

Professional Summary

Detail-oriented and results-driven Data Engineer with over 3 years of experience in building scalable ETL pipelines, designing cloud-based data architectures, and enabling actionable business intelligence through advanced analytics. Skilled in SQL, Python, AWS, Snowflake, and Apache Spark, with a strong foundation in data modeling and pipeline automation. Experienced in collaborating cross-functionally to deliver reliable, high-performance data systems. Passionate about creating robust, efficient, and insight-driven data solutions to power enterprise decision-making.

Education

Master of Science in Computer Science / University of North Texas, USA

Skills

Programming	SQL, Python
Big Data & ETL	Apache Spark, Apache Hive, Apache Kafka, Hadoop
Cloud Platforms	AWS (S3, Redshift, EC2, Lambda), Azure Synapse Analytics
Data Warehousing	Snowflake, AWS Redshift, Azure Synapse Analytics
Databases	MySQL, PostgreSQL, Oracle, MongoDB
Data Modeling	Dimensional Modeling (Star & Snowflake Schemas)
Monitoring	AWS CloudWatch, Azure Monitor

Professional Experience

Data Engineer | Norfolk Southern Railway | Aug 2024 – Present

- Conducted comprehensive statistical analyses to support data-driven strategies.
- Integrated and cleansed large datasets from diverse sources, ensuring high data quality and consistency.
- Designed and implemented scalable ETL pipelines and data ingestion workflows to support enterprise data warehousing and analytics needs.
- Optimized complex SQL queries for efficient data extraction and analysis from MySQL and Snowflake.
- Automated reporting processes with Python scripts and Excel VBA, reducing manual efforts by 30%.

Associate Data Engineer | Wipro Limited | India | Mar 2022 – Jan 2023

- Engineered scalable, cloud-based data pipelines utilizing SQL, Python, and Snowflake for real-time and batch processing.
- Led the migration of legacy ETL workflows from SSIS and Alteryx to Python-based solutions, cutting processing time by over 40%.
- Developed automated data ingestion scripts and integrated external APIs for seamless data flow.
- Implemented data quality frameworks with robust error logging and monitoring mechanisms.
- Streamlined data pipelines with Azure Data Factory, Databricks, and Snowflake to boost efficiency.

Data Analyst | Corefront Technologies Pvt Ltd | India | Sep 2020 – Feb 2022

- Created and maintained interactive Power BI dashboards for sales, marketing, and operations, enabling data-driven decision-making.
 - Developed advanced DAX measures and Power Query transformations to extract insights from large, multi-source datasets.
 - Integrated Salesforce, SharePoint, Excel, and SQL data using APIs and Power BI connectors.
 - Improved report refresh and delivery times by automating workflows with Power Automate.
-

Certifications

- AWS Certified Cloud Practitioner – Amazon Web Services
- IBM Certified Professional Data Analyst – IBM
- Power BI Data Visualization & Business Intelligence Specialist – Coursera
