

Chandana Reddy

Data Analyst

chandanaadla.3@gmail.com | +1-940-843-8853

OBJECTIVE

Analytical and detail-oriented Data Analyst transforming complex data into clear, actionable insights to support business strategy and performance optimization. Adept in SQL, Python, Power BI/Tableau, and Excel for data analysis and visualization, with hands-on experience working with cloud data platforms like AWS and Azure. Seeking to contribute strong data storytelling, statistical analysis, and reporting capabilities in a dynamic environment to drive informed decision-making and operational efficiency.

EXPERIENCE

Data Analyst

Asurion |

May 2024– Present

- Analyzed over 5 million customer support ticket records using SQL and Python (Pandas, NumPy) to identify operational inefficiencies and support strategic decisions.
- Built and maintained interactive Tableau and Power BI dashboards that visualized agent performance, ticket resolution trends, and customer satisfaction metrics, enabling real-time insights for managers.
- Conducted root cause analysis on escalation patterns, identifying top issue drivers and reducing escalations by 25% through process recommendations.
- Led a project to optimize resolution workflows, which decreased average ticket resolution time by 18% and improved CSAT by 12% over 6 months.
- Automated KPI reporting using Python scripts, saving over 6 hours/week of manual work and improving reporting accuracy and consistency.
- Collaborated cross-functionally with Product, Engineering, and Support teams to translate data insights into action plans and drive continuous improvement.
- Worked in a cloud data environment (Snowflake) and used JIRA for sprint-based task tracking, integrating analytics tasks into Agile workflows.

Accenture– Hyderabad, India

Data Analyst

May 2021 – June 2023

- **Business Requirements & Reporting:** Gathered and validated stakeholder requirements; built 30+ self-service dashboards in Power BI and Tableau to track KPIs across finance, operations, and sales
- **Data Extraction & Transformation:** Wrote complex SQL (T-SQL/PL/pgSQL) queries against SQL Server and Snowflake; automated data pulls with Python (Pandas) and Alteryx workflows
- **Statistical Analysis & Modeling:** Performed cohort analyses, A/B tests, and regression modeling in R and Python (SciPy, StatsModels) to inform pricing and customer retention strategies
- **Ad-hoc Analysis & Excel Automation:** Built advanced Excel models (PivotTables, Power Query, VBA macros) to support quarterly business reviews and scenario planning
- **Collaboration & Documentation:** Partnered with product, marketing, and finance teams; documented data dictionaries and data-flow diagrams in Confluence and Visio
- **Data Quality & Governance:** Implemented data-validation scripts in Python; monitored data accuracy using Great Expectations and generated automated data-quality reports

TECHNICAL SKILLS

- **Programming & Analysis:** SQL (T-SQL, PL/pgSQL), Python (Pandas, NumPy), R, SAS
- **BI & Visualization:** Power BI, Tableau, Looker, QlikView, Excel (Pivot Tables, Power Query, VBA)
- **Data Warehousing & Storage:** Snowflake, Azure Synapse, AWS Redshift, SQL Server, BigQuery
- **ETL & Orchestration:** Azure Data Factory, SSIS, Informatica, Talend, Alteryx, Apache Airflow
- **Statistical & ML Libraries:** Scikit-learn, StatsModels, TensorFlow (basic), R packages (tidyverse, caret)
- **Version Control & Collaboration:** Git/GitHub, Jira, Confluence, Microsoft Visio
- **Cloud Platforms:** Azure, AWS, GCP (production analytics environments)
- **Miscellaneous:** APIs/REST for data ingestion, VBA for Excel automation, Linux/Bash scripting for ad-hoc tasks

ACADEMIC PROJECTS

Predictive Analytics for Law Enforcement – Austin, TX

- Leveraged **big data processing** to analyze over **380,000+ police incident records**, applying **advanced analytics** to predict report generation likelihood using **XGBoost** (AUC = 0.85)
- Developed machine learning pipelines using **Logistic Regression, Random Forest**, and **XGBoost**, enabling effective triage and resource prioritization
- Applied **data preprocessing techniques** (ADASYN, encoding, imputation) to enhance model performance and handle data imbalance
- Delivered data-driven insights through **data visualizations**, reducing manual analysis workload by **35%** and supporting faster operational decision-making

Crime Pattern Visualization – Los Angeles

- Created interactive dashboards in Tableau and SQL-based reports for crime trend analysis by location and demographics.

EDUCATION

University of North Texas, Denton, TX

Master of Science in Advanced Data Analytics

Aug 2023 – May 2025

Relevant Courses: Big Data Analytics, Data Visualization, Database Systems, Programming for Business Analytics, Web-Based Systems Development, Information Security Management

Jawaharlal Nehru Technological University, Hyderabad, India

Bachelor of Technology in Electronic Engineering and Computer Sciences

Aug 2018 – July 2022

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL – 300)
