Professional Summary

Analytical and detail-oriented Data Analyst with over 4 years of experience designing scalable ETL pipelines, developing intuitive data models, and delivering impactful business intelligence solutions. Proven ability to transform raw, unstructured data into clear, strategic insights that support executive decision-making. Adept at automating data workflows using tools like **Prefect**, and building dynamic dashboards in **Power BI**. Skilled in **SQL**, **Python**, and **Snowflake**, with hands-on experience in data integration, quality validation, and cross-functional collaboration to support enterprise-level reporting and analytics initiatives.

Professional Experience

T-Mobile — Data Analyst Intern

Remote | May 2024 – Present

- Participated in a company-wide initiative to modernize reporting by transitioning legacy Crystal Reports into interactive Power BI dashboards, leading to improved data clarity and a noticeable increase in stakeholder engagement.
- Designed and optimized SQL queries to support both real-time and historical reporting, which improved dashboard load times by approximately 25%.
- Utilized Microsoft Fabric to streamline access to unified datasets, reducing manual data prep across teams and supporting collaboration at scale.
- Partnered with reporting and product managers to define key performance indicators (KPIs) and translated them into user-friendly visualizations adopted by multiple departments.
- Conducted regular data validation checks, maintaining 95%+ accuracy across dashboards and ensuring trust in cross-departmental reporting.

Einstix Technologies Pvt. Ltd. — Data Analyst

Bangalore, India | June 2022 – August 2023

- Designed and implemented scalable ETL pipelines using Python and SQL to automate data flows across marketing, sales, and finance, supporting timely, data-driven decision-making.

- Led workflow orchestration with Prefect, which improved data availability and reduced pipeline latency, boosting report reliability for critical business functions.
- Developed interactive Power BI dashboards to visualize KPIs and operational metrics, enabling executive teams to monitor performance in real time and make faster decisions.
- Collaborated with business stakeholders to gather reporting requirements and translated them into optimized, reusable data models used across 4+ departments.
- Automated routine data extraction and transformation tasks, resulting in a 60% reduction in manual reporting effort and improved report turnaround time.
- Performed rigorous data quality checks and validation routines, achieving consistent accuracy across high-volume pipelines and preventing downstream issues.
- Authored clear, structured documentation for data pipelines and dashboard logic, streamlining team onboarding and ensuring compliance with internal audit standards.
- Leveraged Snowflake to manage large-scale warehousing needs, improving query efficiency and enabling streamlined, cross-functional reporting workflows.

Einstix Technologies Pvt. Ltd. — Junior Business Analyst

Bangalore, India | June 2020 – May 2022

- Assisted senior analysts in building ETL pipelines using Python and SQL, supporting data flows across finance and marketing, which significantly improved the accuracy and timeliness of business insights.
- Implemented workflow orchestration using Prefect, enhancing pipeline reliability and reducing latency in data availability for high-impact business reports.
- Contributed to Power BI dashboard creation by preparing datasets and validating metrics such as revenue trends, customer retention, and campaign performance, enabling leadership to make data-driven decisions.
- Partnered with stakeholders to gather reporting needs and transformed business requirements into scalable and reusable data models for ongoing analysis.
- Automated repetitive data processing tasks, achieving a 60% reduction in manual reporting efforts and allowing analysts to focus more on strategy and interpretation.
- Supported QA efforts by testing data pipelines and documenting discrepancies to maintain consistency and trust in analytics outputs across departments.
- Created Python-based anomaly detection tools for large datasets, improving the organization's ability to identify data inconsistencies early and prevent downstream reporting issues.
- Wrote comprehensive documentation for ETL workflows and dashboard logic, supporting internal training, team onboarding, and audit-readiness.

Education

University of New Haven, West Haven

Master of Science in Business Analytics | January 2023 – May 2024

SRM University, Chennai

Bachelor of Business Administration | June 2017 – April 2020

Technical Skills

- **ETL & Workflow Orchestration:** Python, SQL, Prefect, Batch Scheduling, Data Wrangling
 - **Data Visualization:** Power BI, Microsoft Excel
 - **Databases & Warehousing:** Snowflake, PostgreSQL, MySQL
 - **Data Engineering Concepts:** ETL Design, Data Quality Validation, Data Warehousing, Data Governance, Automation Scripting
 - **Collaboration & Project Tools:** JIRA, Confluence
-
