## SUMMARY

- **3+ Years Business Analysis experience** in documenting business requirements, QA, data collection, user testing, managing product backlog, data processing, productivity reports, documenting processes, tracking logs, analyzing reports/documents.
- Experienced in all phases of **Software Development Life Cycle (SDLC)** including requirements gathering, analysis, design, implementation, testing and deployment as well as software engineering methods.
- Experience with **Exploratory Data Analytics**, Data Reporting, **Ad-hoc Reporting**, Graphs, PivotTables and **OLAP reporting**.
- Extensive experience in Analytics using **Python (Pandas, NumPy) & SQL** and creating dashboards using tools like **Tableau, Power BI, Advance Excel** and **Matplotlib**.
- Proficient in creating **Use Cases, Sequence Diagrams**, and **Collaboration diagrams, Activity Diagrams, Class Diagrams** etc.
- Expertise in transforming business requirements into analytical models, designing algorithms, building models, developing data mining and reporting solutions that scale across a massive volume of structured and unstructured data.

## SKILLS

|                                       |                                                                                                 |
|---------------------------------------|-------------------------------------------------------------------------------------------------|
| <b>Languages:</b>                     | Python (Pandas, NumPy, Matplotlib)                                                              |
| <b>Databases:</b>                     | SQL (MySQL, PostgreSQL, SQL Server)                                                             |
| <b>Methodologies:</b>                 | SDLC, Agile, Scrum, Kanban, Waterfall                                                           |
| <b>Documentation:</b>                 | BRD, FRD, SRS, Process Flow Diagrams, User Stories, Use cases, UML, Reporting, Business Process |
| <b>Business Intelligence Tools:</b>   | Power BI, Tableau, Minitab, Confluence, JIRA, Figma, Visio, MS Office suite                     |
| <b>Cloud &amp; Integration Tools:</b> | AWS (S3, EC2, RDS), Azure                                                                       |
| <b>Analysis Techniques:</b>           | Cost/Benefit Analysis, GAP Analysis, Impact Analysis, Risk Analysis, SWOT Analysis, UAT         |
| <b>Project Management Tools:</b>      | JIRA, Azure DevOps, MS SharePoint, MS Project, SDLC, Agile, Scrum, Kanban, Waterfall            |

## EXPERIENCE

### Coforge, USA

#### Business Data Analyst

| Jan 2025 – Present

- Led end-to-end product lifecycle by defining clear business problems, conducting in-depth feasibility studies, and translating user needs into product features and user stories using Agile
- Collaborated with cross-functional teams to drive timely product releases aligned with client's strategic roadmap, enhancing product-market fit and customer satisfaction
- Conducted competitive market analysis and customer research by tools like Figma & Visio to identify opportunities for product differentiation
- Spearheaded the development and execution of UAT plans, system requirement documentation, and future-state process design, ensuring all new releases met business needs and operational efficiency goals
- Acted as a liaison between IT and non-technical departments to gather business requirements and manage system enhancements, focusing on improving data quality and delivering scalable product solutions
- Implemented product improvements that reduced user onboarding time driving higher conversion rates and improving overall platform usability in alignment with customer expectations and corporate aims

### HCL Tech, India

#### Business Analyst

| Feb 2021 – Aug 2023

- Led a cross-functional team of programmers and analysts in implementing database changes, resulting in an improvement in project efficiency while ensuring adherence to quality standards and best practices
- Utilized Python for data cleaning and preprocessing, enhancing data accuracy and identifying errors in database systems, which led to decrease half of the user-reported issues and improved overall data quality
- Developed interactive dashboards using Power BI and Tableau to effectively showcase financial performance metrics and operational insights, enabling stakeholders to make data-driven decisions
- Managed financial datasets in SQL Server, optimizing query performance and significantly reducing report generation times, while implementing a standardized process for database modifications
- Applied Unified Modeling Language (UML) methodologies to design Use Case Diagrams, Activity Diagrams, Sequence Diagram, ER diagrams & Data Mapping
- Built and maintained Power BI dashboards to track key financial KPIs such as account activity, loan performance, and client engagement—helping leadership make timely, data-driven decisions
- Used MS Visio to carry out the Business Use Case Modeling and Business Object Modeling effort to develop the business architecture for rapid and controlled application development
- Coordinated activities between the business house and technical staff, in developing new methods, policies, and procedures to meet the business needs, and has acted as a Subject Matter Expert

## EDUCATION

### Masters of Science in Project Management

| May 2025

Northeastern University, CA
