WORK EXPERIENCE

Indian Oil Corporation Limited

Fortune 500 listed, Indian multinational oil & gas company

Project Engineer, Onsite

December 2022 - Present

- Centralized the collection and validation of construction and financial data from 25+ contractors and consultants, guaranteeing data integrity and completeness across the INR 17000 crore refinery expansion project.
 - Validated accuracy of 100,000+ rows of financial and construction data monthly using Excel and **SQL**, which helped project leadership identify critical data errors and duplicity.
 - Spearheaded the creation of daily project tracking dashboards utilizing **Tableau**, which monitored 5+ **KPIs** critical to project success, enabling project managers to make data-driven decisions and improved project delivery speed.
 - Delivered daily data analysis using SQL queries to senior management, driving an increase in project efficiency by identifying KPIs and communicating insights to stakeholders for swift action.
 - Implemented data visualization techniques using **Excel** and Tableau to pinpoint areas for process improvement, contributing to an enhancement in overall project efficiency.
 - Delivered presentations for stakeholders and senior management, which incorporated data visualizations utilizing Excel and Tableau to highlight key trends and opportunities for project optimization.
 - Conducted site-wide safety walkthroughs, identified and rectified 10+ potential hazards, and improved overall compliance with OSHA standards during the project's duration.
 - Mediated disputes between 25+ contractors on refinery expansion project using conflict resolution strategies, ensuring project timelines were upheld and reducing delays.
-
