings.
- Collaborated with developers and product teams in Agile sprints to ensure that technical solutions met real business needs in accordance with SDLC and business analysis principles.

ACADEMIC PROJECTS

Uber Trip Analysis Dashboard | Tools: Power BI, Excel, DAX, Power Query

- Developed an interactive Power BI dashboard to analyze Uber trip data, focusing on ride frequency, revenue trends, and popular pickup locations.
- Cleaned and transformed raw data using Power Query, and created dynamic visuals with DAX to highlight key metrics like average fare, total trips, and peak hours.
- Enabled drill-through filters for city-wise and time-based analysis, helping stakeholders identify patterns and optimize operations.

E-Commerce Order Management System

- Created BRD, FRD, wireframes, and use case diagrams for an online order workflow.
- Managed epics and user stories in Jira and wrote UAT test cases to validate key features like order placement, tracking, and inventory updates.

SKILLS

- **Methodologies:** Agile, SDLC, Waterfall
- **Programming & Scripting:** Python, R, SQL, Scala
- **Data Analysis & Visualization:** Power BI, Tableau, Pandas, NumPy, Matplotlib, Seaborn, SciPy, Scikit-learn, TensorFlow
- **Databases & Data Management:** MySQL, PostgreSQL, SQL Server, Oracle, ETL, Data Warehousing
- **ERP & Financial Systems:** PeopleSoft Campus Solutions
- **Big Data & Cloud Platforms:** Databricks, AWS, Azure, GCP
- **Business & Process Analysis:** GAP Analysis, Cost-Benefit Analysis, SWOT, Risk & Impact Analysis, Process Modeling
- **Documentation & Requirements Management:** BRD, FRD, SRS, Use Cases, User Stories, RTM
- **Testing & QA:** UAT, Test Case Design, HP Quality Center, Postman
- **Tools & Platforms:** Jira, Microsoft Visio, HP Quality Center, JAD, UAT, Microsoft Office Suite
- **Development & Version Control:** Git, GitHub, GitLab, PyCharm, Jupyter Notebook
- **Core Competencies:** Data Wrangling, Data Cleaning, Critical Thinking, Problem Solving, Communication & Presentation, Analytical Skills
- **Operating Systems:** Windows, Linux, macOS

CERTIFICATIONS

- **Business Analysis Foundation:** LinkedIn Learning
- **AWS Cloud Practitioner:** Amazon Web Services
