

Charan Devapatla Software Engineer

charan@myworkmails.com | (713) 371-6699 | USA | [LinkedIn](#)

Summary

Versatile Software Engineer with 4+ years of hands-on experience in full-stack development, AI/LLM integration, and scalable backend systems. Proficient in .NET, Angular, SQL, and cloud platforms like AWS and Azure. Skilled in developing secure APIs, implementing LLM models, and using CI/CD pipelines. Adept at collaborating across teams to deliver high-performance, data-driven applications in agile environments.

Technical Skills

- **Programming Languages & Paradigms:** C#, .NET (ASP.NET Core, ASP.NET MVC, Web API), Java, Python, Rust, JavaScript, TypeScript
- **Frontend / UI Technologies:** Angular, React, HTML, CSS, responsive & mobile-first design
- **Backend & API Development:** RESTful APIs, Microservices, GraphQL, JSON, Entity Framework Core, ADO.NET
- **Database & Data Technologies:** SQL Server, Oracle, PostgreSQL, NoSQL, indexing, partitioning, normalized schema design, ETL, SSIS, SSRS
- **Cloud / Infrastructure & DevOps:** AWS (services like Lambda, KMS, CodePipeline, CloudWatch, EC2), Azure (Azure DevOps, AKS, App Services, Azure SQL Database, Key Vault), Docker, Kubernetes, Serverless computing
- **AI / ML:** TensorFlow, PyTorch, Scikit-learn, OpenAI APIs, BERT, Claude, LLaMA, LLMs, RAG, LangChain / LlamaIndex.
- **Security & Reliability:** Secure coding practices, threat modeling, encryption, role-based access control, data encryption, vulnerability testing, compliance (PCI-DSS / HIPAA / other relevant), incident response
- **Testing & QA:** Unit testing (xUnit), Integration & API testing (Postman), UI testing (Selenium, Jasmine, Karma), automated testing, TDD
- **Architecture & System Design:** Scalable architecture, distributed systems, design patterns, event-driven architecture,DDD, performance optimization
- **Tools & Workflow:** Git, CI/CD, containerization, monitoring/logging, API/documentation tools (Swagger/Postman), agile methods, collaboration tools
- **Soft Skills:** Strong problem solving & analytical thinking, adaptability, communication & teamwork, continuous learning, leadership, ethical duty

Professional Experience

Software Engineer, Lending Club

05/2023 – Present | Remote, USA

- Developed a secure payment processing and checkout platform for Lending Club's financial services. Integrated AI model for fraud detection, reducing fraudulent transactions by 38%. Collaborated with product owners and stakeholders during requirement gathering and planning.
- Engineered backend services using ASP.NET Core, RESTful APIs, and Entity Framework Core to manage transaction workflows, user authentication, and secure checkout. Integrated RabbitMQ and HTTP messaging for distributed event handling. Documented APIs using Swagger and Postman, improving internal integration efficiency by 40%.
- Applied a fraud detection system using Claude-based LLM into backend microservices to analyze payment metadata and behavioral signals in real time. Improved fraud detection accuracy by 38%. Documented model architecture, performance logs, and usage plans for the engineering team.
- Developed dynamic frontend modules in Angular and JavaScript for real-time payment tracking, secure checkout forms, and error handling flows. Enhanced user experience and reduced cart abandonment rate by 22%.
- Designed and normalized database schemas in Oracle and SQL Server using indexing, stored procedures, and partitioning. Used Azure Key Vault for token encoding. Improved query performance by 45% and supported real-time reconciliation and regulatory reporting across all payment records.
- Used CI/CD workflows with Azure DevOps Pipelines. Automated backend testing with xUnit and Postman, and frontend testing using Jasmine and Karma. Worked closely with DevOps on Docker-based deployments and Azure Monitor for observability, reducing release errors by 30%.

Software Engineer, Infosys

08/2021 - 08/2022 | Hyderabad, India

- Developed InfySalesTracker, an Angular-based frontend featuring dynamic sales dashboards and lead management tools with responsive design and advanced filtering, increasing sales team productivity and pipeline visibility by 30% across desktop and mobile devices.
- Built backend services using ASP.NET MVC, creating RESTful APIs for lead processing and sales analytics, implementing ADO.NET for efficient database access, and delivering JSON-formatted data that improved frontend responsiveness by 25%.
- Designed and optimized SQL Server databases with stored procedures and parameterized queries while enforcing role-based security and data encryption, reducing data breaches by 40% and ensuring compliance with company policies.
- Authored detailed technical documentation for APIs, database schemas, and application architecture, collaborating with product owners, QA engineers, and UI/UX teams to align requirements and improve delivery efficiency by 20%.
- Executed Agile development with CI/CD pipelines in Azure DevOps, integrating automated unit and Selenium UI testing, and worked with DevOps engineers to deploy containerized applications on Azure Kubernetes Service, achieving 99.9% uptime during releases.

Software Engineer, Infosys

02/2021 - 07/2021 | Hyderabad, India

- Successfully completed a 4-month intensive training at Infosys in .NET technologies, including ASP.NET, MVC, and SQL. Gained hands-on experience with C#.NET, ADO.NET, and applied knowledge to real-world software development.
- Contributed to live projects using ASP.NET Web API, MVC, and SQL database development. Demonstrated strong proficiency in C#.NET and ADO.NET while adhering to professional coding standards and clean software architecture practices.
- Adapted quickly to Agile methodologies, embraced continuous learning, and practiced collaborative problem-solving. Excelled in fast-paced IT environments by maintaining a result-oriented approach and consistently delivered tasks under tight deadlines and evolving requirements.

Education

Master of Science in Data Science

08/2022 – 12/2023

University of Houston, Houston, TX, USA

Bachelor of Technology in Electronics and Communication Engineering

07/2017 – 04/2021

Vellore Institute of Technology, Vellore, India
