

Charan Simha Reddy Tamma

Milpitas | (510)-453-0908 | charant0243@gmail.com | LinkedIn |

Aspiring Data Scientist with practical experience in Python, SQL, and machine learning. Proven ability to analyze large datasets, develop predictive models, and create interactive visualizations to improve decision-making. Strong foundation in data analytics, statistical modeling, and business intelligence. Eager to contribute analytical expertise and creativity to solve real-world problems.

Education

Drexel University Master's in Cyber Security	2023–2025 Philadelphia, PA
Presidency University Bachelor's in Computer Science	2020–2023 Bangalore, India

Experience

AI and Data Developer Intern Grayson Sky, PA	April 2025 – Sep 2025
- Developed Python scripts for data collection, preprocessing, and analysis, improving efficiency by 20%. - Built AI/ML models to predict client-specific outcomes and automate decision-making processes. - Created dashboards and visualizations using Python libraries to support data-driven strategy. - Collaborated with cross-functional teams to integrate analytical solutions into business workflows. - Applied version control (Git) and best practices for reproducible and secure data pipelines.	

Projects

Payload Design for Drones	Sep 2023 – June 2024
- Analyzed drone flight and payload data to optimize delivery logistics and efficiency. - Designed algorithms to simulate drone operations and minimize risk in pharmaceutical delivery. - Reduced delivery times by 15% through data-driven operational improvements.	
Sales Data Analysis Project	Feb 2025 – April 2025
- Performed exploratory data analysis (EDA) on large sales datasets using Python (Pandas, NumPy, Matplotlib). - Built predictive models to forecast sales trends, achieving 90% accuracy on test data. - Created interactive visualizations in Tableau/Power BI to communicate insights to stakeholders.	

Skills

Programming & Data: Python, R, SQL, Java
Machine Learning & Analytics: Pandas, NumPy, Scikit-learn, TensorFlow
Visualisation: Matplotlib, Seaborn, Tableau, Power BI
Tools & DevOps: Git/GitHub, Docker, VS Code
Soft Skills: Team Collaboration, Problem Solving, Critical Thinking, Adaptability

Certifications

-
- Machine Learning and Data Science – Udemy
 - AWS Cloud Practitioner Essentials – AWS
