

Charan Gurram

Software Engineer

Carbondale, IL | charan.gurram2000@gmail.com | www.linkedin.com/in/charan-gurram35/ | 618-525-7224

SUMMARY

Full Stack - Software Engineer with 6+ years of combined industry and academic experience in building scalable, cloud-based applications using Java, Python, and React.js. Skilled in microservices, Kafka, and RESTful APIs with hands-on expertise in AWS, Azure, and GCP. Experienced in CI/CD, Terraform, Kubernetes, and monitoring tools (Grafana, ELK, Prometheus). Adept at delivering data-driven solutions that improve performance, reliability, and efficiency in high-scale environments.

PROFESSIONAL EXPERIENCE

Netflix | CA | Software Engineer

April 2024 – Present

- Developed microservices in Java using Spring Boot, optimizing for high availability and achieving 20% latency reduction under peak traffic in Netflix's streaming infrastructure. Conducted performance tuning under high concurrency conditions.
- Enhanced CI/CD pipelines using Jenkins and Spinnaker, accelerating release cycles and increasing deployment reliability. Applied Infrastructure as Code (IaC) principles using Terraform and CloudFormation to automate cloud provisioning.
- Built and maintained cloud-native applications on AWS, utilizing services such as EC2, S3, DynamoDB, and Lambda to power scalable, serverless workloads for metadata processing and content management.
- Created interactive, responsive UIs with React.JS, TypeScript, and modern CSS frameworks. Integrated dynamic components with backend APIs and contributed to A/B testing that improved user engagement by 12%.
- Designed, developed, and deployed highly scalable and resilient backend services using Python and Flask/FastAPI, building performant, RESTful APIs integrated into Netflix's distributed architecture supporting millions of users.
- Contributed to internal platforms using technologies such as GraphQL for flexible data queries and gRPC for efficient inter-service communication across Netflix's microservices ecosystem.
- Ensured high code quality by conducting thorough code reviews on AI/ML-driven services, maintaining robust documentation for model APIs, training pipelines, and data workflows, and actively sharing machine learning best practices across engineering teams.

Southern Illinois University Carbondale | Carbondale, IL | Graduate Assistant

January 2023 – April 2024

- Supported faculty research by developing data processing pipelines in Python and SQL, enabling efficient handling of large academic datasets and generating insights for ongoing studies.
- Assisted in modernizing university IT workflows by deploying academic applications on AWS (EC2, S3, and Lambda), improving accessibility and system reliability for faculty and students.
- Mentored graduate and undergraduate students in Java, SQL, and Python, providing hands-on guidance for coding labs and academic projects while reinforcing industry best practices.

Cognizant | India | Software Engineer

August 2019 – November 2022

- Developed and maintained interactive, enterprise-grade web applications with a strong focus on accessibility, performance, and cross-platform responsiveness using JavaScript, React.JS, HTML5, and CSS3.
- Designed and deployed cloud-native applications on Microsoft Azure, leveraging services such as Azure App Service for hosting and Azure Functions for serverless workflows, resulting in reduced operational costs by 15% and faster deployment cycles.
- Contributed to building scalable, modular architectures, including microservices, and developed RESTful APIs to ensure seamless system integration and high availability across services.
- Ensured robust code quality and maintainability by adopting Test-Driven Development (TDD) practices using JUnit, improving test coverage and reducing post-deployment defects by 20%.
- Implemented CI/CD pipelines with Jenkins, automating builds, testing, and deployments, while collaborating in Agile teams using JIRA for sprint planning and progress tracking.

TECHNICAL SKILLS

Programming Languages:	Java, Python, Node.JS, JavaScript, TypeScript, C#, SQL
Web & Backend Frameworks:	Spring Boot, Django, Flask, React.js, Angular, HTML5, CSS3
Cloud Platforms:	AWS (EC2, S3, EMR, Lambda, RDS, DynamoDB), Microsoft Azure (App Services, Functions, AKS), Google Cloud Platform (App Engine, Compute Engine, BigQuery)
DevOps & CI/CD Tools:	Docker, Kubernetes, Jenkins, Git, Spinnaker, Terraform, CloudFormation
Databases:	MySQL, PostgreSQL, SQL Server, MongoDB, Cassandra, DynamoDB, Redis
Data Engineering & ETL:	Apache Kafka, Apache Spark, AWS Glue, ETL Pipelines
Architecture & Integration:	Microservices, RESTful APIs, GraphQL, gRPC, Message Queues (RabbitMQ, AWS SQS)
Testing & QA:	JUnit, pytest, Selenium, Jest, Mocha, Test-Driven Development (TDD)
Agile & Project Tools:	Agile/Scrum, JIRA, Confluence
Operating Systems & Tools:	Linux, Windows, VMware, VirtualBox, Bash/Shell scripting
*Certification: AWS – certified Developer – Associate	

EDUCATION

Masters in Computer Science

Southern Illinois University Carbondale, IL, USA.

Bachelors Computer Science and Engineering

Guru Nanak Institutions Technical Campus, Telangana, India.
