

SRI CHARAN CHITTURI

Business Analyst

Location: FL | Email: charanchitturi799@gmail.com | Phone: (813) 303-6766 | [LinkedIn](#)

SUMMARY

Business Analyst with 3+ years of experience in healthcare and financial domains, specializing in data analytics, visualization, and process optimization. Expert in Python, SQL, Power BI, Apache Spark, Databricks, Snowflake and cloud platforms (AWS, Azure, GCP) for data modeling, data warehousing, KPI design, ETL workflows, and dashboard development. Adept at working in Agile/Scrum environments and collaborating cross-functionally to translate business requirements into actionable insights that drive efficiency and decision-making.

Experienced in designing and modernizing scalable data platforms using Medallion architecture, RAG pipelines, and AI agentic workflows. Skilled in CI/CD pipeline implementation, data quality, audit documentation and governance frameworks, and workflow automation to deliver reliable, compliant, and high-performing enterprise data solutions.

TECHNICAL SKILLS

Tools & Platforms: Power BI, Tableau, Qlik, MS Excel (Pivot Tables, Macros, VBA), JIRA, Confluence, Azure DevOps, Visio, Lucidchart

Databases & Querying: SQL (MySQL, PostgreSQL, Oracle, SQL Server), Snowflake, Google BigQuery, MongoDB, Hadoop

Cloud & Data Platforms: AWS (S3, RDS, Glue, Lambda, Kinesis, Athena), Azure (ADLS, Synapse, Event Hub, Fabric)

ETL & Data Integration: Talend, SSIS, Informatica, Apache Airflow, Snowflake, APIs (REST, SOAP), GraphQL, Schema Mapping, Hadoop

Data Analysis & Reporting: KPI Tracking, Ad-Hoc Analysis, Dashboard Design, A/B testing, Drilldowns, Data Validation, RepAutomation, Looker, Dimensional Modelling, Data Warehousing

Version Control, CI/CD & DevOps: Git, GitHub Actions, Kubernetes, Docker, Jenkins, Terraform

Project Management: Agile (Scrum, Kanban), SDLC, Sprint Planning, BRD/FRD/SRS Documentation, UAT Coordination

Compliance & Governance: HIPAA, GDPR, RBAC, Audit Readiness, Stakeholder Sign-Offs

Business Intelligence & Strategy: Data-Driven Decision Making, Business Case Development, Requirement Gathering, Process Mapping

Communication & Collaboration: Cross-Functional Coordination, User Training, Requirement Workshops, Stakeholder Presentations

PROFESSIONAL EXPERIENCE

McKinsey & Company

Business Data Analyst

USA

Jul 2025 - current

Tech: SQL, Python, Power BI, Figma, InVision, Microsoft Fabric, Visio, Agile/Scrum, Requirement Gathering, Stakeholder Management, Workflow Mapping, Data Analysis & Visualization

- Gather and translate complex business requirements into detailed technical solutions, improving reporting efficiency by 20%.
- Develop interactive Power BI dashboards using DAX and Power Query to monitor real-time KPIs across multiple departments.
- Support ETL data pipelines in Databricks (AWS & Azure) ensuring 99% data reliability and optimized query performance.
- Partner with cross-functional teams to automate workflows, reducing process inefficiencies by 25%.
- Lead UAT planning, execution, and sign-off, enhancing user satisfaction by 15% through seamless delivery of analytics solutions.
- Contributed to the design and orchestration of RAG pipelines, vector databases, and OpenAI LLMs to develop AI solutions that power agentic workflows, streamline analysis, and surface contextual insights.

KPMG

Business analyst

INDIA

Aug 2022 – Jul 2023

Tech: SQL, Power BI, Databricks, Azure (Data Factory, DevOps), REST APIs, ERP/CRM Systems.

- Conducted requirement workshops, created BRD/FRD documentation, and supported audit and financial data analytics projects.
- Automated job scheduling and ETL monitoring via Azure Data Factory triggers and PowerShell scripts to ensure reliable nightly data refreshments.
- Created and managed CI/CD pipelines in Azure DevOps for automated build, test, and deployment, integrating with GitLab for version control.
- Tuned SQL queries for data migration from DB2, SQL Server, and BigQuery, improving load performance in Power BI and Alteryx pipelines.
- Designed and deployed Tableau dashboards that improved KPI visibility and financial insights by 30%.
- Performed data validation and root-cause analysis on 10M+ financial records, achieving 100% data accuracy.
- Automated REST API integrations between ERP and CRM systems, reducing manual data entry by 40%.
- Implemented Airflow-based orchestration to centralize and automate ETL workflows, handling daily, historical, and backfill jobs.
- Coordinated Agile sprint ceremonies and backlog prioritization, enhancing project delivery speed by 15%.
- Implemented and maintained UNIX shell scripts, CRON jobs, FTP processes, and file system operations across multiple UNIX environments as part of ETL workflows.

- Collected and documented data and compliance requirements for pharmaceutical reporting, ensuring complete audit traceability.
- Developed Tableau dashboards to track spend, billing accuracy, operational goals, and KPIs across healthcare logistics, using slicers, bookmarks, tooltips, and drill-through functionality.
- Validated ETL workflows across AWS S3, Redshift, and Power BI, achieving 99.5% data accuracy.
- Performed process mapping and gap analysis to eliminate redundant manual reporting, saving 35% of analyst time.
- Created complex T-SQL, PL/SQL stored procedures, functions, and triggers to support analytical and reporting requirements.
- Managed UAT testing and issue resolution to ensure alignment of analytics modules with key business objectives.
- Gained hands-on experience with **Looker** for building data models and interactive dashboards on GCP.
- Created the **Jenkins** pipeline to automate the code migration from onprem to AWS.
- Worked on automating the infrastructure setup, launching and termination EMR clusters.
- Integrated streaming data sources via Apache Kafka into analytics pipelines for near real-time processing.

EDUCATION

The University of Tampa	,Tampa, FL, USA
Master's in information and technology management,	Aug 2023 - May 2025
Koneru Lakshmaiah Education Foundation	, Andhra Pradesh, India
Bachelor of Technology in Electronics and Communication Engineering	Jul 2018 - May 2022

CERTIFICATIONS

- Databricks Certified Data Engineer Professional
- AWS Certified Data Engineer Associate
- AWS AI Practitioner
- Microsoft Power BI Data Analyst Associate

PROJECTS

Generative AI Research Engineer | The University of Tampa | Tampa, Florida

- Designed and deployed scalable ETL pipelines in Databricks to clean and structure 1M+ clinical records for downstream NLP processing using LLMs and deep learning models.
- Integrated BERT, T5, and GPT models using Hugging Face Transformers to perform summarization and question generation on patient data.
- Developed RESTful endpoints for real-time inference via AWS SageMaker, Azure ML, and Bedrock.
- Created testing frameworks to validate model predictions and deployed them with Docker and GitHub CI/CD workflows.
- Applied MLOps techniques to track model lineage, automate deployments, and enable rollback with model version control.
- Leveraged Kubernetes to containerize models for scalable access during high-volume medical queries.
- Partnered with healthcare analysts to design dashboards visualizing model accuracy and data distribution.
- Engineered a modular observability platform using Python and Airflow to detect schema changes, missing values, and data duplication.
- Developed PowerShell and Bash scripts to monitor AWS Glue job logs and automate error remediation workflows
