SUMMARY

Product Analyst with 3 years of experience driving data-informed product decisions for B2B SaaS platforms. Skilled in market research, MVP definition, UAT, usability testing, sprint planning, and backlog analysis to improve adoption and performance. Proficient in SQL, Python, and Excel for KPI tracking, funnel analysis, and A/B testing. Experienced with JIRA, Confluence, Figma, Productboard, Tableau, Power BI, Amplitude, and Mixpanel. Strong expertise in user journey mapping, competitive analysis, and go-to-market strategies to deliver measurable product outcomes.

SKILLS

User Research & Product Validation: UAT Testing, Usability Testing, Customer Journey Mapping, Persona Development, Competitive Analysis, Surveys & Feedback Loops
Analytics & Data Insights: SQL, Python (Pandas, NumPy), A/B Testing, Funnel Analysis, Cohort Analysis, Retention & Churn Metrics (DAU, WAU, MAU, CLTV), KPI Tracking, Experiment Design, Product Performance Measurement
Product Execution & Strategy: Roadmapping, PRDs, Agile/Scrum, User Story Mapping, Sprint Planning, Go-to-Market (GTM) Strategy, Stakeholder Communication, Cross-functional Collaboration
Tools & Visualization Platforms: Tableau, Power BI, JIRA, Confluence, Amplitude, Mixpanel, Google Analytics, Figma, Miro, MS Excel
Statistical & Data Techniques: Hypothesis Testing, Regression Analysis, Time Series Analysis, Statistical Significance, Data Transformation, Dashboarding, Data Visualization

EXPERIENCE

McKesson | Product Analyst, Irving, Texas, Hybrid **Nov 2024 - Present**

- Conducted UAT and usability testing for pharmacy portal workflows by collaborating with pharmacists and compliance teams; resolved 90%+ of issues pre-launch, ensuring FDA compliance and improving release quality.
- Developed interactive Power BI dashboards tracking fill rates, wait times, and prescription drop-offs across 8,500+ stores; insights were used in leadership reviews, driving interventions that improved efficiency by 15%.
- Partnered with UX and accessibility teams to redesign high-traffic pharmacy portal flows; created Figma wireframes and ran usability testing, leading to a 22% reduction in click paths for refill and medication management.
- Spearheaded go-to-market strategy for the Specialty Pharmacy Locator tool by aligning product, marketing, and support teams; managed training and rollout, ensuring adoption across web, mobile, and in-store channels.
- Teamed Up with clinical innovation teams to analyze user behavior on chronic care modules using Mixpanel and Amplitude; findings informed layout changes that increased session time by 18% and enhanced patient engagement.
- Defined KPIs and benchmarks for a pharmacy document workflow solution; managed Agile SDLC in Jira by coordinating legal, compliance, and engineering teams, resulting in a 38% faster document turnaround within 90 days.
- Designed and rolled out a pharmacist dashboard consolidating patient history, prescriptions, and insurance data; accelerated refill counseling and contributed to a 12% improvement in medication adherence rates.
- Shaped the MVP of a prescription sync feature by coordinating pilots across multiple store locations; insights reduced refill fragmentation, improved patient coordination, and lowered repeat walk-ins.

Accenture | Product Analyst, Hyderabad India **May 2021 - Jul 2023**

- Led UAT and usability testing for a physician scheduling tool across four hospitals; coordinated with stakeholders and QA to resolve 40+ critical issues pre-launch, achieving a 97% release success rate and minimizing disruptions.
- Coordinated go-to-market planning for an insurance claims submission portal; partnered with business and engineering to define the MVP, adding real-time validation and document upload features that reduced claim rejections by 28%.
- Performed SQL-driven analysis of 2.7M+ electronic health records to identify bottlenecks in patient discharge workflows; insights led to process redesigns that improved discharge timelines by 21% across partner hospitals.
- Engineered and deployed Tableau dashboards to monitor patient engagement in a chronic care management app; findings guided feature prioritization and clinical interventions, driving an 18% increase in patient engagement.
- Collaborated with UX teams to optimize onboarding flows for a telehealth platform; analyzed heatmaps and drop-off points, leading to a redesigned user journey that increased registration completions by 16%.
- Contributed to Agile delivery through sprint planning, backlog grooming, and retrospectives for healthcare modules; aligned priorities with patient safety and outcomes, improving sprint velocity by 18%.
- Transformed pharmacy support tickets into actionable backlog items by collaborating with developers and QA; resolution of recurring pain points reduced ticket volume by 36% across two release cycles, improving support efficiency.
- Automated HIPAA compliance reporting using Python and Excel macros, cutting manual reporting effort by 80% and ensuring accurate, timely updates for legal and security teams on critical workflows.

EDUCATION

Master of Science in Information Science
University of North Texas, Denton, Texas
